OPERATIONS MANAGEMENT (OPM)

OPM 2070 - Introduction to Business Statistics
Credit(s): 3 Credits
This course introduces students to the principles of statistics. Subjects include: descriptive statistics for displaying and summarizing business data; the use of probabilities and random variables in business decision models; probability distribution, statistical inference as a decision-making tool, sampling of business data, simple linear regression and correlation, time series analysis, use of index numbers in economic data and the use of statistics to manage supply chains.
Prerequisite(s): (Math Waiver per Advisor with a minimum score of 1200 or 1 Course from MATH 1200-4999)
Restrictions:
Students in the Schl for Professional Studies college may not enroll.
Attributes: Business Common Body Knowledge

OPM 2930 - Special Topics
Credit(s): 3 Credits

OPM 2980 - Independent Study
Credit(s): 1 or 3 Credits
Permission of the department chair.

OPM 3050 - Introduction to Management Science and Operations Management
Credit(s): 3 Credits
The objectives of this course are to: 1) acquaint the student with the overall operations research/management science process; 2) expose the student to several of the most widely utilized operations research/management science and production planning models, along with the solution techniques; 3) familiarize the student with the use of computers in facilitating managerial decisions.
Prerequisite(s): (OPM 2070; (MATH 1320, MATH 1510, MATH 1520, or MATH 2530))
Restrictions:
Students in the Schl for Professional Studies college may not enroll.
Attributes: Business Common Body Knowledge

OPM 3930 - Special Topics
Credit(s): 3 Credits

OPM 3980 - Independent Study
Credit(s): 1 or 3 Credits
Permission of the department chair.

OPM 4440 - Sourcing & Strategy
Credit(s): 3 Credits
The course focuses on strategic management of supply chains in the context of an integrated enterprise. In particular, procurement, purchasing, sourcing, supplier selection, and total cost of ownership.
Prerequisite(s): OPM 3050; Minimum Earned Credits of 90

OPM 4460 - Logistics & Warehousing
Credit(s): 3 Credits
The objectives of this course are: (1) to acquaint the student with the use of logistics management theory and techniques for analyzing and controlling global manufacturing and operations management systems; (2) to expose the student to several of the most widely utilized models for supply chain management in the manufacturing and service sectors (financial, health care, public sectors, etc.), along with case studies; and (3) to familiarize the student with the use of computer software in facilitating logistics decisions.
Prerequisite(s): OPM 3050, Minimum Earned Credits of 90

OPM 4930 - Special Topics
Credit(s): 3 Credits
Restrictions:
Students in the Schl for Professional Studies college may not enroll.

OPM 4980 - Independent Study
Credit(s): 1-3 Credits
Permission of the department chair.
Restrictions:
Students in the Schl for Professional Studies college may not enroll.

OPM 5020 - Applied Business Statistics
Credit(s): 3 Credits
This course challenges students to think about business problems in a systematic fashion by reviewing mathematical concepts and developing statistical thinking skills. Statistical thinking can lead to both a better understanding of the problem and can result in higher quality solution options. The course provides coverage of the more widely used statistical methods to aid in problem formulation, data analysis and managerial decision-making. At the end of this course students will have a more sophisticated understanding of the mathematics that underlie probability and statistical concepts, issues involving data interpretation, and decision-making under conditions of uncertainty.
Restrictions:
Students in the Schl for Professional Studies college may not enroll.

OPM 5050 - Introduction to Operations Management
Credit(s): 3 Credits
The objective of this course are (1) familiarize students with production planning and control (2) to familiarize students with the use of operations research techniques for analyzing and controlling manufacturing, inventory, and operations management systems; and (3) to train students to use computers for making production and operations management decisions.
Prerequisite(s): OPM 5020 with a grade of C or higher

OPM 5910 - Graduate Internship
Credit(s): 1-6 Credits

OPM 5930 - Special Topics
Credit(s): 3 Credits
Restrictions:
Students in the Schl for Professional Studies college may not enroll.

OPM 5980 - Graduate Reading Course
Credit(s): 1-3 Credits
OPM 6000 - Forecasting and Demand Management
Credit(s): 3 Credits
Advanced topics in statistical modeling, data analysis and decision making. Extensive use of computer packages and real business databases. Topics include model building and research design; variance and experimental design; multiple regression and correlation analysis; time series and forecasting; statistical quality control; non-parametric procedures; model decision analysis.
Prerequisite(s): OPM 5020 with a grade of C or higher
Restrictions:
Students in the Schl for Professional Studies college may not enroll.

OPM 6050 - Operations Management
Credit(s): 3 Credits
Designed to familiarize students with decision-making tools and models that are utilized by operational managers, to present business firm integrated operational practices in the manufacturing and service sectors, and to analyze and examine the business strategic planning process from a cross-functional perspective, utilizing case studies. Topics include: operations and supply-chain strategy, project management, strategic capacity management, job scheduling and control, logistics for facility location decisions, aggregate planning, and deterministic/stochastic inventory decisions.
Prerequisite(s): OPM 5050 with a grade of C or higher

OPM 6430 - Quality Improvement/Lean Sigma
Credit(s): 3 Credits
This course is intended to serve as an in-depth examination of quality principles applied specifically to manufacturing, service and supply chain environments. Both managerial and statistical aspects will be covered.
Prerequisite(s): OPM 5050 with a grade of C or higher

OPM 6440 - Supply Chain Sourcing & Strategy
Credit(s): 3 Credits
The course focuses on strategic management of supply chains in the context of an integrated enterprise. In particular, procurement, purchasing, sourcing, supplier selection, and total cost of ownership.
(Offered in Fall)
Prerequisite(s): OPM 5050 with a grade of C or higher

OPM 6460 - Logistics & Warehousing
Credit(s): 3 Credits
The objectives of this course are: (1) to acquaint the student with the use of logistics management theory and techniques for analyzing and controlling global manufacturing and operations management systems; (2) to expose the student to several of the most widely utilized models for supply chain management in the manufacturing and service sectors (financial, health care, public sectors, etc.), along with case studies; and (3) to familiarize the student with the use of computer software in facilitating logistics decisions.
(Offered Fall and Spring)
Prerequisite(s): OPM 5050 with a grade of C or higher

OPM 6600 - Supply Chain Analytics
Credit(s): 3 Credits
All businesses face operational and pricing challenges including: how to configure and operate their supply chain, how to allocate products to sales channels and outlets, and how to price their products over time to different market segments. The ultimate goal is to match demand with supply. This course looks at the operations management challenges faced by companies and supply chains in various industries through business cases and analytics exercises. This course focuses on incorporating data-driven decision making into companies’ complex pricing decision processes.
(Offered in Fall)
Prerequisite(s): OPM 5020 with a grade of C or higher

OPM 6930 - Special Topics
Credit(s): 3 Credits

OPM 6980 - Independent Study
Credit(s): 1 or 3 Credits
