

HEALTH ADMINISTRATION, M.H.A.

Ranked among the top 15 graduate programs for health care management by *U.S. News & World Report*, Saint Louis University's Master of Health Administration program prepares students to be leaders in a variety of health care organizations such as hospitals, health systems, insurance companies, pharmacy benefit management organizations, consulting firms and physician organizations. Saint Louis University has been a pioneer in health management education since 1947. Join us in continuing this mission of excellence in teaching, research and service for our next 70 years!

Curriculum Overview

As one of the nation's most established M.H.A. programs, SLU's M.H.A. connects students to a coast-to-coast network of internship sites and alumni working in senior leadership positions. The program is triple accredited: the M.H.A. program is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME); the College for Public Health and Social Justice is accredited by the Council on Education for Public Health (CEPH); and Saint Louis University is accredited by the Higher Learning Commission (HLC).

The curriculum's foundation is the SLU Competency Model, pioneered early in healthcare pedagogy's shift to competency-based education, and the cornerstone of CAHME accreditation. A competency-based healthcare management education is focused not simply on the lectures you hear or writing papers, but on what *you can do as a professional* once you graduate.

Fieldwork and Research Opportunities

SLU's program offers students a practice-integrated education, including a 13 week internship with senior leaders in many of the nation's top health systems and health care organizations. Internship experiences are based on students' individual goals, objectives and preferences. Students are transformed into knowledgeable, ethical professionals prepared for a range of management careers across the health sector. Applied, practical projects are an important means of professional growth. In addition to the internship between years 1 and 2 of the program, students will work on multiple applied projects throughout the curriculum.

Careers

M.H.A. graduates occupy senior management positions in a variety of health care settings. Alumni work in health and hospital systems, insurance companies, academic medical centers, physician practices, consulting firms and benefit management organizations, such as Express Scripts.

The 2017 class had a 100 percent graduation rate and 95 percent were pursuing full-time careers in their fields (60 percent), fellowships (31 percent) or seeking further graduate education (4 percent) within 90 days of graduation.

The 2017 alumni are working in:

- Hospitals and health systems (27 percent)
- Managed care or insurance (13 percent)
- Law/other (12 percent)
- Consulting (8 percent)

- Medical group management (6 percent)
- Other (34 percent)

Admission Requirements

Applicants should have a bachelor's degree with no less than a 3.0 grade point average. Test scores are preferably in the 50th percentiles or higher, but there are no minimum cutoffs to be considered for admission as students are considered using a holistic review process, including interviews.

Application Requirements

- Application form and fee (Apply at: www.sophas.org or www.hampcas.org)
- Transcript(s)
- Three letters of recommendation
- Test scores (for M.H.A. applicants only) - GRE, GMAT, MCAT, LSAT are accepted
- Resume/curriculum vitae
- Interview (on-campus interviews are preferred, but phone or Skype options are available for situations where travel to SLU is not feasible)
- Professional goal statement

Requirements for International Students

All admission policies and requirements for domestic students apply to international students along with the following:

- Demonstrate English Language Proficiency (<http://catalog.slu.edu/academic-policies/office-admission/undergraduate/english-language-proficiency>)
- Proof of financial support must include:
 - A letter of financial support from the person(s) or sponsoring agency funding the time at Saint Louis University
 - A letter from the sponsor's bank verifying that the funds are available and will be so for the duration of study at the University
- Academic records, in English translation, of students who have undertaken postsecondary studies outside the United States must include the courses taken and/or lectures attended, practical laboratory work, the maximum and minimum grades attainable, the grades earned or the results of all end-of-term examinations, and any honors or degrees received. WES and ECE transcripts are accepted.

Application Deadline

Applications are accepted on a rolling basis until classes are full.

Review Process

All applications are considered on an individual basis with a balanced approach. Candidates may be invited to an on-site interview.

Scholarships and Financial Aid

The College for Public Health and Social Justice offers several ways to help finance graduate education. Opportunities include a limited number of merit-based scholarships and graduate research assistantships.

Awards are made to applicants with the highest combinations of GPAs and test scores who complete their applications by the priority deadlines.

For more information, visit the student financial services office online at <http://finaid.slu.edu>.

Accreditation

The Master of Health Administration is accredited by the Commission on Accreditation of Healthcare Management Education.

Learning Outcomes

Saint Louis University's Master of Health Administration (M.H.A.) works to transform talented service-motivated students into knowledgeable, ethical professionals prepared for a range of management careers across the U.S. health sector (adapted from M.H.A. mission statement). To achieve this goal the program relies on competency-based education. In fact, SLU's M.H.A. program has a long history of competency-based education (CBE). In 2002 the program developed one of the three nationally recognized competency models that has since been adopted and adapted by health management and health administration programs throughout the country.

In keeping with CBE, classes and the corresponding learning objectives are organized to meet sixty core competencies necessary for success in health administration across the broad health sector. Similar types of knowledge, skills and abilities are grouped into six competency domains (leadership, critical thinking, science/analysis, management, political and community development and communication). To remain at the forefront of Health Administration Education, the SLU M.H.A. program regularly re-evaluates the model with the input of alumni and other health industry professionals.

Requirements

Electives		
Select 12 credits		12
Total Credits		60

Non-Course Requirements

- We recommend student membership in the following healthcare management professional organizations: American College of Healthcare Executives (ACHE), Missouri-ACHE, Healthcare Financial Membership Association (HFMA), Medical Group Management Association (MGMA), and/or any other healthcare management professional organization.
- Concentration-specific comprehensive exam (HMP 5950 Special Study for Exams) In this case-based culminating experience, students receive a healthcare business case and a short window of time to analyze it, develop a proposal, and present it to a panel. This simulates the real work place experience of studying a business problem and presenting a proposal to the management team in an organization.

Continuation Standards

Students must maintain a cumulative grade point average (GPA) of 3.00 in all graduate/professional courses.

Roadmap

Roadmaps are recommended semester-by-semester plans of study for programs and assume full-time enrollment unless otherwise noted.

Courses and milestones designated as critical (marked with !) must be completed in the semester listed to ensure a timely graduation. Transfer credit may change the roadmap.

This roadmap should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor/mentor each semester. Requirements, course availability and sequencing are subject to change.

* The MHA curriculum requires completion of 60 credit hours of courses as specified above. Students, who complete all of their MHA requirements by the end of Year 2, as scheduled are eligible to be awarded their MHA degree in May of Year 2.

Core courses in the MHA curriculum are distributed across four areas, as follows:

- **Public Health (College for Public Health and Social Justice) Core (PUBH):** includes one 3-credit hour PUBH core course (= 3 credit hours total) required of the College for all degree programs.
- **Health Management and Policy (Department) Core (HMP):** includes four 3-credit hour required HMP core courses and three 0-credit hour required HMP core courses (= 12 credit hours total).
- **Health Management (MHA degree) Core (HM):** includes eleven 3-credit hour required HM core courses (= 33 credit hours total)
- **Elective course options (ELT):** includes 12 credit hours of elective graduate courses, which can include any graduate course offered by the HMP Department, another Department or Program in the SPH, or any other academic unit of the University that is not part of the MHA required course curriculum.

All full-time MHA students must register for and satisfactorily complete one fall and one spring semester of HMP-5900: Health Management and Policy Rounds during Year 1 in the 2-year curriculum.

Internship: All MHA students are required to complete a professional internship in health management during their course of study. Students must satisfactorily complete a minimum of 27 credit hours in Year 1 MHA curriculum (including both Fall and Spring semesters of HMP-591), be in good academic standing (i.e., have a cumulative GPA of 3.0 or higher) and obtain the approval of the MHA Program Director and HMP Internship and Placement Coordinator before enrolling in the internship program. **This means that students may have no incomplete coursework before being placed in the field.**

Most health management internships consist of a 13-week, full-time placement with a private health provider or other health care organization during the summer prior to each student’s final year of academic course work. Placements are made by the HMP faculty, in consultation with the HMP Internship and Placement Coordinator, who match each individual student’s experience and career interests with the nature and preferences of available placement sites each year.

Required Quality Elective may be fulfilled with either HMP-5100 Quality Improvement in Health Care Management or HMP-5810 Six Sigma Green Belt.
