MATHEMATICS, B.S. TO M.S. ACCELERATED PROGRAM

The Mathematics studies accelerated bachelor's/master's program at Saint Louis University offers outstanding mathematics studies majors the opportunity to begin an M.A. program in their senior year, completing the M.A. with a full-time fifth year of graduate study after their successful completion of both the first-year requirements and their undergraduate degree and major.

For additional information see the catalog entries for the following programs:

Mathematics, B.S.
Mathematics, M.A.

Requirements

Students wishing to apply to this ABM program should already have completed all 2000-level coursework required in mathematics for the BS in mathematics, have completed at least 75 hours at the time of application, and have completed MATH 3120 Introduction to Linear Algebra (3 cr). They must have a cumulative GPA of 3.00 or higher in their mathematics coursework and their overall SLU transcript, and they must have received a B or higher in both MATH 2660 and MATH 3120. To apply, students must submit a personal statement and arrange for two letters of recommendation from mathematics faculty members.

Continuation Standards

Students’ continuation in the accelerated program will be monitored by the director of graduate studies, who will also serve as their academic advisor for the graduate portion of the program. Students will meet each semester, starting in Fall of Year 4, with the graduate advisor to discuss progress.

Continuation in the ABM program requires the following cumulative GPA requirements:

- 3.0 GPA on the overall SLU transcript
- 3.00 GPA in all MATH and STAT courses
- 3.00 GPA in all courses counting towards the mathematics MA

If a student falls below the GPA requirement in any one area, they are on probation and need to bring the GPA back above 3.00 in the next semester or they will not be allowed to continue in the program.

Roadmap

Roadmaps are recommended semester-by-semester plans of study for programs and assume full-time enrollment unless otherwise noted.

Courses and milestones designated as critical (marked with !) must be completed in the semester listed to ensure a timely graduation. Transfer credit may change the roadmap.

This roadmap should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor/mentor each semester. Requirements, course availability and sequencing are subject to change.

Course | Title | Credits
--- | --- | ---
Year One Fall
MATH 1510 | Calculus I | 4
UNIV 1010 | Enhancing First-Year Success | 1
University Core and/or General Electives | 8
Credits | 13
Spring
MATH 1520 | Calculus II | 4
Programming Course | 3-4
University Core and/or General Electives | 9
Credits | 16-17

Year Two Fall
MATH 2530 | Calculus III | 4
MATH 2660 | Principles of Mathematics | 3
University Core and/or General Electives | 9
Credits | 16
Spring
MATH 3120 | Introduction to Linear Algebra | 3
STAT 3850 | Foundation of Statistics | 3
University Core and/or General Electives | 9
Credits | 15

Year Three Fall
MATH 4110 | Introduction to Abstract Algebra | 3
Mathematics or Statistics Elective | 3
University Core and/or General Electives | 9
Credits | 15
Spring
Pure Mathematics Elective | 3
Mathematics or Statistics Elective | 3
University Core and/or General Electives | 9
Credits | 15

Year Four Fall
MATH 5011 | Introduction to Abstract Algebra | 3
MATH 5021 | Introduction to Analysis | 3
University Core and/or General Electives | 6
Credits | 12
Spring
MATH 5012 | Linear Algebra or Number Theory | 3
MATH 5022 | Metric Spaces or Multivariable Analysis | 3
Core: Social Science | 3
University Core and/or General Electives | 6
Credits | 15

Year Five Fall
MATH 5110 | Algebra I | 3
MATH 5210 | Real Analysis | 3
MATH 5310  General Topology I  3
Credits  9

Spring
MATH 5120  Algebra II  3
MATH 5220  Complex Analysis
or MATH 5230  Functional Analysis
or MATH 5240  Harmonic Analysis  3
MATH 5320  General Topology II  3
Credits  9

Total Credits  135-136

See note below about the programming requirement.

See note below about mathematics and statistics electives.

See note below about the pure mathematics sequence requirement.

See note below about mathematics and statistics sequences.

See note below about allied electives.

Program Notes

Programming Requirement
CSCI 1060 Introduction to Computer Science: Scientific Programming (3 cr) or CSCI 1300 Introduction to Object-Oriented Programming (4 cr) (with attention paid to prerequisites).

Mathematics and Statistics Elective
Any 3000- or 4000-level MATH or STAT course numbered higher than MATH 3120 Introduction to Linear Algebra (3 cr).

Pure Mathematics Sequence
Students can satisfy the pure mathematics sequence requirement by completing either the algebra sequence or real analysis sequence, as defined below.

Mathematics and Statistics Sequences
Students must complete a second sequence in addition to the pure mathematics sequence, chosen from the following list.

1. **Algebra Sequence**: MATH 4110 Introduction to Abstract Algebra (3 cr) and either MATH 4120 Linear Algebra (3 cr) or MATH 4150 Number Theory (3 cr).
2. **Complex Analysis Sequence**: MATH 4310 Introduction to Complex Variables (3 cr) and either MATH 4320 Complex Variables II (3 cr) or MATH 4360 Geometric Topology (3 cr).
3. **Differential Equations Sequence**: MATH 3550 Differential Equations (3 cr) and either MATH 4550 Nonlinear Dynamics and Chaos (3 cr) or MATH 4570 Partial Differential Equations (3 cr).
4. **Real Analysis Sequence**: MATH 4210 Introduction to Analysis (3 cr) and one of either MATH 4220 Metric Spaces (3 cr) or MATH 4230 Multivariable Analysis (3 cr).
5. **Statistics Sequence**: STAT 3850 Foundation of Statistics (3 cr) and one of: MATH 4800 Probability Theory (3 cr), STAT 4840 Time Series (3 cr), or STAT 4870 Applied Regression (3 cr).

Allied Elective
A course in another discipline that has a strong mathematical or computational component. Appropriate courses are available in computer science, economics, physics and other science and engineering disciplines. This course cannot be used to satisfy any of the other requirements for a B.S. degree. See the Course Catalog for a list and description of acceptable courses.
