MLS 3150 - Urinalysis and Immunology Laboratory  
Credit(s): 1 Credit  
A laboratory course designed to provide hands-on laboratory experiences in the analysis of urine and other body fluids to include spinal fluid using real patient samples. Students will learn and perform the three phases of urine analysis to include the physical, chemical and microscopic evaluation of a urine sample. The principles of urinalysis testing will be discussed along with the clinical significance of the various procedures used in testing urine and their role in disease diagnosis. Physical analysis and cell counting procedures will be performed and discussed on various body fluids.  
Prerequisite(s): BIOL 1240 with a grade of C- or higher  
Corequisite(s): BLS 3110

Restrictions: Enrollment is limited to students with a major in Medical Laboratory Science.

MLS 3210 - Clinical Education & Laboratory Management  
Credit(s): 2 Credits  
This course provides an overview of basic principles of education and concepts of management and their application in the clinical laboratory setting.  
Restrictions: Enrollment is limited to students with a major in Medical Laboratory Science.

MLS 3400 - Laboratory Operations  
Credit(s): 1 Credit (Repeatable for credit)  
This course introduces students to the general operation of a clinical laboratory. Content focuses on laboratory organization, laboratory safety, basic laboratory equipment, laboratory math, pre-analytical, analytical and post-analytical variables, method validation, quality control procedures, calibration, and regulatory requirements.  
Prerequisite(s): (MATH 1300 or STAT 1300)

Restrictions: Enrollment is limited to students with a major in Medical Laboratory Science.

MLS 3930 - Special Topics  
Credit(s): 3 Credits (Repeatable for credit)  
MLS 3980 - Independent Study  
Credit(s): 1 or 3 Credits (Repeatable for credit)  
MLS 4150 - Analytical Chemistry  
Credit(s): 2 Credits  
A laboratory course which introduces analytical principles and instrumentation used in a clinical chemistry laboratory. Topics include: photometry, electrochemistry, immunooassays, chromatography, mass spectrometry, and osmometry. Experiments are designed to demonstrate basic principles and laboratory techniques.  
Prerequisite(s): CHEM 2410 with a grade of C- or higher; CHEM 2415 with a grade of C- or higher  
Corequisite(s): BLS 4110

Restrictions: Enrollment is limited to students with a major in Medical Laboratory Science.

MLS 4161 - Molecular Biology Laboratory  
Credit(s): 1 Credit  
A laboratory course which presents concepts of molecular biology and hands-on laboratory experiences in a variety of molecular techniques to include the use of restriction enzymes, isolation of genomic DNA, evaluation of DNA purity, hybridization techniques, amplification techniques, gel electrophoresis, recombinant DNA techniques, microarray assays, and use of bioinformatics websites for sequence searching.  
Prerequisite(s): BIOL 1040 with a grade of C- or higher  

MLS 4250 - Hematology Laboratory  
Credit(s): 1 Credit  
Performance, interpretation, and troubleshooting of a variety of basic hematology procedures will be accomplished using clinical specimens. Cell counts and differentials and other hematology procedures will be performed on blood. Principles and reactions involved in the testing procedure will be emphasized as well as the interpretation of results. Students will also receive an introduction to phlebotomy.  
Prerequisite(s): BIOL 1240 with a grade of C- or higher  
Corequisite(s): BLS 4210

Restrictions: Enrollment is limited to students with a major in Medical Laboratory Science.

MLS 4350 - Immunohematology Lab  
Credit(s): 1 Credit  
Practice in routine testing procedures utilized in the blood bank such as blood typing, antibody identification, and crossmatching using clinical samples. Theoretical principles, troubleshooting procedures and interpretation of results will be discussed.  
Prerequisite(s): BLS 4411 with a grade of C or higher  
Corequisite(s): BLS 4310

Restrictions: Enrollment is limited to students with a major in Medical Laboratory Science.

MLS 4520 - Medical Bacteriology  
Credit(s): 2 Credits  
Content focuses on prokaryotic microbes of pathologic importance. Included are discussions on structure, molecular biology, molecular diagnostics, metabolism, growth, replication, current topics and emerging concerns. Pathogenicity, epidemiology, diagnosis and laboratory identification of important groups of human pathogenic bacteria are emphasized. Modes of action of selected antimicrobics and chemotherapeutic agents are also discussed.  
Prerequisite(s): BLS 4510 with a grade of C or higher  
Corequisite(s): MLS 4550

Restrictions: Enrollment is limited to students with a major in Medical Laboratory Science.

MLS 4541 - Medical Mycology and Parasitology  
Credit(s): 2 Credits  
Course will focus on the clinically relevant parasites and fungi and the diseases they produce in man. Terminology, taxonomy, aspects of epidemiology, modes of transmission, pathogenesis, morphology, life cycles, specimen processing, and techniques of laboratory identification are covered.  
Prerequisite(s): BLS 4510 with a grade of C or higher
MLS 4550 - Medical Bacteriology Laboratory  
Credit(s): 2 Credits  
Laboratory course designed to give the student experience in the  
Gram staining, identification, and susceptibility testing of  
microorganisms, as well as an introduction to non-culture based  
procedures used in the diagnosis of infectious disease.  
Prerequisite(s): BLS 4510 with a grade of C or higher  
Corequisite(s): MLS 4520  
Restrictions:  
Enrollment is limited to students with a major in Medical Laboratory  
Science.

MLS 4571 - Medical Mycology and Parasitology Laboratory  
Credit(s): 1 Credit  
A laboratory course involving the analysis and identification of the  
clinically relevant fungi and parasites and the diseases they produce in  
man. Techniques of laboratory identification are covered.  
Prerequisite(s): BLS 4510 with a grade of C or higher  
Corequisite(s): MLS 4541  
Restrictions:  
Enrollment is limited to students with a major in Medical Laboratory  
Science.

MLS 4611 - Advanced Topics and Case Correlations  
Credit(s): 3 Credits  
Key content areas of laboratory medicine will be reviewed and advanced  
topics and specialty areas in the clinical laboratory will be discussed.  
Clinical case studies addressing laboratory test/disease correlation,  
the selection of laboratory tests, interpretation of laboratory results,  
and problem resolution will be emphasized. Advanced theory and  
clinical practice issues are presented and reinforced through lectures,  
discussions, and case presentations.  
Prerequisite(s): MLS 4701 with a grade of C or higher; MLS 4710 with a  
grade of C or higher; MLS 4750 with a grade of C or higher; MLS 4800 with a  
grade of C or higher; MLS 4811 with a grade of C or higher; MLS 4821 with a grade of C or higher  
Restrictions:  
Enrollment is limited to students with a major in Medical Laboratory  
Science.

MLS 4541 - Medical Biochemistry Laboratory  
Credit(s): 1 Credit  
Clinical rotation course focuses on clinical chemistry testing in a  
clinical setting. Concepts and techniques include: enzyme kinetics;  
carbohydrate and lipid metabolism; hormonal regulation;  
pathophysiology of water, electrolyte, acid-base balance, and special techniques. Laboratory techniques,  
workflow management, quality control and evaluation of results in the  
interpretation of health/disease status are emphasized.  
Prerequisite(s): BLS 4110 with a grade of C or higher; BLS 4120 with a  
grade of C or higher; MLS 4750 with a grade of C or higher  
Corequisite(s): MLS 4710  
Restrictions:  
Enrollment is limited to students with a major in Medical Laboratory  
Science.

MLS 4630 - Advanced Topics and Case Correlations - Hematology  
Credit(s): 1 Credit  
Key content areas in clinical hematology will be reviewed, advanced  
topics and specialty areas in the clinical hematology laboratory will be  
discussed. Clinical case studies addressing laboratory test/disease  
correlation, the selection of laboratory tests, interpretation of laboratory  
results, and problem resolution will be emphasized. Advanced theory and  
clinical practice issues are presented and reinforced through lectures,  
discussions, and case presentations.  
Prerequisite(s): MLS 4740 with a grade of C or higher; MLS 4750 with a  
grade of C or higher; MLS 4821 with a grade of C or higher  
Restrictions:  
Enrollment is limited to students with a major in Medical Laboratory  
Science.

MLS 4520 - Advanced Topics and Case Correlations - Microbiology  
Credit(s): 1 Credit  
Key content areas in clinical microbiology will be reviewed, advanced  
topics and specialty areas in the clinical microbiology laboratory will be  
discussed. Clinical case studies addressing laboratory test/disease  
correlation, the selection of laboratory tests, interpretation of laboratory  
results, and problem resolution will be emphasized. Advanced theory and  
clinical practice issues are presented and reinforced through lectures,  
discussions, and case presentations.  
Prerequisite(s): MLS 4510 with a grade of C or higher  
Corequisite(s): MLS 4541  
Restrictions:  
Enrollment is limited to students with a major in Medical Laboratory  
Science.

MLS 4551 - Medical Hematology Laboratory  
Credit(s): 1 Credit  
Clinical rotation course focuses on clinical hematology testing in a  
clinical setting. Concepts and techniques include: enzyme kinetics;  
carbohydrate and lipid metabolism; hormonal regulation;  
pathophysiology of water, electrolyte, acid-base balance, and special techniques. Laboratory techniques,  
workflow management, quality control and evaluation of results in the  
interpretation of health/disease status are emphasized.  
Prerequisite(s): BLS 4110 with a grade of C or higher; BLS 4120 with a  
grade of C or higher; MLS 4750 with a grade of C or higher  
Corequisite(s): MLS 4710  
Restrictions:  
Enrollment is limited to students with a major in Medical Laboratory  
Science.

MLS 4620 - Advanced Topics and Case Correlations-Clinical Chemistry  
Credit(s): 1 Credit  
Key content areas of clinical chemistry will be reviewed, advanced  
topics and specialty areas in the clinical chemistry laboratory will be  
discussed. Clinical case studies addressing laboratory test/disease  
correlation, the selection of laboratory tests, interpretation of laboratory  
results, and problem resolution will be emphasized. Advanced theory and  
clinical practice issues are presented and reinforced through lectures,  
discussions, and case presentations.  
Prerequisite(s): MLS 4701 with a grade of C or higher; MLS 4710 with a  
grade of C or higher; MLS 4821 with a grade of C or higher  
Restrictions:  
Enrollment is limited to students with a major in Medical Laboratory  
Science.
MLS 4740 - Clinical Hematology Practicum  
Credit(s): 2 Credits  
Clinical rotation course focuses on the counting, identification and analysis of the cellular components of blood in a clinical laboratory setting using advanced techniques and state of the art computer integrated instruments. Laboratory techniques, workflow management, quality control and evaluation of results in the interpretation of health/disease status are emphasized.  
Prerequisite(s): BLS 4210 with a grade of C or higher; MLS 4250 with a grade of C or higher  
Corequisite(s): MLS 4750  
Restrictions:  
Enrollment is limited to students with a major in Medical Laboratory Science.

MLS 4750 - Clinical Hematology  
Credit(s): 1 Credit  
Discussions, assignments and exams covering the theory, concepts and procedures used in the clinical hematology practicum.  
Prerequisite(s): BLS 4210 with a grade of C or higher; MLS 4250 with a grade of C or higher  
Corequisite(s): MLS 4740  
Restrictions:  
Enrollment is limited to students with a major in Medical Laboratory Science.

MLS 4760 - Clinical Hemostasis Practicum  
Credit(s): 1 Credit  
Clinical rotation course involving specialized hemostasis testing in a practicum setting. Concepts and techniques include the evaluation of bleeding and thrombotic disorders. Laboratory techniques, workflow management, quality control and evaluation of results in the interpretation of health/disease status are emphasized.  
Prerequisite(s): BLS 4220 with a grade of C or higher  
Restrictions:  
Enrollment is limited to students with a major in Medical Laboratory Science.

MLS 4780 - Clinical Immunohematology Practicum  
Credit(s): 2 Credits  
Clinical rotation course providing laboratory experience in routine and specialized blood bank techniques such as antibody identification, crossmatching and component preparation. Laboratory techniques, workflow management, quality control and evaluation of results in the interpretation of health/disease status are emphasized.  
Prerequisite(s): BLS 4310 with a grade of C or higher; MLS 4350 with a grade of C or higher  
Corequisite(s): MLS 4790  
Restrictions:  
Enrollment is limited to students with a major in Medical Laboratory Science.

MLS 4790 - Clinical Immunohematology  
Credit(s): 1 Credit  
Discussion, assignments and exams covering the theory, concepts and procedures used in the clinical immunohematology practicum.  
Prerequisite(s): BLS 4310 with a grade of C or higher; MLS 4350 with a grade of C or higher  
Corequisite(s): MLS 4780  
Restrictions:  
Enrollment is limited to students with a major in Medical Laboratory Science.

MLS 4800 - Clinical Microbiology Practicum  
Credit(s): 3 Credits  
Clinical rotation course applying principles and procedures used in the isolation, identification and susceptibility testing of microorganisms in a clinical setting. Laboratory techniques, workflow management, quality control and evaluation of results in the interpretation of health/disease status are emphasized.  
Prerequisite(s): BLS 4510 with a grade of C or higher; MLS 4520 with a grade of C or higher; MLS 4550 with a grade of C or higher  
Corequisite(s): MLS 4811  
Restrictions:  
Enrollment is limited to students with a major in Medical Laboratory Science.

MLS 4811 - Clinical Microbiology  
Credit(s): 1 Credit  
Assignments and exams covering the theory, concepts and procedures used in the clinical microbiology practicum.  
Prerequisite(s): BLS 4510 with a grade of C or higher; MLS 4520 with a grade of C or higher; MLS 4550 with a grade of C or higher  
Corequisite(s): MLS 4800  
Restrictions:  
Enrollment is limited to students with a major in Medical Laboratory Science.

MLS 4821 - Clinical Urinalysis and Phlebotomy  
Credit(s): 1 Credit  
Clinical rotation course focuses on the physical, chemical and cellular components of urine and the principles and procedures of blood collection in a clinical laboratory setting. Professional and interpersonal communication with patients along with accurate selection and handling of equipment/collection are emphasized. Laboratory techniques, workflow management, quality control and evaluation of results in the interpretation of health/disease status are emphasized.  
Prerequisite(s): BLS 3110 with a grade of C or higher; MLS 3150 with a grade of C or higher  
Restrictions:  
Enrollment is limited to students with a major in Medical Laboratory Science.

MLS 4930 - Special Topics  
Credit(s): 3 Credits (Repeatable for credit)

MLS 4980 - Independent Study  
Credit(s): 1 or 3 Credits (Repeatable for credit)
