ORTHODONTICS (ORTH)

ORTH 5010 - Fundamentals of Orthodontics
Credit(s): 1 Credit (Repeatable up to 2 credits)
Team-taught by the orthodontic faculty during the first summer and fall terms of the graduate program. Course is based upon a respected, comprehensive, graduate text in the specialty. Applied science and techniques of diagnosis, treatment-planning, active therapy, and retention are reviewed.

ORTH 5020 - Orthodontic Business Management
Credit(s): 1 Credit (Repeatable for credit)
This course is designed to educate and prepare orthodontic residents to enter the business world of orthodontics. The information provided will assist these doctors in selecting suitable employment options, office leadership and management techniques, office systems, marketing and general accounting principles related to the business of orthodontics. (Offered annually)
Restrictions:
Enrollment limited to students in the Center for Advanced Dental Ed college.

ORTH 5030 - Facial Growth
Credit(s): 2 Credits
An overview of current thought in the field of craniofacial biology. The graduate student is exposed to the changes that take place in the face from embryo to adult. Hypothetical control mechanisms, clinical application of facial growth principles, and the experimental evidence are explored in a critical review of relevant literature. Offered every year.

ORTH 5100 - Biomechanics
Credit(s): 1 Credit
Concepts of orthodontic displacement and force.
Restrictions:
Enrollment limited to students in the Center for Advanced Dental Ed college.

ORTH 5250 - Clinical Cephalometrics
Credit(s): 2 Credits
Introduction to the use of cephalometric radiographs in clinical orthodontics. Overview of cephalometric analyses of historic importance. Lectures and demonstrations with a laboratory component that includes cephalometric tracing technique, visualization of treatment objectives for orthodontic and surgical orthodontic cases, analysis of growth pattern, and treatment results. Offered every year.

ORTH 5310 - Oral Biology
Credit(s): 1 Credit
Attention is focused on the relationship between the observed clinical events in tooth movement and the nature of the associated physiological events. Emphasis is placed on those responses that may occur on the tissue, cell and macromolecular levels of organization. In particular, the physiology of mineralized connective tissue and the process of tooth eruption are used as models to explore the biology of orthodontic tooth movement. Offered every year.

ORTH 5350 - Surgical Orthodontics
Credit(s): 1 Credit
Acquaints the graduate student with those surgical procedures that directly relate to orthodontic treatment plans. The lecture series encompasses a review of diagnostic procedures, surgical techniques for the treatment of maxillary and/or mandibular skeletal excess and deficiency as well as laterognathism, Class II malocclusion and adjunctive techniques of genioplasty for correction of microgenia and macrogenia. In addition to surgical consideration of jaw deformities, time is allocated for miscellaneous pathological conditions. Offered every year.

ORTH 5370 - Orthodontic Problems Related to Cleft Palate Patient
Credit(s): 1 Credit
A study of the various aspects of the congenital cleft-lip-and-palate condition with a consideration of the several professional areas concerned with the total habilitation of the cleft-tip-and-palate patient. Coursework includes diagnosis and treatment of patients at the Cardinal Glennon Hospital Cleft Palate Center. Offered every year.

ORTH 5390 - Speech Disorders Related to the Oral Mechanism
Credit(s): 1 Credit
Basic anatomy and physiology of the speech mechanism. Introduction to phonetics and speech sound production. Survey of communication disorders; significance of the disorder for the orthodontist, and orthodontic treatment plan. Offered every fall semester.

ORTH 5400 - History of Orthodontics
Credit(s): 0 Credits
Evaluating concepts in pre-specialization disciplinary organization, ethical considerations, and humanist aspects of the profession. (Offered in Fall)
Restrictions:
Enrollment limited to students in the MS Dentistry, Orthodontics or PMC Orthodontics programs.

ORTH 5490 - Diag Procedures in Orthodontic
Credit(s): 1 Credit
An introduction to diagnostic procedures including the taking of the prospective patients medical and dental history, conducting the clinical examination, and an evaluation of dental and oral function. The analysis of orthodontic study-casts. (Offered every year)

ORTH 5500 - Diagnosis and Treatment Plan I
Credit(s): 1 Credit
Evaluation and treatment planning of various types of malocclusion. Offered every year.

ORTH 5510 - Diagnosis + Treatment Plan II
Credit(s): 1 Credit
Continuation of Diagnosis and Treatment Planning I. Offered every year.

ORTH 5530 - Clinical Diagnosis I
Credit(s): 1 Credit
The clinical application of the various diagnostic procedures and philosophies of orthodontic diagnosis and a presentation of practical procedures to help in the management of unusual problems that can arise during the course of treatment. Offered every year.

ORTH 5540 - Clinical Diagnosis II
Credit(s): 1 Credit
Continuation of Clinical Diagnosis I. Offered every year.
ORTH 5550 - Orthodontic Analysis & Treatment Modalities
Credit(s): 1 Credit
An in-depth presentation of specific and complex problems that can and
do arise in orthodontic practice. Recognition, precautions, and various
treatment modalities for each problem are discussed. Advances in
orthodontic technology will be presented utilizing diagrams, photographs,
clinical aids, and actual demonstrations to further enhance knowledge in
dealing with difficult situations. Offered every year.

ORTH 5560 - Clinical Case Conferences
Credit(s): 0-1 Credits (Repeatable for credit)
In a seminar format, each class-meeting features the presentation by
one of the students of the work-up and diagnosis of an active orthodontic
patient. The other students and faculty propose and critically evaluate
possible treat-plans and modalities. The presenting student then reviews
the actual treatment-plan being followed and the progress in therapy to
date. (Offered every year.)

ORTH 5580 - Clinical Specialty Seminars
Credit(s): 1 Credit (Repeatable for credit)
Individual clinical faculty members present their personal philosophies
of diagnosis, treatment-planning, active therapy, and retention. These
sessions serve also to introduce the students to a diversity of techniques
and appliances and therapy for unusual and exceptional categories of
patients and cases perhaps not routinely seen in the mainstream of
orthodontic care. (Offered every year.)

ORTH 5590 - Orthodontic Aspects of Sleep Breathing Disorders
Credit(s): 1 Credit
Sleep problems, including sleep breathing disorders, and sleep bruxism
are common. Good sleep is necessary for optimal health. Sleep
deprivation can cause decreased work or school performance, memory
and cognitive impairment, stress relationships, poor quality of life,
occupational injury and automobile injury. In the long term, the clinical
consequences of untreated sleep disorders are high blood pressure,
heart attack, heart failure, stroke, obesity, psychiatric problems, attention
deficit disorder, and mental impairment. Orthodontists can play a major
role in both the recognition and treatment of sleep disorders. Many of
the clinical findings may be recognizable by orthodontists. This course
provides students with an understanding of the pathophysiology of sleep
disorders and the current diagnostic and treatment options. For CADE
Graduate Orthodontic Students Only.

Restrictions:
Enrollment limited to students in the Center for Advanced Dental Ed
College.

ORTH 5600 - Contemporary Orthodontics I
Credit(s): 1 Credit
This course will provide an up-to-date overview of orthodontics with
discussions detailing information on diagnosis, treatment planning
concepts, related problems or controversies, and current treatment
procedures; including comprehensive looks at 3-D imaging, temporary
skeletal anchorage devices, and accelerated orthodontic tooth
movements. The following topics will be covered in this course: the
development of orthodontic problems, the problem-oriented orthodontic
diagnosis and treatment planning, the biologic basis of orthodontic
therapy, mechanical principles in orthodontics, and contemporary
orthodontic appliances. Offered to CADE Graduate Orthodontic Residents
only.

Restrictions:
Enrollment limited to students in the Center for Advanced Dental Ed
College.

ORTH 5620 - Principles of Orthodontic Techniques I
Credit(s): 2 Credits
Course includes typodont setup in normal occlusion before banding;
philosophy of treatment; and a coordination of lectures and seminars
with laboratory demonstration on archwire fabrication and reasons for
each bend. Offered every year.

ORTH 5630 - Principles of Orthodontic Techniques II
Credit(s): 2 Credits
Course includes treatment of Class II, Division 1 non-extraction case and
treatment of Class I bimaxillary-protrusion case, requiring removal of
permanent teeth. Offered every year.

ORTH 5650 - Orthodontic Treatment with Clear Aligners
Credit(s): 1 Credit (Repeatable for credit)
Series of lectures covering the didactic and practical knowledge of clean
aligner treatment with the Invisalign System using 3D diagnostic tools
and techniques. Limited to Graduate Orthodontic Students only. Offered
in fall.

Restrictions:
Enrollment is limited to students with a program in Orthodontics.

ORTH 5660 - Contemporary Orthodontics II
Credit(s): 1 Credit
This course provides evidence-based coverage of orthodontic diagnosis,
treatment planning strategies, and treatment protocols, including
esthetics, function, and biomechanics. The following topics will be
covered: Moderate non-skeletal problems in children, complex non-
skeletal problems in children, treatment of skeletal problems in children
and pre-adolescents, comprehensive orthodontic treatment strategies,
and combined surgical and orthodontic treatment. Pre-requisite:
ORTH 5660. Offered to CADE Graduate Orthodontic Residents only.

Prerequisite(s): ORTH 5660

Restrictions:
Enrollment limited to students in the Center for Advanced Dental Ed
College.

ORTH 5670 - Contemporary Orthodontics
Credit(s): 1 Credit
This course provides evidence-based coverage of orthodontic diagnosis,
treatment planning strategies, and treatment protocols, including
esthetics, function, and biomechanics. The following topics will be
covered: Moderate non-skeletal problems in children, complex non-
skeletal problems in children, treatment of skeletal problems in children
and pre-adolescents, comprehensive orthodontic treatment strategies,
and combined surgical and orthodontic treatment. Pre-requisite:
ORTH 5660. Offered to CADE Graduate Orthodontic Residents only.

Restrictions:
Enrollment limited to students in the Center for Advanced Dental Ed
College.

ORTH 5700 - Clinical Procedures
Credit(s): 1 Credit
Introduction of the first-year students to the policies, personnel, and
protocol of the orthodontic clinical and the ancillary facilities that
complement the clinic.

ORTH 5710 - Clinical Orthodontics I
Credit(s): 2 Credits
Supervised patient treatment in the Orthodontic Clinic. Offered the first
fall semester and every academic term thereafter.
ORTH 5720 - Clinical Orthodontics II  
Credit(s): 3 Credits  
ORTH 5730 - Clinical Orthodontics III  
Credit(s): 1 Credit  
ORTH 5740 - Clinical Orthodontics IV  
Credit(s): 3 Credits  
ORTH 5750 - Clinical Orthodontics V  
Credit(s): 3 Credits  
ORTH 5760 - Clinical Orthodontics VI  
Credit(s): 1 Credit  
ORTH 5770 - Clinical Orthodontics VII  
Credit(s): 3 Credits  
ORTH 5780 - Clinical Orthodontics VIII  
Credit(s): 1 Credit (Repeatable for credit)  
Restrictions:  
Enrollment limited to students in the MS Dentistry, Orthodontics or PMC Orthodontics programs.  
ORTH 5800 - Child and Adolescent Psychology  
Credit(s): 1 Credit  
The personal-social development of the adolescent from the perspective of life-span psychology is presented and discussed in the context of orthodontics, which includes the psycho-social impact of malocclusion, patient-parent-doctor motivations, communication and interpersonal relationships, patient cooperation and behavior modifications, and the psychology of the orthodontist. Offered every year.  
ORTH 5840 - Early and Mixed Dentition  
Credit(s): 1 Credit (Repeatable for credit)  
A didactic course on the development of the occlusion, growth-related imbalances and interceptive treatment. Discussions include psychological handling of younger patients, pros and cons of early intervention, early decisions to preserve spaces and pertinent literature review. (Offered annually)  
Restrictions:  
Enrollment limited to students in the Center for Advanced Dental Ed college.  
ORTH 5850 - Adult Treatment  
Credit(s): 2 Credits (Repeatable for credit)  
ORTH 5890 - Review for the American Board of Orthodontics Examination  
Credit(s): 1 Credit  
The second year-students attend a series of seminars with various members of the faculty toward preparation for the phase-two, written examination administered periodically by the American Board of Orthodontics. Passing the examination is a required step toward Board certification. (Offered in Spring)  
Restrictions:  
Enrollment limited to students in the Center for Advanced Dental Ed college.  
ORTH 5910 - Literature Review  
Credit(s): 0-1 Credits (Repeatable for credit)  
A consideration of recent developments and current literature in the orthodontic field and in related fields.  
ORTH 5940 - Orthodontic Internship  
Credit(s): 1 Credit (Repeatable for credit)  
ORTH 5950 - Special Study for Exams  
Credit(s): 0 Credits (Repeatable for credit)  
ORTH 5970 - Research Topics  
Credit(s): 1-3 Credits (Repeatable for credit)  
ORTH 5980 - Independent Study  
Credit(s): 3 Credits (Repeatable for credit)  
ORTH 5990 - Thesis Research  
Credit(s): 0-6 Credits (Repeatable for credit)  
ORTH 6000 - Treatment Planning with Digital Technology  
Credit(s): 1 Credit  
Treatment planning with digital technology will include conventional diagnostic procedures and new 3D diagnostic tools that allow for the clinician to simulate all available treatment options. The course will be based on cases treatment planned at the CADE. By the completion of this course participants will be competent in performing simulation treatment planning to assist in identifying the ideal or bets treatment option, present a visual aid during informed consent, collaboration tools for multidisciplinary treatment, and assist with proper therapeutic appliance selection. (Offered in Fall)  
Restrictions:  
Enrollment limited to students in the Center for Advanced Dental Ed college.  
ORTH 6010 - Digital Orthodontics I  
Credit(s): 1 Credit  
The course is the integration of digital technology into orthodontic therapy. This course will focus on technological tools utilized to improve efficiency and the quality outcomes for aligner, labial and lingual appliances. Participants are encouraged to apply such techniques to their assigned clinical cases. Participants will be able to collaborate and share amongst fellow residents the planning and executing of the digital treatment plan to help increase the exposure and available applications to all.  
Prerequisite(s): ORTH 6000  
Restrictions:  
Enrollment limited to students in the Center for Advanced Dental Ed college.  
ORTH 6020 - Digital Orthodontics II  
Credit(s): 1 Credit  
The course is intended to build upon the objectives of Digital Orthodontics 1 will greater emphasises upon finishing treatment and retention. The foundation of content will be primarily derived from cases treated at CADE. Upon completion of this course participants will be granted certification from integration into private practice the SureSmile and 3-shape systems. Additional certifications and product offerings will be added as they become available.  
Prerequisite(s): ORTH 6010  
Restrictions:  
Enrollment limited to students in the Center for Advanced Dental Ed college.  
ORTH 6050 - Scenario Based Case Analysis  
Credit(s): 0 Credits  
The course provides an opportunity for Residents to gain an understanding of case analysis in a scenario format. Scenarios will be reviewed for development of critical thinking skills in Orthodontic Diagnosis and Treatment Planning as prescribed by the American Board of Orthodontics for its clinical exam.  
Restrictions:  
Enrollment limited to students in the Center for Advanced Dental Ed college.
