Overview

Established in 1908, the Department of Chemistry at Saint Louis University houses active research groups involving graduate students in traditional areas such as analytical, physical, organic and inorganic chemistry, as well as cross-disciplinary areas such as materials, environmental and biological chemistry.

These research groups regularly publish in top-ranked journals and present at national and international conferences. Research in the department is supported by a variety of sources, including the Frasch Foundation, National Institutes of Health, National Science Foundation, Petroleum Research Fund and American Heart Association.

The Department of Chemistry offers undergraduate and graduate programs designed to meet a wide range of interests.

The department participates in a dual degree program in Chemical Engineering with Washington University where a student may receive a B.A. in chemistry from Saint Louis University and a B.S. in Chemical Engineering from Washington University after 3 years of study at SLU and 2 years at Washington University.
