FORENSIC SCIENCE (FRSC)

FRSC 2600 - Survey of Forensic Science
Credit(s): 3 Credits
Students learn scientific methodology, its rules and norms, as applied in the biological and chemical analysis of crime and how these methodologies are used to evaluate legal arguments and solve legal issues. They also learn how the technical/scientific analysis articulates with the different components of the legal system.
Attributes: Anthropology Elective, Natural Science Req (A&S), Social Science Req (A&S), UUC:Natural & Applied Science

FRSC 2800 - Professional Issues in Forensic Science
Credit(s): 3 Credits
This lecture course will explore the intersection of Forensic Science with topics such as ethics, courtroom/expert witness testimony, quality assurance, law, professional practice, and social justice. This class will allow students to bridge the gap between an introductory survey of forensics class and advanced classes by discussing topics that will affect their ability to succeed in the field of forensic science. The class will discuss current topics in the media and the role of the forensic scientist in these topics. (Offered in Fall and Spring)
Prerequisite(s): FRSC 2600
Restrictions: Enrollment is limited to students with a program in Forensic Science.
Attributes: Social Science Req (A&S), UUC:Social & Behavioral Sci

FRSC 2930 - Special Topics
Credit(s): 3 Credits (Repeatable for credit)

FRSC 2980 - Independent Study
Credit(s): 1 or 3 Credits (Repeatable for credit)

FRSC 3150X - True Crime: Forensic and Literary Perspectives
Credit(s): 3 Credits
This course examines the intersection of forensic science and literary/media history in several major true crime case studies. How does true crime portray or misconceive forensic science? How does true crime distinguish itself from other kinds of crime-related genres? Why do certain cases garner attention, and what kinds of cultural crises do they address? Students will learn techniques utilized in crime laboratories and sometimes apply those techniques to older case studies. They will also become adept close readers of a variety of texts, such as podcasts, documentaries, non-fiction novels, and newspaper articles.
Attributes: Literature Requirement (A&S), English Form & Genre, Forensic Science Elective, Literature BA Requirement(CAS), Literature BS Requirement(CAS), UUC:Collaborative Inquiry, UUC:Writing Intensive

FRSC 3400 - Digital Forensic Investigation
Credit(s): 3 Credits
Digital Forensic Investigation is the application of science and reasoning to investigate digital devices for the presence of evidence. This course will introduce various methodologies and applications of digital forensic investigations including computer and cell phone analysis.
Attributes: Forensic Science Elective, Social Science Req (A&S)

FRSC 3500 - Forensics and Law
Credit(s): 3 Credits
Forensics and Law will build on the survey of forensic science class and introduce more in-depth analysis of criminal law and our criminal justice system, strengthen the students understanding of the law and enhance the students’ ability to think critically and analytically. Moreover, the course will provide a platform to demonstrate practical applications of criminal law and procedure to forensics. This course will prepare the student to achieve higher levels of learning in their degree curriculum and serve as a solid foundation of knowledge for future work in forensic science.
Attributes: Social Science Req (A&S)

FRSC 3620 - Chemical Forensics
Credit(s): 2 Credits
Forensic Chemistry is the application of chemical methods to the analysis of evidence from a crime scene. This course will introduce types of forensic evidence processed by a forensic chemist and methods of analysis, with a focus on instrumentation.
Prerequisite(s): FRSC 2600
Corequisite(s): FRSC 3621
Attributes: Natural Science Req (A&S), Social Science Req (A&S)

FRSC 3621 - Chemical Forensics Laboratory
Credit(s): 1 Credit
Forensic Chemistry lab will include hands on learning of techniques utilized in crime laboratories. This practical component will supplement the corresponding lecture taught in Forensic Chemistry and requires advanced laboratory skills.
Corequisite(s): FRSC 3620

FRSC 3630 - Forensic Biology
Credit(s): 2 Credits
This course is the application of biological science to both the collection and analysis of evidence. This course will provide in-depth study of various methodologies and applications of biological principles and their applications to Forensic Science. Topics include Serology (Biological Screening), DNA analysis, DNA interpretation, and Bloodstain Pattern Analysis.
Prerequisite(s): FRSC 2600
Corequisite(s): FRSC 3631
Attributes: Natural Science Req (A&S), Social Science Req (A&S)

FRSC 3631 - Forensic Biology Laboratory
Credit(s): 1 Credit
Forensic Biology lab will include hands on learning of techniques utilized in crime laboratories. This practical component will supplement the corresponding lecture taught in Forensic Biology and requires advanced laboratory skills.
Corequisite(s): FRSC 3630

FRSC 3640 - Fingerprint
Credit(s): 3 Credits
This lecture/laboratory course is meant to serve as an introduction to the chemical and physical techniques used in the collection, preservation, documentation, analysis, and interpretation of pattern evidence, specifically fingerprint evidence. Topics include fingerprint enhancement, comparisons, and evaluations. During the laboratory component of the class students will apply the theory learned to the processing of mock evidence for fingerprints in a variety of ways.
Attributes: Forensic Science Elective, Social Science Req (A&S)

**FRSC 4610 - Death Investigation**
- Credit(s): 2 Credits
- This course exposes the various forensic disciplines involved in a medicolegal death investigation and teaches the tools and techniques necessary to perform such an investigation. Disseminating this information is also covered. The course teaches the 29 national guidelines in Death Investigation: A Guide for the Scene Investigator. FRSC 2600 Introduction to Forensic Science is a prerequisite. Registration in this course requires concurrent registration in the Medicolegal Death Investigator Course sponsored by the Pathology department in the School of Medicine.
- Prerequisite(s): FRSC 2600
- Attributes: Forensic Science Elective, Social Science Req (A&S)

**FRSC 4615 - Advanced Death Investigation**
- Credit(s): 2 Credits
- This workshop is designed for the instruction of experienced medicolegal death investigators, forensic pathologists, law enforcement officers, forensic scientists, physicians, attorneys, and investigative personnel who have previous been trained in a basic death investigation program. e.g. SOC 4610.
- Prerequisite(s): FRSC 4610
- Attributes: Forensic Science Elective, Social Science Req (A&S)

**FRSC 4650 - Advanced Crime Scene Reconstruction**
- Credit(s): 2 Credits
- Crime Scene Reconstruction is the application of science and reasoning to try and piece together what happened at a crime scene and in what order those events happened. This course will introduce various methodologies and applications of crime scene reconstruction including bloodstain pattern analysis and shooting reconstruction.
- Prerequisite(s): FRSC 4550
- Corequisite(s): FRSC 4651
- Attributes: Forensic Science Elective, Social Science Req (A&S)

**FRSC 4750 - Forensic Science Senior Seminar**
- Credit(s): 1 Credit
- A seminar course required as a culminating experience for all seniors majoring in Forensic Science. This capstone course integrates prior learning while exploring current research, contemporary issues and professional standards in forensic science.
- Attributes: Social Science Req (A&S)

**FRSC 4910 - Internship**
- Credit(s): 1-6 Credits (Repeatable for credit)
- Attributes: UUC:Reflection-in-Action

**FRSC 4930 - Special Topics**
- Credit(s): 1-3 Credits (Repeatable for credit)
FRSC 4960 - Capstone in Forensic Science
Credit(s): 3 Credits (Repeatable up to 6 credits)
This course provides the opportunity for students to synthesize the knowledge and skills they have gained from previous courses. In the process of examining conventional common sense assumptions, students are encouraged to think critically and deeply about themselves and the world in which they live and how Forensic Science contributes to the world. Students will be working on real life problems related to Forensic Science and may include cold case reviews and/or legal reviews of cases.
Prerequisite(s): FRSC 2600; FRSC 3630; FRSC 3620
Restrictions: Enrollment is limited to students with a major in Forensic Science.
Attributes: Special Approval Required, Social Science Req (A&S)

FRSC 4970 - Independent Research in Forensic Science
Credit(s): 3 Credits (Repeatable up to 6 credits)
This course provides students with research experience under the general guidance of a faculty member. Student involvement in various components of the faculty member’s research project(s) is the typical form. The course provides competitive advantages for students interested in applying to graduate schools.
Prerequisite(s): FRSC 2600; FRSC 3630; FRSC 3620
Restrictions: Enrollment is limited to students with a major in Forensic Science.
Attributes: Special Approval Required, Social Science Req (A&S)

FRSC 4980 - Independent Study
Credit(s): 1-3 Credits (Repeatable for credit)

FRSC 5610 - Death Investigation
Credit(s): 2 Credits (Repeatable for credit)
This course exposes the various forensic disciplines involved in a medicolegal death investigation and teaches the tools and techniques necessary to perform such an investigation. Disseminating this information is also covered. The course teaches the 29 national guidelines in Death Investigation: A Guide for the Scene Investigator. Registration in this course requires concurrent registration in the Medicolegal Death Investigator Course sponsored by the Pathology department in the School of Medicine. (Offered annually)

FRSC 5615 - Advanced Death Investigation
Credit(s): 2 Credits (Repeatable for credit)
This workshop is designed for the instruction of experienced medicolegal death investigators, forensic pathologists, law enforcement officers, forensic scientists, physicians, attorneys, and investigative personnel who have previously been trained in a basic death investigation program. (Offered occasionally)
