

PHILOSOPHY AND BIOETHICS, PH.D.

Saint Louis University students interested in both bioethics and philosophy that wish to write a dissertation on bioethics from a philosophical perspective should consider the joint Ph.D. in Philosophy and Bioethics, offered by the Gnaegi Center for Health Care Ethics (<https://www.slu.edu/arts-and-sciences/bioethics/>) and the Department of Philosophy (<https://www.slu.edu/arts-and-sciences/philosophy/>). Unlike a dual degree, this program offers one degree: a Ph.D. in Philosophy and Bioethics.

Curriculum Overview

The degree consists of 66 credits: 24 credits in health care ethics, 30 credits in philosophy and 12 dissertation research hours. Pre-comprehensive exam coursework can usually be completed in three years (nine credit hours each fall and spring). Non-coursework requirements include three research tools requirements in Library Database Skills, Medical Terminology, Statistics and Study Design and written and oral comprehensive exams.

Fieldwork and Research Opportunities

All joint Ph.D. students take a three-semester, 150-hour clinical practicum to gain experience working in a clinical setting. In addition to these fieldwork opportunities, most Ph.D. students graduate with two or more publications.

Careers

Graduates of this program are highly qualified candidates for academic jobs in philosophy departments or bioethics centers, as well as administrative jobs in ethics in health care institutions.

Admission Requirements

- Transcripts
- Three letters of recommendation
- GRE scores
- CV/Resume
- Writing sample
- Professional goals statement

Tuition

Tuition	Cost Per Credit
Graduate Tuition	\$1,310

Additional charges may apply. Other resources are listed below:

Learning Outcomes

- Graduates will be able to demonstrate in-depth knowledge of foundational philosophical theories and methodologies, historical and contemporary, that inform scholarly analysis of issues in bioethics.
- Graduates will be able to demonstrate a proficiency in formulating original normative philosophical arguments.
- Graduates will be able to demonstrate a proficiency in combining philosophical theories, concepts or methodologies with those of other disciplines in order to address practical ethical issues that arise in health care contexts.
- Graduates will be able to demonstrate the ability to conceptualize, develop and bring to successful completion an original, sustained and coherent independent research project that contributes to both the fields of philosophy and bioethics.

or PHIL 6990	Dissertation Research	
Total Credits		66

Other Content

Continuation Standards

Students must maintain a cumulative grade point average (GPA) of 3.50 in all graduate/professional courses.

Roadmap

Roadmaps are recommended semester-by-semester plans of study for programs and assume full-time enrollment unless otherwise noted.

Courses and milestones designated as critical (marked with !) must be completed in the semester listed to ensure a timely graduation. Transfer credit may change the roadmap.

This roadmap should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor/mentor each semester. Requirements, course availability and sequencing are subject to change.
