## MATHEMATICS (MATH)

### MATH 0235 - Intro Elementary Algebra
- **Credit(s):** 3 Credits
- **Prerequisite:** Math Assessment.
- **Attributes:** Prof. Studies Students Only

### MATH 0240 - Intro Elementary Algebra I
- **Credit(s):** 3 Credits
- **Prerequisite(s):** MATH 0260 or SLU Math Placement with a minimum score of 0260
- **Course:** Review of the real number system; linear equations, and inequalities in one and two variables; functions; systems of linear equations. Fall. MATH 0240 and MATH 0250 together cover the same material as MATH 0260, but in two semesters.

### MATH 0250 - Intro to Elementary Algebra II
- **Credit(s):** 3 Credits
- **Prerequisite(s):** MATH 0240 with a grade of C- or higher
- **Course:** Review of the real number system; linear equations, and inequalities in one and two variables; functions; systems of linear equations; exponents, polynomials and polynomial functions; factoring; rational expressions and functions; roots, radicals and root functions; quadratic equations, inequalities and functions. Spring. MATH 0240 and MATH 0250 together cover the same material as MATH 0260, but in two semesters.

### MATH 0260 - Intermediate Algebra
- **Credit(s):** 0-3 Credits
- **Prerequisite(s):** MATH 0250 with a grade of C- or higher, Math Waiver per Advisor with a minimum score of 1200, or SLU Math Placement with a minimum score of 1400
- **Course:** Review of the real number system; linear equations, and inequalities in one and two variables; functions; systems of linear equations; exponents, polynomials and polynomial functions; factoring; rational expressions and functions; roots, radicals and root functions; quadratic equations, inequalities and functions. Fall and spring.

### MATH 0265 - Intermediate Algebra
- **Credit(s):** 3 Credits
- **Prerequisite(s):** MATH 0260 or SLU Math Placement with a minimum score of 0260
- **Course:** Review of the real number system; linear equations, and inequalities in one and two variables; functions; systems of linear equations; exponents, polynomials and polynomial functions; factoring; rational expressions and functions; roots, radicals and root functions; quadratic equations, inequalities and functions. Fall and spring.

### MATH 0230 - College Algebra
- **Credit(s):** 3 Credits
- **Prerequisite(s):** MATH 0260 or SLU Math Placement with a minimum score of 1400
- **Course:** Brief review of algebraic essentials, graphs, functions and their graphs, linear and quadratic functions, polynomial and rational functions, exponential and logarithmic functions, systems of linear equations. Intended for students needing more preparation before taking MATH 1320 or MATH 1400. (Offered every Fall, Spring and Summer)

### MATH 1220 - Finite Mathematics
- **Credit(s):** 3 Credits
- **Prerequisite(s):** MATH 0260 with a grade of C- or higher, Math Waiver per Advisor with a minimum score of 250, MATH 0260 with a grade of C- or higher, or SLU Math Placement with a minimum score of 0260
- **Course:** Linear equations and straight lines, matrices, sets and counting, probability and statistics, the mathematics of finance, and logic.

### MATH 1240 - Mathematics and the Art of M.C. Escher
- **Credit(s):** 3 Credits
- **Prerequisite(s):** MATH 1200 with a grade of C- or higher, Math Waiver per Advisor with a minimum score of 1200, or SLU Math Placement with a minimum score of 1400
- **Course:** An inquiry course open to all undergraduates. The art of M.C. Escher is used to explore topics in geometry such as symmetry, tessellations, wallpaper patterns, the geometry of the sphere and hyperbolic geometry. Taught in a computer classroom.

### MATH 1250 - Math Thinking in Real World
- **Credit(s):** 3 Credits
- **Prerequisite(s):** MATH 1200 with a grade of C- or higher, Math Waiver per Advisor with a minimum score of 1200, or SLU Math Placement with a minimum score of 1400
- **Course:** An inquiry course open to all undergraduates. In this course, aimed at students in the humanities and social sciences, we study some of the greatest ideas of mathematics that are often hidden from view in lower division courses. Topics selected from number theory, the infinite, geometry, topology, chaos and fractals, and probability. Taught in a computer classroom.

### MATH 1260 - Statistics Including Sports and Politics
- **Credit(s):** 3 Credits
- **Prerequisite(s):** MATH 1200 with a grade of C- or higher, Math Waiver per Advisor with a minimum score of 1200, or SLU Math Placement with a minimum score of 1400
- **Course:** An inquiry course open to all undergraduates. Producing data through the use of samples and experiments; organizing data through graphs and numbers that describe the distribution of the data of one variable or the relationship between two variables; probability; statistical inference including confidence intervals and tests of significance.

### UUC:Quantitative Reasoning

### Mathematics (MATH) 2022-2023
MATH 1300 - Elementary Statistics with Computers
Credit(s): 3 Credits
Data production and analysis; probability basics, distributions; sampling, estimation with confidence intervals, hypothesis testing, t-test; correlation and regression; crosstabulations and chi-square. Students learn to use a statistical package such as R.
Prerequisite(s): (1 Course from MATH 1200-4999, Math Waiver per Advisor with a minimum score of 1200, or SLU Math Placement with a minimum score of 1200)
Attributes: Bio-Chemical Biology Elective, Mathematics BA Req (A&S), UUC:Quantitative Reasoning

MATH 1300X - Elementary Statistics with Computers
Credit(s): 3 Credits
Data production and analysis; probability basics, distributions; sampling, estimation with confidence intervals, hypothesis testing, t-test; correlation and regression; Cross tabulations and chi-square. Students learn to use a statistical package such as SPSS. Credit not given for STAT 1300 and any of the following: MATH 1300 or OPM 2070.
Attributes: Bio-Chemical Biology Elective, Mathematics BA Req (A&S), UUC:Quantitative Reasoning

MATH 1320 - Survey of Calculus
Credit(s): 3 Credits
Linear equations and graphs; functions and graphs; limits; the derivative; rules of differentiation; curve sketching and optimization; antiderivatives; the definite integral; multivariable calculus and partial derivatives. (Offered every Fall, Spring and Summer)
Prerequisite(s): (MATH 1200 with a grade of C- or higher, Math Waiver per Advisor with a minimum score of 1200, or SLU Math Placement with a minimum score of 1400)
Attributes: Mathematics BA Req (A&S), UUC:Quantitative Reasoning

MATH 1325 - Survey of Calculus
Credit(s): 3 Credits
Linear equations and graphs; functions and graphs; limits; the derivative; rules of differentiation; curve sketching and optimization; antiderivatives; the definite integral; multivariable calculus and partial derivatives. (Offered every Fall, Spring and Summer)
Prerequisite(s): (MATH 1200 with a grade of C- or higher, Math Waiver per Advisor with a minimum score of 1200, or SLU Math Placement with a minimum score of 1400)
Attributes: Mathematics BA Req (A&S), UUC:Quantitative Reasoning

MATH 1350 - Pre-Calculus
Credit(s): 0 or 3 Credits
Functions, graphs and models; modeling with linear and quadratic functions; polynomial and rational functions; modeling with exponential and logarithmic functions; trigonometric functions; trigonometric identities and conditional equations; additional topics in trigonometry; additional topics in analytic geometry; parametric equations. (Offered every Fall, Spring and Summer)
Prerequisite(s): (Math Waiver per Advisor with a minimum score of 1200, MATH 1200 with a grade of C- or higher, or SLU Math Placement with a minimum score of 1400)
Attributes: Mathematics BA Req (A&S), UUC:Quantitative Reasoning

MATH 1351 - Calculus I
Credit(s): 0 or 4 Credits
Functions; continuity; limits; the derivative; differentiation from graphical, numerical and analytical viewpoints; optimization and modeling; rates and related rates; the definite integral; antiderivatives from graphical, numerical and analytical viewpoints. (Offered every Fall, Spring and Summer)
Prerequisite(s): (Math Waiver per Advisor with a minimum score of 1400, MATH 1400 with a grade of C- or higher, or SLU Math Placement with a minimum score of 1510)
Attributes: Mathematics BA Req (A&S), Mathematics BS Req (A&S), UUC:Quantitative Reasoning

MATH 1510 - Calculus I
Credit(s): 0 or 4 Credits
Functions; continuity; limits; the derivative; differentiation from graphical, numerical and analytical viewpoints; optimization and modeling; rates and related rates; the definite integral; antiderivatives from graphical, numerical and analytical viewpoints. (Offered every Fall, Spring and Summer)
Prerequisite(s): (Math Waiver per Advisor with a minimum score of 1510, MATH 1510 with a grade of C- or higher, AP Calculus AB with a minimum score of 4, or SLU Math Placement with a minimum score of 1520)
Attributes: Mathematics BA Req (A&S), Mathematics BS Req (A&S), UUC:Quantitative Reasoning

MATH 1520 - Calculus II
Credit(s): 0 or 4 Credits
Symbolic and numerical techniques of integration, improper integrals, applications using the definite integral, sequences and series, power series, Taylor series, differential equations. (Offered every Fall, Spring and Summer)
Prerequisite(s): (Math Waiver per Advisor with a minimum score of 1510, MATH 1510 with a grade of C- or higher, AP Calculus AB with a minimum score of 4, or SLU Math Placement with a minimum score of 1520)
Attributes: Mathematics BA Req (A&S), Mathematics BS Req (A&S), UUC:Quantitative Reasoning

MATH 1660 - Discrete Mathematics
Credit(s): 3 Credits
Concepts of discrete mathematics used in computer science; sets, sequences, strings, symbolic logic, proofs, mathematical induction, sums and products, number systems, algorithms, complexity, graph theory, finite state machines.
Prerequisite(s): (MATH 1200 with a grade of C- or higher, Math Waiver per Advisor with a minimum score of 1200, or SLU Math Placement with a minimum score of 1400)
Attributes: Mathematics BA Req (A&S), Mathematics BS Req (A&S)

MATH 1930 - Special Topics
Credit(s): 1-3 Credits (Repeatable for credit)
Attributes: Mathematics BA Req (A&S), Mathematics BS Req (A&S)

MATH 1980 - Independent Study
Credit(s): 1-3 Credits (Repeatable for credit)
Attributes: Mathematics BA Req (A&S), Mathematics BS Req (A&S)

MATH 2530 - Calculus III
Credit(s): 4 Credits
Three-dimensional analytic geometry, vector-valued functions, partial differentiation, multiple integration, and line integrals. (Offered every Fall and Spring)
Prerequisite(s): (MATH 1520 with a grade of C- or higher, Math Waiver per Advisor with a minimum score of 1520, or SLU Math Placement with a minimum score of 2530)
Attributes: Geospatial Elective, Mathematics BA Req (A&S), Mathematics BS Req (A&S), UUC:Quantitative Reasoning

MATH 2660 - Principles of Mathematics
Credit(s): 3 Credits
Introduction to the basic techniques of writing proofs and to fundamental ideas used throughout mathematics. Topics covered include formal logic, proof by contradiction, set theory, mathematical induction and recursion, relations and congruence, functions. Offered every Fall and Spring.
Prerequisite(s): (MATH 1510, Math Waiver per Advisor with a minimum score of 1510, or SLU Math Placement with a minimum score of 1520)
Attributes: Mathematics BA Req (A&S), Mathematics BS Req (A&S), UUC:Quantitative Reasoning
MATH 2690 - Mathematical Problem Solving
Credit(s): 1 Credit
Intended primarily to train students for the William Lowell Putnam Mathematics Competition, this course covers a melange of ingenious techniques for solving mathematics problems cutting across the entire undergraduate spectrum, including pre-calculus, calculus, combinatorics, probability, inequalities. Coverage tailored to students' interests. Offered every Fall
Attributes: Mathematics BA Req (A&S), Mathematics BS Req (A&S)

MATH 2930 - Special Topics
Credit(s): 1-4 Credits (Repeatable for credit)
Attributes: Mathematics BA Req (A&S), Mathematics BS Req (A&S)

MATH 2980 - Independent Study
Credit(s): 0-3 Credits (Repeatable for credit)
Prior approval of sponsoring professor and chair required.
Attributes: Mathematics BA Req (A&S), Mathematics BS Req (A&S)

MATH 3110 - Linear Algebra for Engineers
Credit(s): 3 Credits
Systems of linear equations, matrices, linear programming, determinants, vector spaces, inner product spaces, eigenvalues and eigenvectors, linear transformations, and numerical methods. Credit not given for both MATH 3110 and MATH 3120. Does not satisfy any requirements for the mathematics major. (Offered every Fall)
Prerequisite(s): (MATH 1520 with a grade of C- or higher or SLU Math Placement with a minimum score of 2530)
Attributes: Geospatial Elective

MATH 3120 - Introduction to Linear Algebra
Credit(s): 3 Credits
Matrices, row operations with matrices, determinants, systems of linear equations, vector spaces, linear transformations, inner products, eigenvalues and eigenvectors. Credit not given for both MATH 3110 and MATH 3120. (Offered every Fall and Spring)
Prerequisite(s): MATH 2530; MATH 2660

MATH 3240 - Numerical Analysis
Credit(s): 3 Credits
Review of calculus; root finding, nonlinear systems, interpolation and approximation; numerical differentiation and integration.
Prerequisite(s): (MATH 1520, Math Waiver per Advisor with a minimum score of 1520, Math Waiver per Advisor with a minimum score of 2530)

MATH 3270 - Advanced Mathematics for Engineers
Credit(s): 3 Credits
Vector algebra; matrix algebra; systems of linear equations; eigenvalues and eigenvectors; systems of differential equations; vector differential calculus; divergence, gradient and curl; vector integral calculus; integral theorems; Fourier series with applications to partial differential equations. (Offered every Fall and Spring)
Prerequisite(s): MATH 3550

MATH 3550 - Differential Equations
Credit(s): 3 Credits
Solution of ordinary differential equations, higher order linear equations, constant coefficient equations, systems of first order equations, linear systems, equilibrium of nonlinear systems, Laplace transformations.
Prerequisite(s): (MATH 2530 or Math Waiver per Advisor with a minimum score of 2530)
Attributes: Geospatial Elective

MATH 3600 - Combinatorics
Credit(s): 3 Credits
Advanced counting methods: permutations and combinations, generalized permutations and combinations, recurrence relations, generating functions; algorithms: graphs and digraphs, graph algorithms: minimum-cost spanning trees, shortest path, network flows; depth first and breadth-first searches; combinational algorithms: resource scheduling, bin-packing: algorithmic analysis and NP completeness.
Prerequisite(s): (MATH 1510 or Math Waiver per Advisor with a minimum score of 1510)

MATH 3760 - Financial Mathematics
Credit(s): 3 Credits
This course covers the theory of interest material for the Financial Mathematics exam of the Society of Actuaries. Time permitting, supplemental material covering financial derivatives will be discussed.
Prerequisite(s): (MATH 1520 or SLU Math Placement with a minimum score of 2530)

MATH 3800 - Elementary Theory of Probability
Credit(s): 3 Credits
Counting theory; axiomatic probability, random variables, expectation, limit theorems. Applications of the theory of probability to a variety of practical problems. Credit not given toward the math major or minors for both MATH 3800 and either MATH 3810 or MATH 4800. (Offered every Fall)
Prerequisite(s): MATH 2530

MATH 3850 - Foundation of Statistics
Credit(s): 3 Credits
Descriptive statistics, probability distributions, random variables, expectation, independence, hypothesis testing, confidence intervals, regression and ANOVA. Applications and theory. Taught using statistical software. Credit not given toward the math major or minors for both MATH 3810 and MATH 3850 / STAT 3850.
Prerequisite(s): MATH 1520
Attributes: Bio-Chemical Biology Elective

MATH 3910 - Internship
Credit(s): 1-6 Credits (Repeatable for credit)
Attributes: UUC:Reflection-in-Action

MATH 3930 - Special Topics
Credit(s): 0-3 Credits (Repeatable for credit)

MATH 3980 - Independent Study
Credit(s): 1-3 Credits (Repeatable for credit)

MATH 4050 - History of Mathematics
Credit(s): 3 Credits
The development of several important branches of mathematics, including numeration and computation, algebra, non-Euclidean geometry, and calculus. (Offered periodically)
Prerequisite(s): MATH 1520

MATH 4110 - Introduction to Abstract Algebra
Credit(s): 3 Credits
Elementary properties of the integers, sets and mappings, groups, rings, integral domains, division rings and fields. (Offered every Fall)
Prerequisite(s): MATH 3120

</table>
MATH 5011 - Introduction to Abstract Algebra  
Credit(s): 3 Credits  
Elementary properties of the integers, sets and mappings, groups, rings, integral domains, division rings and fields.

MATH 5012 - Linear Algebra  
Credit(s): 3 Credits  
Advanced linear algebra including linear transformations and duality, elementary canonical forms, rational and Jordan forms, inner product spaces, unitary operators, normal operators, and spectral theory. (Offered every other spring semester)

MATH 5015 - Number Theory  
Credit(s): 3 Credits  
Introduction to algebraic number theory. Topics will include primes, Chinese remainder theorem, Diophantine equations, algebraic numbers and quadratic residues. Additional topics will vary from year to year. (Offered every other spring semester)  
Prerequisite(s): MATH 5011

MATH 5021 - Introduction to Analysis  
Credit(s): 3 Credits  
Real number system, functions, sequences, limits, continuity, differentiation, integration and series.  
Attributes: Bioinformatics & Comp Bio Elec

MATH 5022 - Metric Spaces  
Credit(s): 3 Credits  
Set theory, real line, separation properties, compactness, metric spaces, metrization. (Offered every other spring semester)  
Prerequisite(s): MATH 5021

MATH 5023 - Multivariable Analysis  
Credit(s): 3 Credits  
Sequences and Series of functions, Differentiability, Integrability, Inverse and Implicit function theorems, Fundamental Theorems of Multi-variable Calculus (Green's Theorem, Stokes Theorem, Divergence Theorem). (Offered every other spring semester)  
Prerequisite(s): MATH 5021

MATH 5080 - Probability Theory  
Credit(s): 3 Credits  
Axioms of probability, conditional probability. Discrete and continuous random variables, expectation, jointly defined random variables. Transformations of random variables and limit theorems. Theory and applications, taught using statistical software.  
Attributes: Bioinformatics & Comp Bio Elec

MATH 5110 - Algebra I  
Credit(s): 3 Credits  
Simple properties of groups, groups of transformations, subgroups, homomorphisms and isomorphisms, theorems of Schreier and Jordan-Hölder, mappings into a group, rings, integral domains, fields, polynomials, direct sums and modules. (Offered every Fall)

MATH 5120 - Algebra II  
Credit(s): 3 Credits  
Rings, fields, bases and degrees of extension fields, transcendental elements, normal fields and their structures. Galois theory, finite fields; solutions of equations by radicals, general equations of degree n. (Offered every Spring)  
Prerequisite(s): MATH 5110

MATH 5210 - Real Analysis  
Credit(s): 3 Credits  
The topology of the reals, Lebesgue and Borel measurable functions, properties of the Lebesque integral, differential of the integral. Offered every Fall semester.

MATH 5220 - Complex Analysis  
Credit(s): 3 Credits  
Holomorphic and Harmonic functions and power series expansions. Complex integration, Cauchy's theorem and applications, Laurent series, singularities, Runge's theorem, and the calculus of residues. Additional topics may include Analytic continuation, Riemann surfaces, and conformal mapping. (Offered periodically)  
Prerequisite(s): MATH 5210; MATH 5310

MATH 5230 - Functional Analysis  
Credit(s): 3 Credits  
Banach and Hilbert spaces. Linear functions and linear operators. Dual spaces, weak and weak topologies. Hahn-Banach, Closed Graph and Open Mapping Theorems. Topological Vector spaces. (Offered periodically)  
Prerequisite(s): MATH 5210; MATH 5310

MATH 5240 - Harmonic Analysis  
Credit(s): 3 Credits  
Fourier Series on the circle, Convergence of Fourier series, Conjugate and maximal functions, Interpolation of Linear Operators, Lacunary Sequences, Fourier Transform on the line, Fourier transform on locally compact Abelian groups. MATH 5310 is recommended. (Offered periodically)  
Prerequisite(s): MATH 5210

MATH 5310 - General Topology I  
Credit(s): 3 Credits  
Topological spaces, convergence, nets, product spaces, metrization, compact spaces, connected spaces. (Offered every Fall)

MATH 5320 - General Topology II  
Credit(s): 3 Credits  
Compact surfaces, fundamental groups, force groups and free products, Seifert-van Kampen theorem, covering spaces. Offered every Spring semester.

MATH 5910 - Internship  
Credit(s): 1-3 Credits  
Prior permission of instructor and chairperson required.

MATH 5930 - Special Topics in Mathematics  
Credit(s): 1-3 Credits (Repeatable for credit)

MATH 5980 - Graduate Reading Course  
Credit(s): 1-3 Credits (Repeatable for credit)

MATH 5990 - Thesis Research  
Credit(s): 0-6 Credits (Repeatable for credit)

MATH 6180 - Topics in Analysis  
Credit(s): 3 Credits (Repeatable for credit)

MATH 6280 - Topics in Algebra  
Credit(s): 3 Credits (Repeatable for credit)

MATH 6810 - Topics in Algebra  
Credit(s): 3 Credits (Repeatable for credit)

MATH 6820 - Topics in Analysis  
Credit(s): 3 Credits (Repeatable for credit)

MATH 6830 - Topics in Algebra  
Credit(s): 3 Credits (Repeatable for credit)
MATH 6310 - Algebraic Topology  
Credit(s): 3 Credits  
Homotopy theory, homology theory, exact sequences, Mayer-Vietoris sequences, degrees of maps, cohomology, Künneth formula, cup and cap products, applications to manifolds including Poincaré-Lefshetz duality. Offered every other year.  
Prerequisite(s): MATH 5320

MATH 6380 - Topics in Topology  
Credit(s): 3 Credits (Repeatable for credit)  
Various topics are offered to bring graduate students to the forefront of a research area in topology. Times of offering in accordance with research interests of faculty. Offered occasionally.

MATH 6410 - Differential Geometry I  
Credit(s): 3 Credits  
The theory of differentiable manifolds, topological manifolds, differential calculus of several variables, smooth manifolds and submanifolds, vector fields and ordinary differential equations, tensor fields, integration and De Rham cohomology. Offered every Fall semester.  
Prerequisite(s): MATH 5320

MATH 6420 - Differential Geometry II  
Credit(s): 3 Credits  
Continuation of MATH-6410. (Offered every Spring)  
Prerequisite(s): MATH 6410

MATH 6930 - Special Topics  
Credit(s): 3 Credits (Repeatable for credit)

MATH 6980 - Graduate Reading Course  
Credit(s): 1-3 Credits (Repeatable for credit)  
Prior permission of instructor and chairperson required.

MATH 6990 - Dissertation Research  
Credit(s): 0-6 Credits (Repeatable for credit)
