MEDICINE (MED)

MED 0101 - Clinical Interviewing
Credit(s): 1-15 Credits (Repeatable for credit)
In Clinical Interviewing, students will achieve the following goals:
- Demonstrate effective patient interviewing skills
- Adapt the clinical interview based on the impact of the social determinants of health
- Engage in activities that promote professionalism and student wellness.
To achieve these goals, the course is a combination of lecture, small group activities, standardized patient interviews, and self-directing learning. Course Directors and Instructors will weave the LCME standards, hot topics, SLU SOM competencies, and ACGME Entrustable Professional Behaviors throughout the course, and content will come from best practices and national resources in medical student education.

MED 0201 - Clinical Diagnosis
Credit(s): 1-20 Credits

MED 0202 - Clinical Diagnosis
Credit(s): 1-30 Credits (Repeatable for credit)
