HEALTH INFORMATION MANAGEMENT, MINOR

Saint Louis University's health information management minor is an introduction to the management of the important asset of health information and can complement the major of any student interested in health care. As health care becomes more information-intensive, the ability to manage and understand data will be an increasingly valuable skillset. Courses focus on the non-clinical side of health care; no patient care is involved.

Requirements

Students minoring in health information management at SLU will take the following courses.
