Nine credits of these topics courses must be relevant to an Area of Competence (AOC).

* This course, which examines the metatheory of propositional and predicate logic, must be passed with a grade of "B" or higher, and ordinarily is to be taken during the first year of graduate studies. Students who have taken a similar course prior to entering the program may have this requirement waived by the chair of the department, in consultation with the chairs of the department's graduate admissions committee and graduate logic committee. Alternatively, students may take an exam covering the material of the Advanced Symbolic Logic course. The course requirement would then be waived if the student achieved a grade of "B" or higher on the exam. Students who have this requirement waived will then choose an additional course as an elective.

Non-Course Requirements

- The dissertation prospectus, to be completed by the end of the sixth semester of study.
- A two-hour oral examination on the dissertation prospectus covering: during which any aspect of the written prospectus may be discussed and questioned.
- Proficiency in a foreign language, if required for research.

Continuation Standards

Students must maintain a cumulative grade point average (GPA) of 3.00 in all graduate/professional courses.

Roadmap

Roadmaps are recommended semester-by-semester plans of study for programs and assume full-time enrollment unless otherwise noted.

Courses and milestones designated as critical (marked with !) must be completed in the semester listed to ensure a timely graduation. Transfer credit may change the roadmap.

This roadmap should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor/mentor each semester. Requirements, course availability and sequencing are subject to change.
