**HEALTH OUTCOMES RESEARCH, PH.D. & MEDICINE, M.D. DUAL DEGREE**

One of the few universities to offer such a degree, Saint Louis University's M.D./Ph.D. in health outcomes research dual degree program prepares students to be excellent doctors and clinical researchers.

A student with a Ph.D. in health outcomes research in addition to an M.D. will have a competitive edge when applying for residency and will be able to start a strong research career in medicine before they complete their M.D. Guided by outcomes research faculty with expertise in multiple areas of medicine, graduates leave prepared to provide excellent medical care and to evaluate patient outcomes and preferences, compare the effectiveness of treatments and establish evidence to improve the final stages of care.

**Scholarships and Financial Aid**

For priority consideration for graduate assistantship, apply by Feb. 1.

For more information, visit the student financial services office online at http://finaid.slu.edu.

**Admission**

Students must first be admitted to the School of Medicine to be considered for acceptance into the M.D./Ph.D. in health outcomes research program. Consideration for the program is available to all interested applicants to the School of Medicine with preliminary application provided upon request.

Most trainees are chosen in the early spring in order to begin their research training by mid-June before commencing their first year of M.D. studies in mid-August. Other qualified individuals may apply after beginning their M.D. training.

Applicants to the M.D./Ph.D. program are screened by the steering committee for the M.D./Ph.D. program.

**Requirements**

Students begin their program by completing the first and second years of their M.D. studies. By the winter of their second year of medicine studies, students will select a Ph.D. mentor from SLU's Department of Health and Clinical Outcomes Research.

Completion of all Ph.D. candidacy requirements and oral defense of the doctoral dissertation are followed by a transitional clerkship that facilitates re-entry into the third and fourth year of M.D. studies.

Nine credits from the M.D. program will count towards completion of the Ph.D. in health outcomes research.

Trainees in this program should complete all requirements for both degrees within seven to eight years and students are expected to complete both the M.D. and Ph.D. components on a full-time basis.

**Continuation Standards**

Students must maintain a cumulative grade point average (GPA) of 3.00 in all graduate/professional courses.
