Overview

The Clinical Health Sciences (CHS) department at Saint Louis University includes a dynamic, diverse collection of programs ranging across the baccalaureate, master’s and certificate levels. The degree programs within the CHS department prepare students to pursue a career in health care after the completion of their undergraduate study. However, with numerous pre-professional tracks available across all disciplines, CHS programs can also serve as a great first step on the path to an advanced degree in health care.

CHS students can expect to have the opportunity to take part in meaningful and in-depth research projects that will be suitable for publication in scientific journals and presentation to wider audiences. In addition, in their time at Saint Louis University, CHS students will be exposed to impactful practical and clinical experiences that, paired with their classroom experience, will leave students well-positioned for success on their respective discipline’s certification exam.
