EDUCATION RESEARCH (EDR)

EDR 3980 - Independent Study
Credit(s): 1-3 Credits (Repeatable for credit)
This course will provide the background for seminar discussions. Offered every fall and spring semester. Students will be required to conduct mini-evaluations; their involvement in these evaluations and the course reading will provide the background for seminar discussions.

Restrictions:
Enrollment is limited to students with a major in Education.

EDR 4980 - Graduate Reading Course
Credit(s): 0 Credits
Prior permission of guiding professor required.

EDR 5000 - General Research Methods for Education
Credit(s): 3 Credits
This course provides a survey of the techniques, methods and tools of research in education. Included is general discussion of the research process followed by examination of several different study designs such as observational, experimental, descriptive and sample survey. The course also provides an overview of different methods of sampling, data collection and analysis frequently used in research literature. (Offered every Spring semester)

Restrictions:
Enrollment is limited to students with a major in Education.

EDR 6060 - Research Design and Analysis
Credit(s): 3 Credits
This course is a survey of basic statistical methods including descriptive statistics, z-tests and t-tests of means and proportions, chi-square analyses, correlation and regression analyses, and analysis of variance. The statistical package for the social sciences (SPSS) will also be used. (Offered every Fall semester)

EDR 5200 - Test Construction Techniques
Credit(s): 3 Credits
The Test Construction course is designed to assist educators in learning how to create useful and psychometrically sound examinations. It provides a research based overview of the different testing formats and the advantages and limitations of each format.

EDR 5400 - Qual Research in Education
Credit(s): 3 Credits
Students will learn the qualitative research paradigm, data collection and analysis techniques and report writing. Offered every fall and spring semester.

EDR 5500 - Evaluation of Education Programs
Credit(s): 3 Credits
Course introduces students to program evaluation techniques and their application to schools. Builds on a basic understanding of research and evaluation processes to focus on alternative approaches to program evaluation and practical guidelines. Students will be required to conduct mini-evaluations; their involvement in these evaluations and the course reading will provide the background for seminar discussions. Offered every fall semester.

Restrictions:
Prior permission of guiding professor required.

EDR 5990 - Thesis Research
Credit(s): 0-6 Credits
Research.

EDR 6000 - Professional Writing
Credit(s): 3 Credits
General theory of research: some emphasis on educational applications and quantitative approaches. Offered annually.

EDR 6010 - Doctoral Residency
Credit(s): 0-3 Credits
Prior permission of guiding professor.

EDR 6060 - Research Design and Analysis
Credit(s): 3 Credits
EDR 6070 - Evidence Based Decision Making
Credit(s): 3 Credits
This course will introduce graduate students to the basics of educational research. It will provide an overview of basic statistical techniques which are used in educational research; the fundamentals of qualitative and quantitative educational research methodologies; designing educational research proposals; and how to read and evaluate published articles which report educational research.

EDR 6100 - Intermediate Applied Statistics for Education
Credit(s): 3 Credits
This course provides background in many applied statistical techniques. A focus of the course is to develop students’ understanding of multiple techniques so that they may judge the legitimacy of statistical results in articles and choose appropriate statistical methods. Topics include effect size, ANOVA, ANCOVA, MANOVA, regression and correlation, test construction, and multiple nonparametric tests. SPSS will be utilized throughout the course. This course can be used as a final statistics course or as a bridge for those students who want to pursue more advanced courses.
Prerequisite(s): EDR 5100

EDR 6150 - Single Subject Experimental Research Design
Credit(s): 3 Credits
This course is an advanced quantitative research course concentrating on single subject research design and analysis for educators. It is designed to prepare students to design, conduct, and evaluate research using single subject designs. An understanding of the salient features as well as the advantages and disadvantages of these research methods is provided. Students will also analyze published research that uses these methods. Offered in spring in every even years.

EDR 6400 - Advanced Qual Research for Ed
Credit(s): 3 Credits
The primary purpose of this course is to provide students with the skills needed to conduct publishable qualitative research in education. Multiple qualitative methods will be used. An additional goal is to provide students with the tools or results that will be useful to them in their future work. (Offered every Spring)
Prerequisite(s): EDR 5400

EDR 6500 - Multilevel Regression Models
Credit(s): 3 Credits
This class introduces students how to analyze multilevel data where observations are nested within larger clusters, such as repeated measures nested within individuals, individuals nested within classrooms, and classrooms nested within schools. Advanced topics include longitudinal data analysis, discrete dependent variables, meta-analysis, and power and design considerations. Offered occasionally.
Prerequisite(s): EDR 6100

EDR 6600 - Designing Mixed Methods Research
Credit(s): 3 Credits
This course introduces students to the issues and principles of mixed methods research design, based on the collection of qualitative and quantitative data that inform one another and result in valid and credible research. Students will design a mixed methods study appropriate for proposed research questions, including a theoretical framework. Social justice will be emphasized as a framework for mixed methods projects. Offered periodically in fall.

EDR 6650 - Seminar: Reading Research
Credit(s): 3 Credits
Research techniques and findings are extensively reviewed. Offered occasionally.
