**MEDICAL SCHOLARS PROGRAM**

Saint Louis University's Medical Scholars Program gives particular recognition to beginning freshmen premedical students. Students apply to the Medical Scholars Program on the medical scholars application at the same time that they apply to Saint Louis University.

Medical scholars may apply to Saint Louis University School of Medicine in their sophomore year of study. They may gain early conditional acceptance for the year following completion of their undergraduate work.

Qualified candidates must have:

- At least an SAT total of 1330 or at least a 30 ACT Composite (average) score, according to the national norms for college-bound students.
- Completed one year of high school biology, one year of high school chemistry and three years of mathematics through trigonometry.

Participants must also be able to meet the minimum "technical standards" set by the School of Medicine (https://www.slu.edu/medicine/medical-education/md/admissions/requirements-standards.php).

Medical scholars are required to attend a special orientation given by the director of pre-health and pre-law studies and the dean of admission of the School of Medicine. This meeting will occur at the beginning of the applicant's freshman year.

**Curriculum Overview**

The curriculum in the program for freshman and sophomore years is outlined below for most majors. Any change to this curriculum requires the specific approval of the director of pre-health and pre-law studies and the School of Medicine.

Advanced placement and 1818 credit may apply to non-science courses in this curriculum; however, a strict course substitution policy will be followed. For example, if Calculus I has been completed in the 1818 ACC Program, another math course, such as Calculus II or Statistics, must be substituted. All science courses must be taken at Saint Louis University.

**Admission Requirements**

Eligible students must apply to the program during their senior year in high school, must have grades of "B" or higher and may elect to take part in this program only in the fall, at the beginning of their freshman year. The program is not available to transfer students or to freshmen at any other time of year.

**Prerequisites for Participation in the Medical Scholars Program**

ACT composite of 30 or higher or SAT scores of 1330 or higher and excellent high school academic record which includes one year of biology, one year of chemistry and three years of mathematics through trigonometry.

**Academic Policies**

Students in the Medical Scholars Program are not allowed to withdraw from courses, audit courses, take courses pass/fail, receive grades of "D" or "F," or receive incomplete grades.

In the sophomore year, the Pre-Health Committee on Evaluations will evaluate students. These evaluations will be maintained in the Office of Pre-Health and Pre-Law Studies and be kept in preparation for application to the School of Medicine. A member of the Pre-Health Committee on Evaluations will interview the student successfully maintaining the required minimum GPA averages. An evaluation will be prepared by the committee and submitted to the School of Medicine. This evaluation contains the following documents:

- Letter of evaluation prepared by the committee
- A personal essay, "Why I Want to be a Physician"

The Office of Pre-Professional Health Studies will also send appropriate application materials to the admissions committee.

These materials will be submitted to the dean of admission at Saint Louis University School of Medicine during the spring of the applicant's sophomore year. The admissions committee of the School of Medicine will conduct interviews, and applicants will receive a response from the School of Medicine by the beginning of the junior year concerning admission.

Students gaining a conditional acceptance to Saint Louis University School of Medicine are required to:

- Complete the physics sequence
- Maintain the cumulative 3.65 GPA averages previously described
- Take the MCAT at the prescribed time, and complete the Undergraduate degree program outlined in their application to the School of Medicine
- Take an upper-division science course (biology, chemistry or physics) in the fall and spring semester of their senior year

If a student who has been accepted into Saint Louis University School of Medicine through participation in the Medical Scholars Program should decide to apply to other medical schools, this early acceptance will be withdrawn. If such a student wishes to be reconsidered for admission to this School of Medicine, he or she may follow the regular application process.

**Requirements**

There is some variability in coursework, in terms of course numbers and timing. Specific core courses and timing may vary by college or school. Students work with their primary academic advisor to establish an appropriate course of study.

Total Credits  40

1  Calculus I is the minimum mathematics requirement for the program and for admission to most medical schools

**Required in the Junior and Senior Years**

1. Completion of the physics sequence.
2. Maintain a minimum 3.65 annual average and a minimum 3.65 science/mathematics annual average and for each academic year (fall and spring semesters).
3. The Medical College Admission Test (MCAT) to be taken at the prescribed time.
4. MCAT scores do not affect acceptance; however, medical scholars are expected to make every effort to achieve the highest possible score.
5. Completion of the undergraduate degree program.
6. At least 14 GPA credits (i.e. standard letter grade) must be taken in any semester.

**Continuation Standards**

In order to remain in this program, the student must at the close of the freshman year (30 GPA credits minimum), have official grade point averages of at least 3.65 in sciences/mathematics and in their cumulative (overall) GPA.

The minimum GPA requirements must be met on an annual basis at the end of each academic year and are noncumulative. Credits acquired between freshman and sophomore years will not be considered part of the 60 GPA credits total, nor will courses taken in transfer between these years be permitted to substitute for the required science courses.

It is recommended that all mathematics class be taken at Saint Louis University, but some AP mathematics course credits might be accepted. Grades for transfer courses and 1818 courses are not computed into these averages; however, the credit for these courses does count toward graduation. AP or dual credit in biology, chemistry and physics are not acceptable to meet science course requirements.
