MEΤΕΟΡΟΛΟΓΙΑ, M.S.

Students who graduate from Saint Louis University’s meteorology programs are trained to be meteorologists. They study the dynamics of air motion; physical processes such as transfer of radiation; and convection resulting in severe storms, flash floods and hurricanes. Research is underway at SLU on heavy precipitation, regional climate and air quality using numerical weather prediction models. Faculty members collaborate with research meteorologists at national centers, as well as operational meteorologists at the St. Louis National Weather Service forecast offices.

SLU is a founding member of the University Corporation for Atmospheric Research, which manages the National Center for Atmospheric Research (NCAR), in Boulder, Colorado, under the sponsorship of the National Science Foundation and NASA’s DEVELOP program.

Curriculum Overview
The Master of Science in Meteorology requires 24 credits of coursework and six credits of thesis research. It is geared to students planning to enter SLU’s meteorology doctoral program (https://catalog.slu.edu/colleges-schools/arts-sciences/earth-atmospheric-sciences/meteorology-phd/) after completion, as well as those who want to work in a research capacity or enhance their qualifications for forecasting positions.

Fieldwork and Research Opportunities
SLU’s Department of Earth and Atmospheric Sciences (https://www.slu.edu/arts-and-sciences/earth-atmospheric-sciences/) a charter member of the University Corporation for Atmospheric Research (UCAR) which manages the National Center for Atmospheric Research, Boulder, Colorado, under the sponsorship of the National Science Foundation. External funding for research comes from the National Oceanic and Atmospheric Administration (NOAA), the National Weather Service, and the National Aeronautics and Space Administration (NASA). The department has a dedicated synoptic computer lab and receives real-time data from both satellite downlink and the Internet.

Software for displaying and analyzing weather data comes from Unidata Program Center, the National Weather Service, and locally written code.

Careers
SLU meteorology graduates work for federal and state government agencies, such as the National Weather Service, Federal Aviation Administration, NASA and the Environmental Protection Agency. Others are employed in the private sector, conducting atmospheric and agricultural research, weather forecasting and air quality assessments.

Admission Requirements
Successful applicants possess sufficient test scores, GPA and TOEFL scores (for international students).

An undergraduate degree in meteorology or a related field.

Application Requirements
• Application form and fee
• Three letters of recommendation
• Transcript(s)
• Professional goal statement

• Résumé
• GRE scores are optional

Requirements for International Students
All admission policies and requirements for domestic students apply to international students along with the following:

• Demonstrate English Language Proficiency (http://catalog.slu.edu/academic-policies/office-admission/undergraduate/english-language-proficiency/)
• Proof of financial support must include:
  • A letter of financial support from the person(s) or sponsoring agency funding the time at Saint Louis University
  • A letter from the sponsor’s bank verifying that the funds are available and will be so for the duration of study at the University
• Academic records, in English translation, of students who have undertaken postsecondary studies outside the United States must include the courses taken and/or lectures attended, practical laboratory work, the maximum and minimum grades attainable, the grades earned or the results of all end-of-term examinations, and any honors or degrees received. WES and ECE transcripts are accepted.

Application and Assistantship Application Deadlines
Students who want to be considered for an assistantship must submit their applications by Jan. 2.

U.S. students should apply for the fall semester by July 1 and for the spring semester by Nov. 1. International students should apply for the fall semester by May 1 and for the spring semester by Oct. 1.

Review Process
Faculty committee members examine qualified applicants’ materials and make recommendations.

Scholarships, Assistantships and Financial Aid
For priority consideration for a graduate assistantship, applicants should complete their applications by the program admission deadlines listed. Fellowships and assistantships provide a stipend and may include health insurance and a tuition scholarship for the duration of the award.

For more information, visit the student financial services office online at http://www.slu.edu/financial-aid (http://www.slu.edu/financial-aid/).

Learning Outcomes
1. Graduates will be able to assess relevant literature or scholarly contributions in the Earth & Atmospheric Sciences.
2. Graduates will be able to apply the major practices, theories, or research methodologies in the Earth & Atmospheric Sciences.
3. Graduates will be able to apply knowledge from the Earth & Atmospheric Sciences to address problems in broader contexts.
4. Graduates will be able to articulate arguments or explanations to both a disciplinary or professional audience and to a general audience, in oral forms.
5. Graduates will be able to articulate arguments or explanations to both a disciplinary or professional audience and to a general audience, in written forms.
6. Graduates will be able to evidence scholarly and/or professional integrity in Earth & Atmospheric Sciences.

#### Elective Courses

Select 21 credits of the following:

- EAS 5110 Computing in Atmospheric Science
- EAS 5270 Meteorology of Severe storms
- EAS 5340 Cloud Physics
- EAS 5380 Stat Methods in Meteorology
- EAS 5560 Principles of Radiative Transference
- EAS 5600 Atmospheric Chemistry
- EAS 5650 Radar Meteorology
- EAS 5700 Convection in the Atmosphere
- EAS 5981 Independent Study
- EAS 5930 Special Topics
- EAS 5970 Research Topics
- EAS 5990 Graduate Reading Course
- EAS 6480 Gen Circulation of Atmosphere
- GIS 5010 Introduction to Geographic Information Systems

### Thesis Research

</tbody>
</table>

Total Credits: 30

### Non-Course Requirements

Qualifying exam

### Continuation Standards

Students must maintain a cumulative grade point average (GPA) of 3.00 in all graduate/professional courses.

### Roadmap

Roadmaps are recommended semester-by-semester plans of study for programs and assume full-time enrollment unless otherwise noted.

Courses and milestones designated as critical (marked with !) must be completed in the semester listed to ensure a timely graduation. Transfer credit may change the roadmap.

This roadmap should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor/mentor each semester. Requirements, course availability and sequencing are subject to change.

#### Year Two

**Fall**

- MS qualifying exam (Early semester)
- EAS 5990 Thesis Research | 3 |
- One graduate course | 2 |
- EAS 5300 Seminar in Atmospheric Science (when offered) | 1 |

**Spring**

- EAS 5990 Thesis Research | 3 |

**Summer**

- EAS 5990 Thesis Research | 0 |

Total Credits: 30

### Program Notes

Requirements for M.S. degree include 24 credits, including required 3 credits of EAS 5300 Seminar in Atmospheric Science (0-1 cr)/EAS 5330 Communicating in Research (2 cr) combination, 6 credits of thesis research, and M.S. qualifying exam.
