APA 3010 - Introduction to Applied Behavior Analysis
Credit(s): 3 Credits
This course is an introduction to applied behavior analysis. Applied behavior analysis is a field dedicated to the scientific application of behavioral principles and procedures to socially relevant problems. During this course, students learn the causes of behavior. Students will also learn about basic principles and procedures, such as reinforcement, punishment, and functional assessment. In addition, we will cover particular content areas including behavioral medicine, behavioral gerontology, drug and alcohol abuse, classroom management, developmental disabilities, and applications in business and industry. Cross-listed with PSY 4730.
Prerequisite(s): PSY 1010

ABA 5001 - Supervision and Organizational Behavior Management
Credit(s): 3 Credits
This course builds upon the basic principles of learning and applied behavior analysis presented during previous courses in the Applied Behavior Analysis program curriculum. This course develops students' understanding of evidenced-based strategies for supervision, organizational behavior management, group contingencies and meta-contingencies, and influencing behavioral change of employees and staff working with clients/consumers of behavior analytic services. Course content supports the social work value of social justice, as it relates to provisions of professional services to persons with disabilities.
Restrictions:
Enrollment limited to students in a MS in Appld Behavrl Analysis degree.

ABA 5002 - Philosophy of Behavioral Science
Credit(s): 3 Credits
This course builds upon the basic principles of learning and applied behavior analysis presented during previous courses in the Applied Behavior Analysis curriculum. This course will highlight the philosophical underpinnings of behavioral science, including Radical Behaviorism, and how the application of such theoretical principles can impact individuals, groups, and macro-level social systems (e.g., government, religious institutions, etc.). Concomitantly, the course will focus on verbal behavior and derived relational responding across phylogenetic, ontogenetic, and cultural levels of analyses. The goal of the course is to refine students' conceptual knowledge of the science of human behavior generally, and as it relates to verbal behavior.

ABA 5115 - Advanced Clinical Research Capstone
Credit(s): 3 Credits
This course seeks to assist students with advancing their clinical skills learned during practicum I-III, by integrating research into their practice. Students will actively apply research-based techniques and theoretical perspectives during clinical practice, according to the BACB ethical code. Students will complete a capstone project that requires them to complete a formal research project with at least one participant. Students will conduct original research, write a background literature review, methods, results, and conclusions and present their final research to their peers.
Prerequisite(s): ABA 5820; ABA 5826; ABA 5827; ABA 5828; ABA 5830; ABA 5840

ABA 5117 - Advanced Clinical Research Competency Seminar V
Credit(s): 1 Credit
This two-part course seeks to assist students with advancing their clinical skills learned during practicum I-III, by integrating research into their practice. Students will actively apply research-based techniques and theoretical perspectives during clinical practice, according to professional and ethical standards. Advanced practice experiences will include: conducting functional analyses; designing, implementing, and monitoring advanced and complex behavioral change programs; overseeing implementation of behavioral change programs by others; participating in behavioral program planning meetings; conducting behavior analytic principles and concepts in novel settings, environments, and/or populations. Course material will prepare students for working in the professions of behavior analysis and social work for Board Certification in Applied Behavior Analysis. Course content supports the ethical principles of social justice to provide professional services to persons with disabilities. (Offered Fall, Spring, and Summer)
Prerequisite(s): ABA 5820; ABA 5826; ABA 5827; ABA 5828; ABA 5830; ABA 5840; ABA 5115; ABA 5116
Corequisite(s): ABA 5118

ABA 5118 - Practicum IV
Credit(s): 1 Credit
Students will learn to integrate knowledge, values, and skills to develop a professional level of practice with specific emphasis on applied behavioral analysis.
Prerequisite(s): ABA 5820; ABA 5826; ABA 5827; ABA 5828; ABA 5830; ABA 5840

ABA 5119 - Practicum V
Credit(s): 1 Credit
Students will learn to integrate knowledge, values, and skills to develop a professional level of practice with specific emphasis on applied behavioral analysis.
Prerequisite(s): ABA 5820; ABA 5826; ABA 5827; ABA 5828; ABA 5830; ABA 5840; ABA 5115; ABA 5116
Corequisite(s): ABA 5117

ABA 5746 - Principles & Concepts in Behavior Analysis
Credit(s): 3 Credits
This course will familiarize students with behavior analysis fundamental philosophical assumptions, and the basic concepts and principles of operant and respondent conditioning. The course will review some of the basic laboratory research that has illuminated the principles of behavior. The material covered in this course will contribute to preparing students working in the field of behavior analysis and related fields for board certification in Applied Behavior Analysis. (Offered in Fall)
Restrictions:
Enrollment limited to students in the programs.
ABA 5747 - Behavioral Assessment  
**Credit(s): 3 Credits**  
This is a graduate course that will develop student’s basic knowledge about behavioral assessment methods and intervention selection in the field of applied behavior analysis. This course will review some of the basic assumptions and characteristics that define the field. The material covered in this course will prepare students working in the field of behavior analysis/realted field and for board certification in Applied Behavior Analysis. Course content supports the social work value of social justice to provide professional services to all individuals requiring behavioral interventions. 
**Restrictions:**  
Enrollment limited to students in the MS Appld Behaviorl Analysis, PMC Applpd Behvr Analysis or PMC Appld Behv Analysis (Web) programs.

ABA 5748 - Behavior Change and Process  
**Credit(s): 3 Credits**  
This course will expand basic knowledge of students with respect to behavior analysis fundamental concepts, principles and philosophical assumptions including basic behavioral principles of operant and respondent conditioning, stimulus control, and develop a working understanding of these principles in behavior change strategies and interventions in the field of applied behavior analysis. This course will review some of the fundamental applied literature that has demonstrated the efficacy of behavioral strategies and continues to define the field. The material covered in this course will contribute to preparing students working in the field of behavior analysis and related fields for board certification in Applied Behavior Analysis. (Offered in the Spring)

ABA 5749 - Ethics in Behavior Analysis  
**Credit(s): 3 Credits**  
This course will familiarize students with the ethical issues confronting those working as behavior analysts. Students will learn the ethical responsibilities inherent to working in their chosen field by exploring the Ethics Code for Behavior Analysts as well as other relevant fields’ codes of ethics. Students will also explore issues of social justice and inequities that currently exist within the field of behavior analysis. They will explore their own biases and how these can influence their decision making when working with clients. The ethical standards in this course will prepare students working in the field of behavior analysis and prepare them for board certification in Applied Behavior Analysis. (Offered in Spring)

ABA 5774 - Measurement & Experimental Design  
**Credit(s): 3 Credits**  
This course will develop basic knowledge of students with respect to single subject research design, measurement and application of the empirical approach to evaluation of effectiveness of interventions in the field of applied behavior analysis. This course will review some of the basic assumptions and characteristics that define the field. The material covered in this course will contribute to preparing students working in the field of behavior analysis and related fields for board certification in Applied Behavior Analysis. (Offered in Fall)  
**Corequisite(s):** ABA 5746  
**Restrictions:**  
Enrollment limited to students in the programs.

ABA 5775 - Basic Behavior Analysis  
**Credit(s): 3 Credits**  
Basic behavior analysis, also known as Experimental Analysis of Behavior (EAB) provides the technological foundation for Applied Behavior Analysis (ABA). In this course, students will explore the relevant historical research of EAB, the implications of these findings, current research, and apply specific principles to gain an in depth understanding.
