AEROSPACE ENGINEERING, B.S.

Saint Louis University’s School of Science and Engineering has developed an innovative, future-focused aerospace engineering program incorporating the latest industry trends to address the current and future needs of the profession and our society.

You will gain a solid foundation as a student in the aerospace engineering program at SLU through coursework and hands-on learning. You will become a problem solver while also being aware of the impact design decisions have in the context of ethics, the environment and society.

Program Highlights

- With easy access to sophisticated computer-aided design and simulation facilities, wind tunnels, a structures laboratory and more, SLU’s aerospace engineering graduates gain invaluable experience that helps launch their careers and set them on a trajectory to shape our world and beyond.
- Our students have several extra-curricular opportunities to participate in national and international competitions and activities such as the American Institute of Aeronautics and Astronautics (AIAA), SAE International, NASA and the Air Force Office of Scientific Research (AFOSR).
- Aerospace engineering students at SLU are also involved in student chapters of the AIAA, SAE International, Society of Women Engineers and the Rocket Propulsion Laboratory.

Curriculum Overview

Students in SLU’s aerospace engineering program gain a solid foundation of coursework in fundamental engineering sciences before progressing toward traditional aerospace engineering courses. In addition, the program offers technical electives in broader areas of aerospace engineering to provide opportunities for students to gain greater depth and understanding. These engineering fundamentals and aerospace topics integrate into a sequence of two capstone courses that provide greater depth in design.

Fieldwork and Research Opportunities

SLU’s aerospace engineering program benefits include summer internships and cooperative education programs available with industry in the St. Louis area and nationwide. Many of our students complete summer internship programs in federal labs and private industries. These sites include NASA, the U.S. Department of Defense, The Boeing Company, Lockheed Martin Corporation and Northrop Grumman.

Funded undergraduate and graduate research opportunities are available with faculty members in the program. Funded research grants ranging from private industries to federal government research laboratories are available for qualified students.

Careers

Corporations and government agencies where successful SLU aerospace engineering alumni can be found include:

- Boeing
- General Dynamics
- General Electric
- Hughes
- Lockheed Martin
- NASA, U.S. Air Force, Navy and Army research centers
- Northrop Grumman
- Pratt-Whitney
- Raytheon
- SpaceX

Admission Requirements

Begin Your Application (http://www.slu.edu/apply.php)
Saint Louis University also accepts the Common Application.

Freshman

All applications are thoroughly reviewed with the highest degree of individual care and consideration to all credentials that are submitted. Solid academic performance in college preparatory coursework is a primary concern in reviewing a freshman applicant’s file.

To be considered for admission to any Saint Louis University undergraduate program, applicants must be graduating from an accredited high school, have an acceptable HiSET exam score or take the General Education Development (GED) test.

Transfer

Applicants must be a graduate of an accredited high school or have an acceptable score on the GED.

Students who have attempted fewer than 24 semester credits (or 30 quarter credits) of college credit must follow the above freshmen admission requirements. Students who have completed 24 or more semester credits (or 30 quarter credits) of college credit must submit transcripts from all previously attended college(s).

In reviewing a transfer applicant’s file, the Office of Admission holistically examines the student’s academic performance in college-level coursework as an indicator of the student’s ability to meet the academic rigor of Saint Louis University. Where applicable, transfer students will be evaluated on any courses outlined in the continuation standards of their preferred major.

International Applicants

All admission policies and requirements for domestic students apply to international students along with the following:

- Demonstrate English Language Proficiency (https://catalog.slu.edu/academic-policies/office-admission/undergraduate/english-language-proficiency/)
- Proof of financial support must include:
  - A letter of financial support from the person(s) or sponsoring agency funding the time at Saint Louis University
  - A letter from the sponsor’s bank verifying that the funds are available and will be so for the duration of study at the University
- Academic records, in English translation, of students who have undertaken postsecondary studies outside the United States must include the courses taken and/or lectures attended, practical laboratory work, the maximum and minimum grades attainable, the grades earned or the results of all end-of-term examinations, and any honors or degrees received. WES and ECE transcripts are accepted.
Additional Admission Requirements

In addition to the general admission and matriculation requirements of the University, applicants to SLU’s engineering programs must meet the following requirements:

- **GPA:** Minimum cumulative 3.00 high school GPA for freshmen applicants and 2.70 college GPA for transfer applicants.
- **Coursework:** Fifteen total units of high school work are required: three or four units of English; four or more units of mathematics, including algebra I and II, geometry and precalculus (Algebra II with Trigonometry is not sufficient). Students should be prepared to start the first semester of freshmen year in Calculus I or higher; three or four units of science, including general science, introduction to physical science, earth science, biology, physics or chemistry; two or three units of social sciences including history, psychology or sociology; and three units of electives.

Admission to the School of Science and Engineering’s degree programs is based on a combination of secondary school grades, college admission test scores, co-curricular activities and attempted college coursework, as well as other indicators of the applicant’s ability, career focus and character. This process respects the non-discrimination policy of the University and is designed to select a qualified, competent and diverse student body with high standards of scholarship and character, consistent with the mission of the University.

**Tuition**

<table>

</table>

Additional charges may apply. Other resources are listed below:

- Information on Tuition and Fees (https://catalog.slu.edu/academic-policies/student-financial-services/ tuition/)
- Miscellaneous Fees (https://catalog.slu.edu/academic-policies/student-financial-services/fees/)
- Information on Summer Tuition (https://catalog.slu.edu/academic-policies/student-financial-services/ tuition-summer/)

**Scholarships and Financial Aid**

There are two principal ways to help finance a Saint Louis University education:

- **Scholarships:** Scholarships are awarded based on academic achievement, service, leadership and financial need.
- **Financial Aid:** Financial aid is provided through grants and loans, some of which require repayment.

Saint Louis University makes every effort to keep our education affordable. In fiscal year 2022, 99% of first-time freshmen and 90% of all students received financial aid (https://www.slu.edu/financial-aid/) and students received more than $445 million in aid University-wide.

For priority consideration for merit-based scholarships, apply for admission by December 1 and complete a Free Application for Federal Student Aid (FAFSA) by March 1.

For information on other scholarships and financial aid, visit www.slu.edu/financial-aid (https://www.slu.edu/financial-aid/).

**Accreditation**

The aerospace engineering, biomedical engineering, civil engineering, computer engineering, electrical engineering, and mechanical engineering undergraduate curricula are accredited by the Engineering Accreditation Commission of ABET, www.abet.org (https://www.abet.org).

**Learning Outcomes**

Saint Louis University's undergraduate engineering programs are accredited by the Engineering Accreditation Commission of ABET (http://www.abet.org (http://www.abet.org/)).

**Program Educational Objectives**

The undergraduate program is designed to meet the following specific objectives in order to fulfill the departmental and institutional missions.

- To practice the principles of engineering in aerospace or allied organizations
- To pursue further learning in aerospace engineering or in allied disciplines
- To function as effective engineers with professional knowledge, skills and values

**Student Outcomes**

Graduates of the aerospace engineering program at Saint Louis University will demonstrate:

An ability to:

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science and mathematics.
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. Communicate effectively with a range of audiences.
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. Acquire and apply new knowledge as needed, using appropriate learning strategies.

---

### Non-Course Requirements

All Science and Engineering B.A. and B.S. students must complete an exit interview/survey near the end of their bachelor's program.

**Continuation Standards**

Students must maintain a minimum 2.00 GPA.

---

1 Technical electives provide an opportunity to expand the horizon of a student's program major or in areas related to program major. Students are encouraged to take courses at the 4000 level in the area of program major or the 3000 level or above in allied disciplines. (Allied disciplines include courses in engineering other than student's major, Mathematics – MATH, Computer Science – CSCI, Management – MGT, Pre-Law – PLS, Physics – PHYS, Chemistry – CHEM, and Biology – BIOL.) The student may also do a project or research independent study with a faculty member, which is considered equivalent to a technical elective. The courses or independent study in these areas should be beyond the required courses within the curriculum.

---

### Roadmap

Roadmaps are recommended semester-by-semester plans of study for programs and assume full-time enrollment unless otherwise noted.

Courses and milestones designated as critical (marked with !) must be completed in the semester listed to ensure a timely graduation. Transfer credit may change the roadmap.

This roadmap should not be used in the place of regular academic advising appointments. All students are encouraged to meet with their advisor/mentor each semester. Requirements, course availability and sequencing are subject to change.
