

PSYCHOLOGY, MINOR

Saint Louis University's minor in psychology enriches students' academic experiences with the science behind human behavior. Coursework highlights how our behaviors depend on biological factors, developmental status, cognitive processes and social conditions.

Exposure to psychological science in the minor enhances students' abilities to critically evaluate behavioral science and understand human behaviors and interactions encountered in their professional and personal lives. A minor in psychology complements all major programs due to the relevance of understanding human behavior in all fields. Its application is most apparent within fields related to human behaviors, such as:

- Business
- Communication
- Education
- Health care
- Law
- Public health
- Political science
- Social work and other fields involving the delivery of human services
- Sociology and areas of studies associated with social and cultural identities

Program Highlights

- Courses delivered through SLU's minor in psychology program are taught by recognized experts and researchers in the field.
- Students pursuing a minor in psychology at SLU experience a flexible curriculum. Aside from the general psychology requirement, students are free to choose from a menu of courses under four areas of breadth, as well as an additional advanced elective option, allowing for a curriculum tailored to their individual interests.
- To help optimize their experiences, all SLU psychology minors are assigned a faculty mentor.

Requirements

Code	Title	Credits
Required Courses		
PSY 1010	General Psychology	3
Required Breadth Courses		
Select a minimum of one course in each of the four areas below:		12
<i>Cognitive Neuroscience</i>		
Select 3 credit hours with the "PSY Cog Neuro Cluster" attribute, such as:
