SOFTWARE ENGINEERING, M.S.

Saint Louis University's master's degree in software engineering is designed for students interested in developing high-quality, large-scale software systems.

Students enrolled in SLU's graduate program in software engineering develop and create design strategies using hands-on projects and modern software tools to gain knowledge, skills and experience. Students discover critical design strategies that allow for continual innovation throughout their careers. Guided by outstanding professors, much of the learning is team-based in small classes.

Curriculum Overview

SLU's project-based software engineering curriculum emphasizes student teamwork and regular student-faculty interactions. Software engineering students at SLU gain depth of knowledge in processes and techniques for developing quality software systems. In addition, the program's flexible electives allow students to explore other areas of computer science such as systems, theory, networking, security and artificial intelligence. A culminating capstone project brings teams together for a full development cycle.

Fieldwork and Research Opportunities

Our location in the Midtown area of St. Louis, Missouri, offers students access to a robust technology community, operations for many Fortune 500 companies and vibrant startup culture. This environment provides outstanding opportunities for summer internships, part-time work during the academic year and jobs after graduation.

Employers in St. Louis interested in computer science students include Boeing, Centene, Citi, Deloitte, Enterprise, Express Scripts, KPMG, Maritz, MasterCard, Microsoft, and Bayer Worldwide Technologies. Other students have worked for smaller companies or even started their own companies.

Our campus is within walking distance of the Cortex Innovation Community (https://cortexstl.com/), a vibrant 200-acre (and growing) innovation hub and technology district. Cortex is home to SLU's Research Innovation Group (https://www.slu.edu/research/faculty-resources/research-innovation-group/), which works on technology transfer and commercial partnerships. Cortex is also home to the weekly Venture Cafe (https://venturecafestl.org/), which is a great place for students to connect with members of the tech community in a friendly and informal setting. Also in downtown St. Louis is the T-REX Technology Entrepreneur Center (http://www.downtowntrex.org/), a co-working space and technology incubator.

Careers

Careers related to software engineering and computer science are routinely found on various "best jobs" lists because of their outstanding combination of excellent pay, satisfying work-life balance, and personal reward in seeing the significant impact of computing on society. As a sample of such listings:

- U.S. News 100 Best Jobs (https://money.usnews.com/careers/best-jobs(rankings/the-100-best-jobs/) list for 2021 named software developer as #2. The top 100 also included data scientist (#8), IT manager (#12), information security analyst (#15), computer systems analyst (#47), computer network architect (#51), database administrator (#55), web developer (#59), computer systems administrator (#86).

- Glassdoor's 50 Best Jobs in America (https://www.glassdoor.com/List/Best-Jobs-in-America-LST_KQ0,20.htm) list for 2021 named Java developer as #1 and data scientist as #2, and many other technology positions appear within the top 25: enterprise architect (#4), DevOps engineer (#5), information security engineer (#6), mobile engineer (#8), software engineer (#9), front end engineer (#11), back end engineer (#16), machine learning engineer (#17), cloud engineer (#23), UX designer (#24).

- Indeed.com's Best Jobs of 2020 (https://www.indeed.com/lead/best-jobs-2020/) named software architect as #1 and full-stack developer as #2. Also included in the top 25 were Java developer (#7), data scientist (#8), IT security specialist (#9), data engineer (#12) and cloud engineer (#20).

Admission Requirements

A bachelor's degree in a science, technology, engineering or math major (STEM) is typical for admission into this program. Most successful applicants have an undergraduate grade point average of 3.00 or better on a 4.00 scale. In addition, applicants should have evidence of strong computational skills (generally through prior coursework in programming and data structures) and proof of strong mathematical skills (generally through prior coursework in calculus and statistics).

Application Requirements

- Application completion and fee
- Transcript(s)
- One letter of recommendation is required; two more are optional
- Résumé
- Statement of professional goals
- GRE general scores recommended

Requirements for International Students

All admission policies and requirements for domestic students apply to international students. International students must also meet the following additional requirements:

- Demonstrate English Language Proficiency
- Financial documents are required to complete an application for admission and be reviewed for admission and merit scholarships.
- Proof of financial support that must include:
  - A letter of financial support from the person(s) or sponsoring agency funding the student's time at Saint Louis University
  - A letter from the sponsor's bank verifying that the funds are available and will be so for the duration of the student's study at the University
- Academic records, in English translation, of students who have undertaken postsecondary studies outside the United States must include:
  - Courses taken and/or lectures attended
  - Practical laboratory work
  - The maximum and minimum grades attainable
The grades earned or the results of all end-of-term examinations
Any honors or degrees received.

WES and ECE transcripts are accepted.

Application Deadlines
Applications for January admission must be completed by the preceding
Nov. 1, while applications for August admission must be completed by
June 1. Applicants seeking scholarships or graduate assistantships are
couraged to apply earlier.

Review Process
Applications will be reviewed as they are completed. A panel of faculty
members from the Department of Computer Science will decide on
acceptance, and all applicants will be evaluated for potential scholarships
or assistantships.

Scholarships, Assistantships and
Financial Aid
The computer science department offers several forms of merit-based
financial support for graduate students. These include possible tuition
scholarships and graduate assistantships that may include full or partial
tuition, health insurance and a stipend for living expenses in exchange
for the assistant's contributions to the teaching or research mission
of the department. Students may also seek scholarships from various
independent organizations that support graduate education in STEM
fields.

For more information, visit the student financial services office at

Learning Outcomes
1. Graduates will be able to design, implement, evaluate and test a
   complex software system that meets a given set of computing
   requirements.
2. Graduates will be able to utilize project management processes and
tools through the complete software life cycle.
3. Graduates will be able to assess relevant literature and technical
documents in the field of computing.
4. Graduates will be able to communicate effectively to both
   professional and general audiences in both oral and written forms.
5. Graduates will be able to recognize professional responsibilities and
   make informed judgments in computing practice based on legal and
   ethical principles.
6. Graduates will be able to function effectively as a member of a team
   in developing computing technology and solving technical problems.

Total Credits 30

Continuation Standards
Students must maintain a cumulative grade point average (GPA) of 3.00
in all graduate/professional courses.

Roadmap
Roadmaps are recommended semester-by-semester plans of study for
programs and assume full-time enrollment unless otherwise noted.

Courses and milestones designated as critical (marked with !) must be
completed in the semester listed to ensure a timely graduation. Transfer
credit may change the roadmap.

This roadmap should not be used in the place of regular academic
advising appointments. All students are encouraged to meet with their
advisor/mentor each semester. Requirements, course availability and
sequencing are subject to change.

Program Notes
General Electives
The general electives may include additional selections from the software
engineering category, courses numbered CSCI 5301-5399.

Internship with Industry
Students may apply at most 3 credits of Internship with Industry
(CSCI 5910) toward the degree requirements.
Contact Us

For questions about admissions, applicants currently in the United States should contact graduate@slu.edu and applicants elsewhere should contact globalgrad@slu.edu.

For other questions about the program or curriculum, contact the Computer Science department at cs@slu.edu.
