

FINANCE, MINOR

Finance plays a critical role in any organization and many careers. Adding a finance minor to any other business major, or even non-business major, at Saint Louis University provides students the opportunity to expand their skills in an in-demand field.

Entry-level finance jobs pay some of the highest salaries in business and provide for greater job mobility. Finance skills are beneficial in a range of job functions and become more critical as professionals advance their careers into management roles. Skills gained through finance courses are also valuable in preparing for admissions tests for, and applying to, graduate schools for an MBA degree.
