NUCLEAR MEDICINE TECHNOLOGY (NMT)

NMT 4000 - Nuclear Medicine Procedures I
Credit(s): 3 Credits
This course provides a study of the applications of radiopharmaceuticals used in diagnosis and therapy, different techniques and procedures utilized including indications for studies and correlation with various disease states. This course will also include concepts and applications dealing with patient care, the health care delivery systems, CPR, and health related agencies. This course will be offered starting spring 2022.
Restrictions:
Enrollment is limited to students with a major in Nuclear Medicine Tech.

NMT 4100 - Radiation Protection
Credit(s): 3 Credits
Radiation units, regulations regarding maximum permissible exposures to radiation, radiation monitoring and surveying, and principles of radiation protection are included in the content. Concepts in radiobiology and dosimetry are covered. This course will be offered starting in Spring 2022.
Restrictions:
Enrollment is limited to students with a major in Nuclear Medicine Tech.

NMT 4310 - Radiation Physics and Radiation Protection
Credit(s): 0 or 4 Credits
This course provides a study of atomic structure, radioactive decay modes, x-ray production, mathematics of decay, and interaction of radiation with matter. Radiation units, regulations regarding maximum permissible exposures to radiation, radiation monitoring and surveying, and principles of radiation protection are included in the content. Concepts in radiobiology and dosimetry are covered. Offered in fall through 2021. Beginning in fall 2022, this course will be termed Radiation Physics and offered in fall for 2 credits.
Restrictions:
Enrollment is limited to students with a major in Nuclear Medicine Tech.

NMT 4420 - Radiopharmacy Clinical Practicum
Credit(s): 3 Credits
Students will prepare radiopharmaceuticals, perform associated quality control, dispense drugs and perform record keeping under the direct supervision of qualified medical professionals. This course will be offered through spring 2022.
Restrictions:
Enrollment is limited to students with a major in Nuclear Medicine Tech.

NMT 4430 - Emerging Technologies
Credit(s): 3 Credits
This course is designed to introduce students to advanced imaging technologies and techniques. The course will include a study of cross sectional human anatomy. (Offered every Spring)
Restrictions:
Enrollment is limited to students with a major in Nuclear Medicine Tech.

NMT 4440 - Clinical Nuclear Medicine
Credit(s): 5 Credits
This course provides a study of the applications of radiopharmaceuticals used in diagnosis and therapy, different techniques and procedures utilizing including indications for studies and correlation with various disease states. This course will also include concepts and applications dealing with patient care, the health care delivery systems, CPR, and health related agencies. Offered every fall through 2021. Beginning in fall 2022, this course will be offered for 3 credits.
Restrictions:
Enrollment is limited to students with a major in Nuclear Medicine Tech.

NMT 4500 - Clinical Nuclear Medicine Information Systems
Credit(s): 3 Credits
This course introduces basic hardware and software components of a computer system. Emphasis will be given to understanding basic computer principles with application to data acquisition and processing in nuclear medicine. (Offered every Spring)
Restrictions:
Enrollment is limited to students with a major in Nuclear Medicine Tech.

NMT 4600 - Nursing Clinical Practicum
Credit(s): 7 Credits
Students will perform in a wide variety of nuclear medicine procedures, including in vivo, diagnostic and therapeutic treatments in multiple clinical settings under the direct supervision of qualified medical professionals. This course will be offered through spring 2022.
Restrictions:
Enrollment is limited to students with a major in Nuclear Medicine Tech.

NMT 4700 - Nuclear Medicine Clinical Practicum I
Credit(s): 4 Credits
Students will perform in a wide variety of nuclear medicine procedures, including in vivo, diagnostic and therapeutic treatments in multiple clinical settings under the direct supervision of qualified medical professionals. Students will prepare radiopharmaceuticals, perform associated quality control, dispense drugs and perform record keeping under the direct supervision of qualified medical professionals in a radiopharmacy setting. This course will be offered starting in fall 2022.
Restrictions:
Enrollment is limited to students with a major in Nuclear Medicine Tech.
NMT 4710 - Nuclear Medicine Senior Seminar I  
**Credit(s): 1 Credit**  
This course is designed to provide didactic course work and professional development which support the NMT students as they are in the clinical practicum courses. Including resume building, critical reflections and clinical quizzes. This course will be offered starting in fall 2022.  
**Restrictions:**  
Enrollment is limited to students with a major in Nuclear Medicine Tech.

NMT 4800 - Nuclear Medicine Clinical Practicum II  
**Credit(s): 2 Credits**  
Students will perform in a wide variety of nuclear medicine procedures, including in vivo, diagnostic and therapeutic treatments in multiple clinical settings under the direct supervision of qualified medical professionals. Students will prepare radiopharmaceuticals, perform associated quality control, dispense drugs and perform record keeping under the direct supervision of qualified medical professionals in a radiopharmacy setting. This course will be offered starting in winter session 2023.  
**Restrictions:**  
Enrollment is limited to students with a major in Nuclear Medicine Tech.

NMT 4900 - Nuclear Medicine Clinical Practicum III  
**Credit(s): 12 Credits**  
Students will perform in a wide variety of nuclear medicine procedures, including in vivo, diagnostic and therapeutic treatments in multiple clinical settings under the direct supervision of qualified medical professionals. Students will prepare radiopharmaceuticals, perform associated quality control, dispense drugs and perform record keeping under the direct supervision of qualified medical professionals in a radiopharmacy setting. This course will be offered starting in spring 2023.  
**Restrictions:**  
Enrollment is limited to students with a major in Nuclear Medicine Tech.

NMT 4910 - Clinical Practicum  
**Credit(s): 0 or 2 Credits (Repeatable for credit)**  
This course is designed to provide didactic course work and mock exams which support the NMT students as they are in the clinical practicum courses. Beginning in spring 2023, this course will be termed Senior Seminar II and offered in spring for 2 credits.

NMT 4960 - Capstone in Nuclear Medicine  
**Credit(s): 1 Credit**  
Students enrolled in this course develop an individual research project that is a culmination of the knowledge obtained in the didactic and clinical coursework within the Nuclear Medicine Technology Program. This project is worked on independently with a faculty mentor and is required for graduation. (Offered every Spring)  
**Restrictions:**  
Enrollment is limited to students with a major in Nuclear Medicine Tech.
