MECHANICAL ENGINEERING, B.S.

At Saint Louis University’s Parks College of Engineering, Aviation and Technology, we have developed an innovative mechanical engineering curriculum that provides hands-on experiences complementing theoretical knowledge. Our students work with fluids, thermal, material, structural testing, mechatronics and robotics equipment, which provides an excellent opportunity to integrate theory with real-world applications.

Most mechanical engineering programs provide research and project opportunities, but our first-year students actively participate: turning wrenches, running experiments, analyzing and publishing their work. They don’t have to wait until their junior year to get near the equipment, and they don’t have to wait until their senior year to be in positions of leadership.

With easy access to a sophisticated computer-aided design laboratory, a structures laboratory and more, our graduates gain invaluable experience that helps launch their career and set them on a trajectory to shape our world and beyond.

Curriculum Overview

Students of the mechanical engineering program at Parks College will gain a solid foundation in the fundamental engineering sciences before progressing towards traditional mechanical engineering courses. The program offers technical electives in broader areas of structures, thermal fluids, and design engineering to provide opportunities for students to gain a greater depth of understanding.

These engineering fundamentals and mechanical topics are then integrated into a sequence of two capstone design courses during senior year that provide greater depth in design. Students will learn the importance of design decisions not only on product design but on society as a whole. Well-equipped laboratory facilities emphasize measurement techniques and experimental methods that allow the student to verify the theory learned in the classroom.

The curriculum is designed to prepare students for professional careers in several fields of mechanical engineering involving product development and manufacturing. The curriculum also provides excellent preparation for graduate studies.

Fieldwork and Research Opportunities

Benefits of the mechanical engineering program also include several internship and career opportunities. Summer internships and cooperative education programs are available with industry in the St. Louis region as well as nationwide.

Funded undergraduate and graduate research opportunities are available with faculty members of the program. Funded research grants ranging from private industries to federal government research laboratories are available for qualified students.

Careers

Industry and government agencies have long recognized the quality of mechanical engineering graduates from Saint Louis University’s Parks College. Successful alumni have found employment at corporations and government agencies such as:

- Boeing
- General Dynamics
- General Electric
- NASA
- Nooter/Eriksen
- Textron Systems
- SpaceX

Admission Requirements

Freshman

Begin your application for this program at www.slu.edu/apply (http://www.slu.edu/apply.php). Saint Louis University also accepts the Common App.

All applications are thoroughly reviewed with the highest degree of individual care and consideration to all credentials that are submitted. Solid academic performance in college preparatory course work is a primary concern in reviewing a freshman applicant’s file. College admission test scores (ACT or SAT) are used as an additional indicator of the student’s ability to meet the academic rigors of Saint Louis University and are used as qualifiers for certain University scholarship programs. To be considered for admission to any Saint Louis University undergraduate program, the applicant must be graduating from an accredited high school or have an acceptable score on the General Education Development (GED) test.

Begin Your Application (http://www.slu.edu/apply.php)

Transfer

Begin your application for this program at www.slu.edu/apply (http://www.slu.edu/apply.php).

Applicants must be a graduate of an accredited high school or have an acceptable score on the GED. An official high school transcript and official test scores are required only of those students who have attempted fewer than 24 transferable semester credits (or 30 quarter credits) of college credit. Those having completed 24 or more of college credit need only submit a transcript from previously attended college(s). In reviewing a transfer applicant’s file, the office of admission holistically examines the student’s academic performance in college-level coursework as an indicator of the student’s ability to meet the academic rigors of Saint Louis University.

International Applicants

Begin your application for this program at www.slu.edu/apply (http://www.slu.edu/apply.php).

All admission policies and requirements for domestic students apply to international students along with the following:

- Demonstrate English Language Proficiency (http://catalog.slu.edu/academic-policies/office-admission/undergraduate/english-language-proficiency/)
- Proof of financial support must include:
  - A letter of financial support from the person(s) or sponsoring agency funding the time at Saint Louis University
  - A letter from the sponsor’s bank verifying that the funds are available and will be so for the duration of study at the University
- Academic records, in English translation, of students who have undertaken postsecondary studies outside the United States must
include the courses taken and/or lectures attended, practical laboratory work, the maximum and minimum grades attainable, the grades earned or the results of all end-of-term examinations, and any honors or degrees received. WES and ECE transcripts are accepted.

**Additional Admission Requirements**

In addition to the general admission and matriculation requirements of the University, Parks College engineering programs have the following additional requirements:

- **GPA:** Minimum cumulative 3.00 high school GPA for freshmen applicants and 2.70 college GPA for transfer applicants.
- **ACT/SAT:** ACT composite score of 24 or higher, or SAT composite score of 1160 or higher. ACT sub scores minimums of 22 in English, 24 in Mathematics, 22 in Reading Comprehension and 22 in Scientific Reasoning, or SAT Math sub score of 620.
- **Coursework:** Fifteen total units of high school work are required: three or four units of English; four or more units of mathematics including algebra I and II, geometry and precalculus (Algebra II with Trigonometry is not sufficient). Students should be prepared to start the first semester freshmen year in Calculus I or higher; three or four units of science including general science, introduction to physical science, earth science, biology, physics or chemistry; two or three units of social sciences including history, psychology or sociology; and three units of electives.

Admission requirements to Parks College of Engineering, Aviation and Technology degree programs are based on a combination of secondary school grades, college admission test scores, co-curricular activities and attempted college course work, as well as other indicators of the applicant’s ability, career focus and character. This process respects the non-discrimination policy of the University and is designed to select a qualified, competent and diverse student body with high standards of scholarship and character, consistent with the mission of the University.

**Scholarships and Financial Aid**

There are two principal ways to help finance a Saint Louis University education:

- **Scholarships:** Awarded based on academic achievement, service, leadership and financial need.
- **Financial Aid:** Provided in the form of grants and loans, some of which require repayment.

For priority consideration for merit-based scholarships, apply for admission by Dec. 1 and complete a Free Application for Federal Student Aid (FAFSA) by March 1.

For information on other scholarships and financial aid, visit the student financial services office online at [https://www.slu.edu/financial-aid/](https://www.slu.edu/financial-aid/).

**Accreditation**

The aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, engineering physics and mechanical engineering undergraduate curricula are accredited by the Engineering Accreditation Commission of ABET, [www.abet.org](http://www.abet.org).

Enrollment and graduation data for mechanical engineering is listed here ([https://www.slu.edu/parks/pdfs/2018-mechanical-engineering-enrollment-and-graduation-data.pdf](https://www.slu.edu/parks/pdfs/2018-mechanical-engineering-enrollment-and-graduation-data.pdf)).

**Learning Outcomes**

The undergraduate mechanical engineering program is accredited by the Engineering Accreditation Commission of ABET ([http://www.abet.org](http://www.abet.org)).

**Program Educational Objectives**

The undergraduate program is designed to meet the following specific objectives in order to fulfill the departmental and institutional missions.

- To practice the principles of engineering in mechanical or allied organizations
- To pursue further learning in mechanical engineering or in allied disciplines
- To function as effective engineers with professional knowledge, skills and values

**Student Outcomes**

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, economic, and environmental factors
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Technical Electives

Select six credits from an approved AE/ME list each semester. 1

Basic Science & Mathematics

CHEM 1110 General Chemistry 1 4

& CHEM 1115 and General Chemistry 1 Laboratory 3

PHYS 1610 Engineering Physics I 4

& PHYS 1620 and Engineering Physics I Laboratory 3

PHYS 1630 Engineering Physics II 4

& PHYS 1640 and Engineering Physics II Laboratory 3

MATH 1510 Calculus I 4

MATH 1520 Calculus II 4

MATH 2530 Calculus III 4

MATH 3550 Differential Equations 3

MATH 3270 Advanced Mathematics for Engineers 3

Math/Science Electives

Select one 3-credit course from the AE/ME Department approved list. 3

Written and Oral Communication

ENGL 1920 Advanced Writing for Professionals 3

Liberal Arts

THEO 1000 Theological Foundations 3

PHIL 3400 Ethics & Engineering 3

Cultural Diversity 2

Humanistic Values Elective 3

Total Credits 124

1 Technical electives provide an opportunity to expand the horizon of each student's program major or in areas related to program major. Students are encouraged to take courses at 4000-level in the area of program major or a 3000-level or above in allied disciplines. Allied disciplines include courses in engineering other than student's major, Mathematics – MATH, Computer Science – CSCI, Management – MGT, Pre-Law – PLS, Physics – PHYS, Chemistry – CHEM and Biology – BIOL. The student may also do a project or research independent study with a faculty member and it is considered as equivalent to technical elective. The courses or independent study in these areas should be beyond the required courses within the curriculum.

2 Cultural Diversity elective courses must be selected from an approved Arts & Sciences list. See the description of the Parks College core for more information.

3 Humanistic Values courses shall be chosen from: Humanities or Social & Behavioral Sciences.

Humanities courses include Fine Arts (excludes applied, studio, and performance courses), Literature (ENGL2000-ENGL 2600 Introduction to Short Fiction (3 cr), ENGL3000-ENGL3950, ENGL 4100 History of the English Language (3 cr), History, American Studies and Foreign Languages (excludes English or native language), Philosophy or Theology.

Social & Behavioral Sciences courses include Anthropology, Communication, Communication Sciences and Disorders, Criminology and Criminal Justice, Economics, Education, Political Science, Psychology, Sociology, Social Work or Public Health.

Continuation Standards

Students must maintain a minimum 2.00 GPA.

Roadmap

Roadmaps are recommended semester-by-semester plans of study for programs and assume full-time enrollment unless otherwise noted.

Courses and milestones designated as critical (marked with !) must be completed in the semester listed to ensure a timely graduation. Transfer credit may change the roadmap.

This roadmap should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor/mentor each semester. Requirements, course availability and sequencing are subject to change.
