BACHELOR'S TO APPLIED ARTIFICIAL INTELLIGENCE AND DECISION ANALYTICS, M.S. ACCELERATED PROGRAM

Saint Louis University's accelerated bachelor's-to-master's program in applied artificial intelligence and decision analytics is designed for working professionals pursuing any School for Professional Studies bachelor's degree who have an interest in pursuing a Master of Science in Applied Artificial Intelligence and Decision Analytics once they complete their undergraduate program.

This accelerated program allows undergraduate students to complete up to 12 graduate-level credits and have these credits count as undergraduate elective credits. Once the student is accepted into an SPS graduate program, these credits will count toward that graduate program's requirements.

As part of the School for Professional Studies, this 12-credit, fully online program offers technology-driven professionals like you a flexible option to meet your personal career goals. With six accelerated, eight-week terms each year offered by SLU online, you can begin working toward your degree at any time, making advanced education more accessible for working professionals.

Requirements

Admission Requirements

To participate in the bachelor's to master's accelerated program, students must be in good standing at Saint Louis University and possess at least a 3.00 overall GPA and a 3.50 GPA in their current major.

In addition:

- Students must meet all course prerequisites prior to enrolling in any graduate-level coursework.
- Students must petition, and be permitted by, the undergraduate program administrator and the respective School for Professional Studies program director to pursue the graduate-level coursework sought.

Program Requirements

Students must maintain a minimum 3.00 overall grade point average (GPA) and a 3.50 GPA in their major. Students can take up to 12 credits from the M.S. program that will count for University electives in their bachelor's program. The courses included are:

Undergraduate Program Requirement	Met by Graduate Course
12 credits of University Electives	AA 5000, AA 5221, AA 5011, and AA 5110

Students will not need to apply for admission to the graduate program to progress into the M.S., assuming they graduate from their undergraduate degree with a 3.50 overall GPA or above and have successfully obtained a "B" or better in each of the 12 credits of the accelerated sequence. Instead, students work with their academic coach to petition to matriculate into the graduate program.

The program director will review the materials and make a final decision. If students do not meet the 3.50 overall GPA requirement or fail to obtain a "B" or better in the bridge program courses, they may submit a full application for admission, which requires supplemental materials that may improve the probability of admission.
