Overview

The programs in Educational Foundations provide an ideal environment for further learning for those who are interested in educational theory, history, and philosophy with a program designed to support critical inquiry into the nature of education. Students accepted into this special area typically study the disciplines of psychology, theory, history, philosophy, and sociology to analyze issues in education.

About the Faculty

Faculty members take a genuine interest in students, serve as strong role models of success and acquaint students with the challenges and joys of the profession. The faculty seek an appropriate balance between theory and practice, between action and reflection, and between intellect and affect.
