SUPPLY CHAIN MANAGEMENT, M.S.

Through Saint Louis University’s Master of Science in Supply Chain Management (M.S.-SCM), students learn the key business processes that drive profitable business growth, positioning them to hold a sustainable competitive advantage in the business world.

SLU’s Chaifetz School ranks No. 13 in the nation for graduate study in supply chain management according to U.S. News & World Report’s 2021 Best Graduate Schools rankings. The STEM-certified M.S.-SCM program teaches students how to use quantitative and computer models to provide and distribute the right quantities of the right goods or services to the right location at the right time.

Curriculum Overview

The supply chain management profession addresses the critical link between demand creation and the fulfillment of demand. Supply chain management professionals participate in fundamental decisions associated with current and future business success, addressing product design, sourcing, transportation, storage, e-commerce and delivery of the final goods to the customers. Information technology plays an important role in making transactions efficient (cost saving) and effective (meeting customer’s needs). The global nature of the supply chain industry makes this discipline exciting and rewarding.

Students in Saint Louis University’s Master of Science in Supply Chain Management program will also gain additional exposure to the design, implementation and management of efficient ways to integrate the flow of materials and information among suppliers, manufacturers, warehouses and stores. The curriculum focuses on the theoretical as well as the applied supply chain and logistics skills that are essential in today’s competitive global supply chain environment. Students learn operations management, logistics, information technologies, finance, Lean/Six Sigma, ERP project management and simulation to deliver the analytical skills employed in the public and private sectors.

Careers

Graduate business students have access to the Valerie A. Davissson Career Resources Center (https://www.slu.edu/business/career-resources-center/), conveniently located within the Chaifetz School of Business, which serves as the catalyst for creating meaningful connections and developing outstanding internships and employment opportunities and providing other valuable career management services.

A Master of Science in Supply Chain Management prepares students to play an important role in the current and future success of businesses. Supply chain professionals make “go/no-go” decisions regarding which goods or services to provide, which suppliers to work with, and how to access and excite prospective customers. Recent graduates of the program are now working in roles, including supply chain analyst, buyer, e-commerce analyst, supply chain manager, procurement analyst, sourcing manager, logistics analyst, project manager and process engineer.

The M.S.-SCM program at SLU is STEM-certified, allowing F1 students graduating from our program to apply for an OPT extension.

Admission Requirements

• Completed online application (https://www.applyweb.slugrad/)
• Official transcript(s)
• Two letters of recommendation
• Résumé
• Professional goal statement of fewer than 500 words

Applications are reviewed on a rolling basis once all application materials are received. Application files are reviewed holistically (undergraduate performance, internship or professional experience and professional goal statement). The average time for admissions decisions is two weeks.

Requirements for International Students

Applicants who are not U.S. citizens or permanent residents will also need to submit:

English Language Proficiency Scores: For non-native speakers of English, an official English Language test score report is also required and must be sent directly to the institution. Scores should be no more than two years old. This program requires a TOEFL score of 80 and an IELTS broadband of at least 6.5, or a Duolingo score of 110.

• The Graduate Programs Office reserves the right to evaluate an applicant’s English based on an admissions interview and/or an English language test. Based on the results from either or both, applicants may be referred to INTO SLU for additional coursework.

Official Academic Transcripts: An official transcript articulating both GPA and grades for all previous coursework is required and will be evaluated at the time of admission.

• The Graduate Programs Office reserves the right to request a WES or ECE evaluation.

Documentation of Financial Support: After an admission decision has been made and scholarship consideration has been assessed, students will need to complete an addendum form outlining certification of financial support for one year of study (if a student visa is required) submitted with the necessary documentation. Documentation will include:

• A letter (declaration) of financial support from the person(s) or sponsoring agency providing funds for your tuition and living expenses for the duration of your study at Saint Louis University.

• A letter (certification) from the sponsor’s bank verifying that such funds currently are available and will be so for each subsequent year of your study at this University. The financial evidence must cover at least the amount of expenses needed for the first year of your study.

Scholarships and Financial Aid

The Chaifetz School offers generous scholarships to make a graduate degree from our nationally ranked institution accessible. All applicants to the M.S. in Supply Chain Management program are automatically considered for scholarship awards at the time of admission. Learn more about M.S. in Supply Chain Management Scholarships. (https://www.slu.edu/business/graduate/supply-chain-management/funding-your-ms-scm.php)

For more information about student loans, please visit the student financial services office online at http://finaid.slu.edu.
Accreditation
The Richard A. Chaifetz School of Business is accredited by the Association to Advance Collegiate Schools of Business (AACSB), the world’s largest business education alliance and accrediting body of business schools, ensuring continuous quality improvement in terms of curriculum, instructional resources, student selection, career placement and intellectual contributions and qualifications of the faculty. Fewer than 5% of business schools worldwide have achieved AACSB accreditation.

Learning Outcomes
1. Graduates will be able to apply an integrated enterprise approach of flow of goods, services and information from suppliers to customers.
2. Graduates will be able to use quantitative techniques and computer models for analyzing and controlling manufacturing, inventory and operations management systems.
3. Graduates will be able to analyze supply chains using a business process approach.
4. Graduates will be able to apply analytical and computer models to facilitate logistics decisions.
5. Graduates will be able to use purchasing and strategic sourcing concepts to optimize supply chain operations.
6. Graduates will be able to apply the lean sigma approach to impose the quality of supply chain processes.
7. Graduates will be able to understand the current technological issues needed to manage the flow of information in supply chains.
8. Graduates will be able to collect, interpret, evaluate and analyze data relevant to supply chains.
9. Graduates will be able to apply quantitative and computer models needed to make effective supply chain management decisions.
