FORENSIC SCIENCE (FRSC)

FRSC 2600 - Survey of Forensic Science
Credit(s): 3 Credits
Students learn scientific methodology, its rules and norms, as applied in the biological and chemical analysis of crime and how these methodologies are used to evaluate legal arguments and solve legal issues. They also learn how the technical/scientific analysis articulates with the different components of the legal system.  
Attributes: Natural Science Req (A&S), Social Science Req (A&S)

FRSC 2930 - Special Topics
Credit(s): 3 Credits (Repeatable for credit)

FRSC 2980 - Independent Study
Credit(s): 1 or 3 Credits (Repeatable for credit)

FRSC 3620 - Chemical Forensics
Credit(s): 3 Credits
Chemical Forensics is the application of physical science to both the collection and analysis of evidence. This course will introduce various methodologies and applications of chemical and physical principles.
Prerequisite(s): FRSC 2600
Corequisite(s): FRSC 3621
Attributes: Natural Science Req (A&S), Social Science Req (A&S)

FRSC 3621 - Chemical Forensics Laboratory
Credit(s): 1 Credit
Forensic Chemistry lab will include hands on learning of techniques utilized in crime laboratories. This practical component will supplement the corresponding lecture taught in Forensic Chemistry and requires advanced laboratory skills.
Corequisite(s): FRSC 3620

FRSC 3630 - Forensic Biology
Credit(s): 3 Credits
This lecture/laboratory course is an overview of the biological evidence and techniques used in forensic science. Topics include pathology, fingerprinting, forensic anthropology, forensic entomology, serology, DNA hair analysis, botany and microbial forensics.
Prerequisite(s): FRSC 2600
Corequisite(s): FRSC 3631
Attributes: Natural Science Req (A&S), Social Science Req (A&S)

FRSC 3631 - Forensic Biology Laboratory
Credit(s): 1 Credit
Forensic Biology lab will include hands on learning of techniques utilized in crime laboratories. This practical component will supplement the corresponding lecture taught in Forensic Biology and requires advanced laboratory skills.
Corequisite(s): FRSC 3630

FRSC 3930 - Special Topics
Credit(s): 1-3 Credits (Repeatable for credit)

FRSC 3980 - Independent Study
Credit(s): 1 or 3 Credits (Repeatable for credit)

FRSC 4020 - Forensic Science Practicum I
Credit(s): 1-3 Credits (Repeatable for credit)
Fieldwork in forensic science at forensic labs, county morgue, and other governmental agencies, as well as business and private social service organizations. Approval of the instructor required. Every Semester.
Attributes: Social Science Req (A&S)

FRSC 4030 - Forensic Practicum II
Credit(s): 1-3 Credits (Repeatable for credit)
Continuation of fieldwork in forensic science at forensic labs, county morgues, and other governmental agencies, as well as business and private social service organizations. Approval of the instructor required. Every Semester.
Attributes: Social Science Req (A&S)

FRSC 4550 - Crime Scene Investigation Laboratory
Credit(s): 1 Credit
Crime Scene Investigation lab will utilize the techniques learned during the corresponding lecture to effectively process a crime scene start to finish. This is a hands on laboratory class which requires advanced skills in crime scene processing and forensic science techniques.
Corequisite(s): FRSC 4550

FRSC 4551 - Crime Scene Investigation Laboratory

FRSC 4610 - Death Investigation
Credit(s): 2 Credits
This course exposes the various forensic disciplines involved in a medicolegal death investigation and teaches the tools and techniques necessary to perform such an investigation. Disseminating this information is also covered. The course teaches the 29 national guidelines in Death Investigation: A Guide for the Scene Investigator. FRSC 2600 Introduction to Forensic Science is a prerequisite. Registration in this course requires concurrent registration in the Medicolegal Death Investigator Course sponsored by the Pathology department in the School of Medicine.
Prerequisite(s): FRSC 2600
Attributes: Social Science Req (A&S)

FRSC 4615 - Advanced Death Investigation
Credit(s): 2 Credits
This workshop is designed for the instruction of experienced medicolegal death investigators, forensic pathologists, law enforcement officers, forensic scientists, physicians, attorneys, and investigative personnel who have previous been trained in a basic death investigation program. This workshop will utilize the techniques learned in the corresponding lecture to effectively process a death investigation. This is a hands on workshop class which requires advanced skills in crime scene processing and forensic science techniques.
Prerequisite(s): FRSC 4610
Attributes: Social Science Req (A&S)
