COMPUTER ENGINEERING, B.S.

Saint Louis University's Parks College of Engineering, Aviation and Technology offers a unique, hands-on undergraduate program culminating in a Bachelor of Science in computer engineering. The program provides a curriculum that incorporates analysis, design and development of computer systems containing hardware and software components.

The curriculum provides graduates with necessary skills for entry into the profession as productive and effective engineers or to pursue graduate education.

An additional feature of the program is that all students are exposed to entrepreneurship and the entrepreneurial mindset through the curriculum and extracurricular opportunities.

Additional program highlights include:

- The hands-on nature of the curriculum allows computer engineering students to apply theoretical concepts to practical applications. Students begin conducting experiments in labs during their freshman year.
- Students have the opportunity to work with faculty on research programs, enhancing their educational experience and preparing them for industry.
- Computer engineering students are given a well-rounded approach that teaches not only technical skills but the business side of engineering as well.

Curriculum Overview

The program coursework provides students with both breadth and depth in computer engineering. The program develops a student's ability to apply knowledge of mathematics, sciences and computer engineering to find solutions to practical problems. It ensures that graduates have an opportunity to work on multidisciplinary teams and develop effective communication skills.

In addition to a strong focus on computer skills and computer hardware and software, the program provides a broad design experience which is integrated throughout the program by introducing fundamental elements of the design process in coursework. The program also includes a two-semester design sequence to provide a meaningful and significant engineering design experience that focuses on and prepares students for professional practice.

Fieldwork and Research Opportunities

Benefits of the computer engineering program also include several internship, research and career opportunities. Students are encouraged and assisted in obtaining summer internships with local and global companies through career services.

Undergraduate research opportunities within the college are available during the summer or regular semesters. Undergraduate students are also encouraged to seek opportunities for research with faculty of the program or faculty in other programs.

Careers

As a computer engineer, there are a variety of career paths spanning industrial or consulting positions. Students are also prepared for graduate school and professional schools such as law, business administration or medicine.

Graduates have found employment at such companies as:

- Amazon
- AT&T
- Boeing
- Department of Defense
- Emerson Electric
- Garmin
- General Motors
- Intel
- Rockwell
- Samsung
- Texas Instruments
- U.S. Air Force

Admission Requirements

Freshman

All applications are thoroughly reviewed with the highest degree of individual care and consideration to all credentials that are submitted. Solid academic performance in college preparatory course work is a primary concern in reviewing a freshman applicant's file. College admission test scores (ACT or SAT) are used as an additional indicator of the student's ability to meet the academic rigors of Saint Louis University and are used as qualifiers for certain University scholarship programs. To be considered for admission to any Saint Louis University undergraduate program, the applicant must be graduating from an accredited high school or have an acceptable score on the General Education Development (GED) test.

Transfer

Applicants must be a graduate of an accredited high school or have an acceptable score on the GED. An official high school transcript and official test scores are required only of those students who have attempted fewer than 24 transferable semester credits (or 30 quarter credits) of college credit. Those having completed 24 or more of college credit need only submit a transcript from previously attended college(s). In reviewing a transfer applicant's file, the office of admission holistically examines the student's academic performance in college-level coursework as an indicator of the student's ability to meet the academic rigors of Saint Louis University.

International Applicants

All admission policies and requirements for domestic students apply to international students along with the following:

- Demonstrate English Language Proficiency (http://catalog.slu.edu/academic-policies/office-admission/undergraduate/english-language-proficiency)
- Proof of financial support must include:
  - A letter of financial support from the person(s) or sponsoring agency funding the time at Saint Louis University
• A letter from the sponsor’s bank verifying that the funds are available and will be so for the duration of study at the University
• Academic records, in English translation, of students who have undertaken postsecondary studies outside the United States must include the courses taken and/or lectures attended, practical laboratory work, the maximum and minimum grades attainable, the grades earned or the results of all end-of-term examinations, and any honors or degrees received. WES and ECE transcripts are accepted.

Additional Admission Requirements
In addition to the general admission and matriculation requirements of the University, Parks College engineering programs have the following additional requirements:

• GPA: Minimum cumulative 3.00 high school GPA for freshmen applicants and 2.70 college GPA for transfer applicants.
• ACT/SAT: ACT composite score of 24 or higher, or SAT composite score of 1160 or higher. ACT sub scores minimums of 22 in English, 24 in Mathematics, 22 in Reading Comprehension and 22 in Scientific Reasoning, or SAT Math sub score of 620.
• Coursework: Fifteen total units of high school work are required: three or four units of English; four or more units of mathematics including algebra I and II, geometry and precalculus (Algebra II with Trigonometry is not sufficient). Students should be prepared to start the first semester freshmen year in Calculus I or higher; three or four units of science including general science, introduction to physical science, earth science, biology, physics or chemistry; two or three units of social sciences including history, psychology or sociology; and three units of electives.

Admission requirements to Parks College of Engineering, Aviation and Technology degree programs are based on a combination of secondary school grades, college admission test scores, co-curricular activities and attempted college course work, as well as other indicators of the applicant’s ability, career focus and character. This process respects the non-discrimination policy of the University and is designed to select a qualified, competent and diverse student body with high standards of scholarship and character, consistent with the mission of the University.

Scholarships and Financial Aid
There are two principal ways to help finance a Saint Louis University education:

• Scholarships: awarded based on academic achievement, service, leadership and financial need.
• Financial Aid: provided in the form of grants and loans, some of which require repayment.

For priority consideration for merit-based scholarships, applicants should apply for admission by Dec. 1 and complete a Free Application for Federal Student Aid (FAFSA) by March 1.

For information on other scholarships and financial aid, visit the student financial services office online at http://finaid.slu.edu.

Accreditation

Enrollment and graduation data for computer engineering is listed here (https://www.slu.edu/parks/pdfs/computer-engineering-enrollment-and-graduation-data.pdf)

Learning Outcomes
The undergraduate computer engineering program is accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org).

Program Educational Objectives
The undergraduate program is designed to meet the following specific objectives in order to fulfill the departmental and institutional missions.

• Our graduates will have acquired advanced degrees or are engaged in advanced study in engineering, business, law, medicine or other appropriate fields.
• Our graduates will have established themselves as practicing engineers in electrical, computer or related engineering fields.
• Our graduates will be filling the technical needs of society by solving engineering problems using electrical or computer engineering principles, tools, and practices.

Student Outcomes
Student outcomes are defined by ABET as the skills that graduates will attain at the time of graduation. Student outcomes are listed below:

a. an ability to apply knowledge of mathematics, science, and engineering;
• b. an ability to design and conduct experiments, as well as to analyze and interpret data;
• c. an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
• d. an ability to function on multi-disciplinary teams;
• e. an ability to identify, formulate, and solve engineering problems;
• f. an understanding of professional and ethical responsibility;
• g. an ability to communicate effectively;
• h. the broad education necessary to understand the impact of engineering solutions in a global and societal context;
• i. a recognition of the need for, and an ability to engage in life-long learning;
• j. a knowledge of contemporary issues;
• k. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

### Saint Louis University Academic Catalog 2018-2019

**MATH 2530**  
Calculus III  
4 credits

**MATH 3110**  
Linear Algebra for Engineers  
3 credits

**MATH 3550**  
Differential Equations  
3 credits

**ECE 3052**  
Probability and Random Variables for Engineers  
3 credits

### Written and Oral Communication

**ENGL 1920**  
Advanced Writing for Professionals  
3 credits

### Computer Science

**CSCI 1300**  
Introduction to Object-Oriented Programming  
4 credits

**CSCI 2100**  
Data Structures  
4 credits

**CSCI 2300**  
Object-Oriented Software Design  
3 credits

**CSCI 3500**  
Operating Systems  
3 credits

### Liberal Arts Requirements

**PHIL 3400**  
Ethics & Engineering  
3 credits

**THEO 1000**  
Theological Foundations  
3 credits

**Cultural Diversity**  
3 credits

**Humanities**  
3 credits

**Social & Behavioral Science**  
3 credits

### Computer Engineering Core

**ECE 1001**  
Introduction to Electrical and Computer Engineering  
1 credit

**ECE 1002**  
Introduction to ECE II  
1 credit

**ECE 2101**  
Electrical Circuits I  
3 credits

**ECE 2102**  
Electrical Circuits II  
3 credits

**ECE 2103**  
Electrical Circuits Lab  
1 credit

**ECE 2205**  
Digital Design  
4 credits

& ECE 2206  
and Digital Design Lab

**ECE 3205**  
Advanced Digital Design  
3 credits

& ECE 3216  
and Computer Systems Design Lab

**ECE 3217**  
Computer Architecture and Organization  
3 credits

& ECE 3225  
and Microprocessors

& ECE 3226  
and Microprocessors Laboratory

**ECE 3130**  
Semiconductor Devices  
3 credits

**ECE 3140**  
Electronic Circuit Design  
4 credits

& ECE 3132  
and Electronic Circuit Design Lab

**ECE 3150**  
Linear Systems  
4 credits

& ECE 3151  
and Linear Systems Lab

**ECE 3090**  
Junior Design  
1 credit

**ECE 4245**  
Computer Networks Design  
3 credits

**ECE 4800**  
ECE Design I  
3 credits

**ECE 4810**  
ECE Design II  
3 credits

### ECE or CSCI Electives

Students are required to take six (6) credits from an approved list and as offered. A partial list is given below. Please check with the program for a complete list of approved electives. Electives cannot be used to satisfy other curriculum requirements.

**ECE 3110**  
Electric Energy Conversion

**ECE 3140**  
Electromagnetic Fields

**ECE 4225**  
Hardware/Software Co-Design

**ECE 4226**  
Mobile Robotics

**ECE 4235**  
Digital IC Design

**ECE 4151**  
Digital Signal Processing

**CSCI 3100**  
Algorithms

**CSCI 3200**  
Programming Languages

**CSCI 3320**  
Computer Graphics I

**CSCI 3710**  
Databases

**CSCI 3200**  
Programming Languages

**CSCI 4550**  
Advanced Operating Systems

**CSCI 3760**  
Artificial Intelligence

### Technical Elective

Select one 3-credit course  
3 credits

### Internship and Co-op

Although not required, students can elect to participate in an internship or cooperative experience before graduation.

Select from the following:  
0 credits

**ECE 2910**  
Co-op in ECE

**ECE 3910**  
Co-op with Industry

**ECE 4910**  
Co-Op with Industry

**ECE 2915**  
Internship with Industry

**ECE 3915**  
Internship with Industry

**ECE 4915**  
Internship with Industry

**Total Credits**  
125

1 Cultural Diversity, Humanities, Social and Behavioral Science must be selected from an approved list.

2 One 3 credit course selected from an approved list in science, mathematics, or engineering, at the 2000-level or higher, or Computer Science at 3000 or higher.

### Continuation Standards

Students must maintain a minimum 2.00 GPA.

### Roadmap

Roadmaps are recommended semester-by-semester plans of study for programs and assume full-time enrollment unless otherwise noted.

Courses and milestones designated as critical (marked with !) must be completed in the semester listed to ensure a timely graduation. Transfer credit may change the roadmap.

This roadmap should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor/mentor each semester. Requirements, course availability and sequencing are subject to change.
