INTL 5000 - The Intelligence Cycle  
Credit(s): 0 or 3 Credits  
This course focuses on intelligence collection, production, and analysis and provides an in-depth overview of the U.S. Intelligence Community (IC). It explores the authorities under which the IC operates, its role in informing U.S. national security and foreign policy, and its role in implementing policy decisions.

INTL 5050 - Terrorism & US Foreign Policy  
Credit(s): 0 or 3 Credits  
This course focuses on the changing face of terrorism, from a global endeavor to garner support for a cause to small cells bent on causing harm. This course explores terrorism as a global phenomenon and its effect on US Foreign Policy. In addition, the course will emphasize various options and constraints used to prevent and defeat terrorists.  
Prerequisite(s): INTL 5000

INTL 5100 - Counter Intelligence & Espionage  
Credit(s): 0 or 3 Credits  
This course allows students to explore classic examples of intelligence gathering and espionage. Beginning with ancient examples and working through the Middle Ages, the course notes advances to the profession through modern times. The course encourages students to consider how historical forms of intelligence and espionage have influenced current practices.  
Prerequisite(s): INTL 5000

INTL 5200 - Cyber Operations and National Security  
Credit(s): 0 or 3 Credits  
This course examines the relationship between technology and national security. Major issues discussed in the course include cyber security, hacking, data integrity, and the role of government in offensive and defensive cyber operations. The course will encourage students to integrate and examine in depth the impact of technology on traditional intelligence efforts.

INTL 5250 - Structured Analytical Techniques for Intelligence  
Credit(s): 0 or 3 Credits  
This course exposes students to a wide range of structured analytic techniques used in intelligence analysis and security. The course uses structured analysis as a methodological approach to security and intelligence issues, distinct from quantitative and qualitative methods using empirical data. The course allows students to learn and practice structured analytic techniques and apply the methods to various case studies.  
Prerequisite(s): INTL 5000

INTL 5260 - Military Intelligence  
Credit(s): 0 or 3 Credits  
This course exposes students to the four levels of strategy in a national security context. Students will examine the use of intelligence in the warning of, preparation for, and conduct of war. The course will then focus primarily on military strategy. Students will critically examine topics including civil-military relations, land warfare, naval warfare, theories of airpower, insurgency and counterinsurgency, and nuclear strategy as related to intelligence.  
Prerequisite(s): INTL 5000

INTL 5270 - Open Source Intelligence  
Credit(s): 0 or 3 Credits  
This course provides and examination of the various unclassified materials including: news services, data bases, government documents, newspapers, journals, magazines, social media, radio and TV sources, short-wave broadcasts, internet, indexes, and materials from various organizations. Students will find, extract and exploit information that is readily available through open sources. Students will understand how to integrate open source intelligence into finished intelligence.  
Prerequisite(s): INTL 5000

INTL 5280 - Congress and the Intelligence Community  
Credit(s): 0 or 3 Credits  
This course will examine the interplay between the laws, practices and policies of the United States Intelligence Community and how they are influenced by the US Congress. While discussion of the history of intelligence activities with congress and laws dating from the origins of our colonial days will necessarily shape the framework of the class, the focus shall particularly be on current debates and challenges faced by the United States Congress and its role in Intelligence and National Security in the 21st Century.  
Prerequisite(s): INTL 5000

INTL 5290 - Intelligence Cycle  
Credit: 0 or 3 Credits  
This course focuses on intelligence cycle, from collection through production and dissemination. Students will be exposed to different tools and techniques used in the intelligence community. The course will emphasize the importance of proper intelligence collection, accurate analysis, and timely dissemination of intelligence products to decision-makers. Students will critically examine topics including the role of the intelligence community in national security, the use of technology in intelligence gathering, and the importance of maintaining quality standards in intelligence products.  
Prerequisite(s): INTL 5000

INTL 5300 - National Security in the 21st Century  
Credit: 0 or 3 Credits  
This course focuses on the evolving landscape of national security in the 21st Century. Students will examine the impact of various factors, including globalization, cyber threats, terrorism, and climate change, on national security. The course will analyze the role of the United States and its allies in addressing these challenges, as well as the importance of international cooperation in maintaining global security. Students will critically evaluate different strategies and policies for addressing these issues.  
Prerequisite(s): INTL 5000

INTL 5310 - Cyber Operations and National Security  
Credit: 0 or 3 Credits  
This course examines the relationship between technology and national security. Students will explore major cyber threats, including hacking, data breaches, and cyber attacks, and analyze how these threats impact national security. The course will also examine the role of government in offensive and defensive cyber operations. Students will critically evaluate different strategies and policies for addressing cyber threats.  
Prerequisite(s): INTL 5000

INTL 5320 - Counterintelligence & Espionage  
Credit: 0 or 3 Credits  
This course allows students to explore classic examples of intelligence gathering and espionage. Beginning with ancient examples and working through the Middle Ages, the course notes advances to the profession through modern times. The course encourages students to consider how historical forms of intelligence and espionage have influenced current practices.  
Prerequisite(s): INTL 5000

INTL 5330 - Special Topics  
Credit: 0 or 3 Credits (Repeatable for credit)  
This course provides an opportunity for students to explore specialized topics in Intelligence and National Security. The course content will vary with each offering, reflecting current events, emerging trends, and cutting-edge developments in the field.  
Prerequisite(s): INTL 5000

INTL 5340 - Internship Experience in Strategic Intelligence  
Credit: 1-3 Credits  
This course provides students with an opportunity to complete an internship that requires them to apply the concepts and skills learned in their specific program of study. Prior to registration, students intending to complete this course are expected to have a formal letter from the organization providing details of the work expected from the student during the 8-weeks that constitute the length of the internship. The letter must be signed by an individual with appropriate authority from the organization sponsoring the internship. In addition, the internship is subject to approval by the program director who will assess the alignment between.  
Prerequisite(s): INTL 5000

INTL 5910 - Internship Experience in Strategic Intelligence  
Credit: 1-3 Credits  
This course provides students with an opportunity to complete an internship that requires them to apply the concepts and skills learned in their specific program of study. Prior to registration, students intending to complete this course are expected to have a formal letter from the organization providing details of the work expected from the student during the 8-weeks that constitute the length of the internship. The letter must be signed by an individual with appropriate authority from the organization sponsoring the internship. In addition, the internship is subject to approval by the program director who will assess the alignment between.  
Prerequisite(s): INTL 5000

INTL 5930 - Special Topics  
Credit: 0 or 3 Credits (Repeatable for credit)  
This course provides an opportunity for students to explore specialized topics in Intelligence and National Security. The course content will vary with each offering, reflecting current events, emerging trends, and cutting-edge developments in the field.  
Prerequisite(s): INTL 5000

INTL 5960 - Masters Research Project  
Credit: 1 Credit  
This course emphasizes a synthesis and demonstration of the competencies gained during a student's time in the MS Strategic Intelligence program. This is the second course in a three-part sequence of courses. At the end of this credit hour, students will have identified the purpose and scope of the problem they intend to address.

INTL 5961 - Intel Masters Research Project I  
Credit: 1 Credit  
The Master's Research Project (MRP) emphasizes a synthesis and demonstration of the competencies gained during a student's time in the MS Strategic Intelligence program. This is the first course in a three-part sequence of courses. At the end of this credit hour, students will have identified the purpose and scope of the problem they intend to address.

INTL 5962 - Intel Masters Research Project II  
Credit: 1 Credit  
The Master's Research Project (MRP) emphasizes a synthesis and demonstration of the competencies gained during a student's time in the MS Strategic Intelligence program. This is the second course in a three-part sequence of courses. At the end of this credit hour, students will have created an applied research design that includes a proposal for addressing the organizational problem that was identified and described in INTL 5961.  
Prerequisite(s): INTL 5961 with a grade of S or higher

INTL 5963 - Intel Masters Research Project III  
Credit: 1 Credit  
The Master's Research Project (MRP) emphasizes a synthesis and demonstration of the competencies gained during a student's time in the MS Strategic Intelligence program. This is the third course in a three-part sequence of courses. At the end of this credit hour, students will have completed an applied research project that integrates open source intelligence into finished intelligence.  
Prerequisite(s): INTL 5962 with a grade of S or higher
INTL 5963 - Intel Masters Research Project III
Credit(s): 1 Credit
The Master's Research Project (MRP) emphasizes a synthesis and
demonstration of the competencies gained during a student's time
in the MS Strategic Intelligence program. This is the third course in a
three-part sequence of courses. At the end of this credit hour, students
will have implemented an applied research project to address an
organizational or societal problem, written a formal report of findings and
recommendations, and produced a reflection of their experiences and its
implications for their future.
Prerequisite(s): INTL 5962 with a grade of S or higher

INTL 5980 - Independent Study
Credit(s): 1 or 3 Credits (Repeatable for credit)
