COMPUTER INFORMATION SYSTEMS, MINOR

Saint Louis University's online computer information systems minor is a professional program that allows students to specialize in one of three tracks: data analytics, health care information systems or information security and assurance.

In this program, you will gain knowledge and skills that you can pair with your major to become a versatile, valuable leader in various industries. You may choose this 18-credit program as a minor combined with a major in pursuit of a bachelor's degree. You can also complete the degree entirely online and choose from six start terms per year.

Careers
Possible career options for students in this program include:

- Computer network architect
- Cybersecurity analyst
- Data analyst
- Information assurance engineer
- Market research analyst
- Web developer
