HEALTH ADMINISTRATION, M.H.A. (EXECUTIVE)

The Saint Louis University Master of Health Administration, Executive Track (EMHA) is a 50-credit hour professional degree program designed for working health care professionals and clinicians interested in career advancement across a broad range of industry subsectors – from hospitals and clinics, long-term and rehabilitation services, and managed care organizations to Big Pharma, health tech and consulting.

Health care is among the fastest-growing industries in the United States with excellent opportunities for executives with diverse backgrounds and experiences. Graduates of SLU’s EMHA program are prepared to begin or accelerate senior management and leadership roles in top health care organizations that not only fulfill their personal career objectives but also drive better population health outcomes and strengthen the connection between providers, payers and the communities they serve.

Program Highlights

- All EMHA courses are offered completely online in a flexible, asynchronous format, which allows students to study at their own pace and work around busy personal and professional schedules
- Opportunities for real-time interactions with faculty and fellow students, tailored to meet the learning needs for each course
- Executive experience weekends that are engaging, interactive sessions that include skill-building workshops, guest lectures from local and national industry experts, “field trips” to local health care facilities, and team-building experiences
- Access to robust professional development resources and seminars
- Ability to pursue certificate programs in performance excellence, health data analytics, public health, and other high-demand areas
- Flexible start dates in fall or spring semesters
- Short time to degree completion
- Ability to leverage the reputation of a top-ranked graduate health care management program

Curriculum Overview

SLU’s EMHA program is administered by the Department of Health Management and Policy in the College for Public Health and Social Justice. In addition to the university-level accreditation by the Higher Learning Commission (HLC), the college is accredited by the Council on Education for Public Health (CEPH), and the M.H.A. program is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME).

First established in 1947, SLU’s nationally recognized M.H.A. program consistently ranks among the best in America and is currently ranked #13 by U.S. News & World Report. The program was also named Program of the Year in 2018 by the Association of University Programs in Health Administration.

A total of 50 credit hours (15 core and two elective courses) are required to earn the EMHA degree. The EMHA program offers a flexible, hybrid format that enables students to complete most degree requirements entirely online, in a semi-structured, asynchronous format.

EMHA students enroll in one course at a time, with each course offered in an accelerated format over a four-week period and a one-week transition between courses. Students work through the weekly modules at their own pace, which is a convenient format for students who are busy with family and work obligations. In addition to the required coursework, students have the option to attend professional development sessions and interact with their instructors and classmates via online video conference software.

EMHA students also attend executive experience weekends that include approximately 20 contact hours per weekend three times during the program. The executive experience weekends are designed to be engaging, interactive sessions that include skill-building workshops, guest lectures from local and national industry experts, “field trips” to local health care facilities, and team-building experiences.

In addition, EMHA students may choose to pursue one of several, high-demand certificate programs offered through the college, in addition to completing the required hours for the EMHA degree.

Careers

Graduates of the EMHA program are prepared to begin or accelerate senior management and leadership roles in organizations that include:

- Hospitals and integrated health systems
- Physicians’ offices and clinics
- Community health centers and federally qualified health centers (FQHCs)
- Consulting
- Health technology
- Managed care and other health insurance payer organizations
- Nursing, residential and rehabilitation facilities
- Home health care agencies
- Public health departments
- Government agencies

From 2018-2020, more than 75% of students who enrolled in SLU’s EMHA program were employed primarily in hospitals, integrated health systems and clinics. However, consulting, health technology, and pharmacy were also among the subsectors represented in the EMHA cohorts. Nearly 40% of EMHA students were employed primarily in hospitals, integrated health systems and clinics. However, consulting, health technology, and pharmacy were also among the subsectors represented in the EMHA cohorts. Nearly 40% of EMHA students were employed primarily in hospitals, integrated health systems and clinics. However, consulting, health technology, and pharmacy were also among the subsectors represented in the EMHA cohorts. Nearly 40% of EMHA students were employed primarily in hospitals, integrated health systems and clinics. However, consulting, health technology, and pharmacy were also among the subsectors represented in the EMHA cohorts. Nearly 40% of EMHA students were occupied in clinical roles (physicians, nurses, pharmacists, laboratory technicians). EMHA students also held mid-level positions as administrators, unit directors, operations and project managers, customer service and sales representatives, and business analysts.

Admission Requirements

- Prospective students should be currently employed in health care, public health, or human services fields, with three or more years of experience and current or anticipated managerial or supervisory responsibilities.

Application Requirements

- Application form and fee (fee may be waived in certain circumstances)
- Transcript demonstrating attainment of bachelor’s degree from an accredited college or university (grade point average of 3.0 or higher is preferred)
- Three letters of recommendation
- Resume/curriculum vitae
Saint Louis University's Master of Health Administration (M.H.A.) works to transform talented service-motivated students into knowledgeable, ethical professionals prepared for a range of management careers across the U.S. health sector.

To achieve this goal the program relies on competency-based education. In fact, SLU’s M.H.A. program has a long history of competency-based education (CBE). In 2002 the program developed one of the three nationally recognized competency models that has since been adopted and adapted by health management and health administration programs throughout the country.

In keeping with CBE, classes and the corresponding learning objectives are organized to meet 21 core competencies necessary for success in health administration across the broad health sector. Similar types of knowledge, skills and abilities are grouped into five competency domains (leadership, critical thinking/analysis, management, culture and community engagement, and communication). To remain at the forefront of Health Administration Education, the SLU M.H.A. program regularly re-evaluates the model with the input of alumni and other health industry professionals.

Leadership (L)
- L1. **Leadership Excellence**: Demonstrate the abilities and behaviors that are characteristic of leadership excellence, which include establishing a vision and inspiring and supporting others to work towards that shared vision and related goals
- L2. **Ethical Behavior**: Demonstrate ethical behavior through words and actions, which include honesty, integrity, and a concern for justice
- L3. **Social Responsibility**: Prioritize goals and policies that balance the mission, vision and values of organizational stakeholders with the values and needs of the community
- L4. **Adapting to Change**: Evaluate changing environments, listen to diverse viewpoints, and propose effective responses that align with personal values and organizational mission

Critical Thinking And Analysis (CTA)
- CTA1. **Data Analysis**: Apply appropriate methods and technology to analyze data patterns, trends and relationships
- CTA2. **Environmental Analysis**: Evaluate political, economic, social, technological, workforce, legal and regulatory factors that impact systems, organizations, communities and individuals at multiple levels along the health care continuum
- CTA3. **Translating Complexity**: Translate the results of complex analyses into information that illustrates potential problems and opportunities in a persuasive, meaningful way
- CTA4. **Evidence-Based Decision Making**: Assemble and utilize reliable and valid information sources and data to support informed, evidence-based decision-making
- CTA5. **Systems Thinking**: Apply appropriate models and methods to analyze issues from a systems perspective and to design creative, flexible solutions that advance organizational goals and effectiveness
- CTA6. **Ethical Analysis**: Identify ethical concerns in management and policy and analyze those concerns using appropriate frameworks and principles

Management (M)
- M1. **Management Functions**: Apply management theories, approaches and core functions to routine operations and to current and emerging issues in the health care environment
• M2. Teamwork: Demonstrate the ability to lead and work with people and teams to accomplish planned goals and actions on time, with budgeted resources

• M3. Essential Skills: Demonstrate essential management skills, which include efficient time and resource management; conflict negotiation and resolution; coaching and motivating others; facilitating discussion, cooperation, and consensus-building; delegating authority

• M4. Adapting to Uncertainty: Under conditions of uncertainty, demonstrate the ability to produce high-quality work, make decisions, adapt to changing priorities, and learn from mistakes

• M5. Systems Management: Demonstrate the ability to deploy organizational resources and enforce accountability to support the implementation of systems-based management approaches

• M6. Professionalism: Demonstrate conduct characteristic of health care professionals, which includes adhering to professional expectations, workplace norms, and performance standards; engaging in professional and community service; and participating in professional development opportunities

### Culture And Community Engagement (CCE)

- CCE1. Cultural Competence: Build cultural competence in personal standards and practices and within the performance standards and practices of organizations, systems, and communities

- CCE2. Community Engagement: Apply evidence-based approaches to engage communities and multilevel partners in working together to improve modifiable determinants of health and health outcomes

### Communication (C)

- C1. Create Information: Demonstrate the ability to promptly create and organize ideas and information that are effective and customized to fulfill the needs of the target audience

- C2. Convey Information: Demonstrate formal and informal communication using traditional and contemporary modalities to convey messages that are clear and cogent for the target audience

- C3. Interpersonal Effectiveness: Foster positive interpersonal relationships with internal and external stakeholders through use of bidirectional communication techniques, which include listening and responding appropriately to the ideas and opinions of others; giving and receiving feedback; and participating in crucial conversations

### Continuation Standards

Students must maintain a cumulative grade point average (GPA) of 3.00 in all graduate/professional courses.

### Roadmap

Roadmaps are recommended semester-by-semester plans of study for programs and assume full-time enrollment unless otherwise noted.

Courses and milestones designated as critical (marked with !) must be completed in the semester listed to ensure a timely graduation. Transfer credit may change the roadmap.

This roadmap should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor/mentor each semester. Requirements, course availability and sequencing are subject to change.

### Students Beginning in the Fall (August)

Program Notes

The M.H.A. curriculum requires completion of 60 credits of courses as specified above. Students, who complete all of their M.H.A. requirements by the end of year two, as scheduled, are eligible to be awarded their M.H.A. degree in fall of year two.

Any deviation from this plan will likely result in extending the time to degree completion. Students who self-register need to notify the School of Public Health registrar to confirm accuracy of course selection.

Core courses in the MHA curriculum are distributed across four areas, as follows:

- **Public Health (College for Public Health and Social Justice) Core (PUBH):** includes one 3-credit PUBH core course (= 3 credits total) required of the College for all degree programs.
- **Health Management and Policy (Department) Core (HMP):** includes four 3-credit required HMP core courses and three 0-credit required HMP core courses (= 12 credits total).
- **Health Management (M.H.A, degree) Core (HM):** includes eleven 3-credit required HM core courses (= 33 credits total)
- **Elective course options (ELT):** includes 12 credits of elective graduate courses, which can include any graduate course offered by the HMP department, another department or program in the SPH, or any other academic unit of the University that is not part of the M.H.A. required course curriculum.
