BIOSECURITY AND DISASTER PREPAREDNESS, POST-BACCALAUREATE CERTIFICATE

Training in biosecurity and disaster preparedness prepares you to help prevent biological terrorism and build effective rapid response capabilities for organizations throughout the public and private sectors.

Curriculum Overview
The certificate is a completely online program.

Careers
Driven by globalization, emerging infectious diseases, the threat of terrorism and more, the field of biosecurity is rapidly expanding. You will be able to work in the military, law enforcement, public health and state and local governments.

There are also a variety of private-sector or nonprofit employers that require emergency management specialists for situations where emergencies are prone to happen or could be potentially devastating. Examples of these employers include: hospitals and health systems, large companies, colleges and universities and various community relief organizations such as the Red Cross.

Admission
Admission Requirements
A bachelor’s degree in any discipline. Experience in health-related fields is preferred but is not required. Certificate may be completed concurrently with any M.P.H. degree other than the M.P.H. BSDP or a joint concentration degree that includes BSDP. Certificate coursework can be applied towards an M.P.H. if students matriculate into the M.P.H. program within 2 years of completing the certificate and assuming that the certificate courses were not part of a prior degree.

Students apply through SOPHAS Express.

Scholarships and Financial Aid
For priority consideration for graduate assistantship, applicants should complete their applications by Feb. 1.

For more information, visit the student financial services office online at http://finaid.slu.edu.

Learning Outcomes
1. Use an evidence-based approach to develop and analyze human, animal, and environmental hazard control strategies, programs, and policies, taking into account legal and ethical considerations. Specifically:
   a. Identify and cite relevant sources.
   b. Apply information from relevant sources appropriately
   c. Apply/use biosecurity nomenclature and terminology (such as "isolation" and "quarantine") related to infectious diseases accurately

2. Analyze and apply the scientific characteristics, such as transmission routes and control measures, of major biological hazards to develop interventions that minimize human and animal disease. Specifically:
   a. Develop appropriate interventions that minimize human and animal disease
   b. Integrate appropriate scientific characteristics of an infectious disease into a scenario or case study

3. Create and disseminate tailored messages regarding biosecurity hazards and risks to responders, the public, the media, and policy makers. Specifically:
   a. Communicate the biosecurity hazards and risks related to a scenario or case study
   b. Develop a health communication message that is appropriate for the intended audience

† BSDP Certificate electives should be chosen from one of the two focus areas: health/infectious diseases (BSDP 5103, BSDP 5203, BSDP 5104, BSDP 5209, or BSDP 5211) or terrorism/security (BSDP 5201, BSDP 5208, or BSDP 5106), or one from each focus area. Note: BSDP 5103 is a pre-requisite for BSDP 5203.

Continuation Standards
Students must maintain a cumulative grade point average (GPA) of 3.00 in all graduate/professional courses.
