DEPARTMENT OF OCCUPATIONAL SCIENCE AND OCCUPATIONAL THERAPY

Saint Louis University's Department of Occupational Science and Occupational Therapy offers two degrees: a Bachelor of Science in Occupational Science (BSOS) and a Master of Occupational Therapy (MOT).

Leadership
Wendy Stav, Ph.D., OTR/L, FAOTA
Department Chair
Julia Henderson-Kalb, OTD, OTR/L
Program Director

Overview
Occupational science is the study of the forms and meaning of human activity, and how everyday activities influence an individual's sense of identity and roles within families and communities. Occupational therapy is a health profession that employs daily activities in the service of helping people to live healthy and satisfying lives. Services are provided to individuals who are at risk, or who have disabling conditions or life circumstances that prevent full participation in the roles and activities that are valued.

Students in Saint Louis University's occupational science and occupational therapy master's program apply their occupational science knowledge to supporting the health and quality of life of individuals throughout the lifespan, including those with disabilities and chronic illness.

Students have guaranteed entry into the graduate-level master's program if all undergraduate program requirements are successfully completed. The combined BSOS and MOT program is five years of study.

Qualified post-baccalaureate students with degrees in other fields may apply to the MOT program for an additional two years of study (including one summer semester).
