PHYSICS (PHYS)

PHYS 1010 - Conceptual Physics
Credit(s): 3 Credits
Basic concepts of physics emphasizing the meaning of modern developments of the science. High school mathematics required. Fulfills three credit hours of the general science requirement. For non-science majors; does not apply toward the area of concentration with a major in physics.

Attributes: Natural Science Req (A&S)

PHYS 1050 - Intro to Physics of Human Body
Credit(s): 3 Credits
Discusses the physics of certain aspects of the working of the human body. Fulfills three credit hours of the general science requirement. Primarily for Occupational Therapy majors and, if there is room, for any other student to satisfy the science requirement.

Attributes: Natural Science Req (A&S)

PHYS 1090 - Northeastern University Interactive Learning Seminar
Credit(s): 1 Credit
This is a customized course for Northeastern University, equivalent to the NU course PHYS-1153 Interactive Learning Seminar for PHYS 1151. This course can only be taken by NU students. The course offers interactive problem solving for PHYS-1610. Emphasizes organized approaches and use of mathematical techniques, including calculus, to solve a wide range of problems in mechanics. Topics include static equilibrium, applications of Newton's laws and conservation principles, rotational dynamics, and fluids.

Corequisite(s): PHYS 1610, PHYS 1620

PHYS 1110 - Introduction to Physics
Credit(s): 1 Credit
Broad survey of physics. Introduction to computational and laboratory methods. Enrollment limited to students majoring in physics.

Attributes: Natural Science Req (A&S)

PHYS 1130 - Introduction to Astronomy
Credit(s): 1 or 3 Credits
Modern concepts of the physical nature of the astronomical universe. Fulfills three credit hours of the general science requirement. For non-science majors; does not apply toward the area of concentration with a major in physics.

Prerequisite(s): (1 Course from MATH 1200-4999, Math Waiver per Advisor with a minimum score of 1200, or SLU Math Placement with a minimum score of 1400)

Attributes: Natural Science Req (A&S)

PHYS 1220 - General Physics I
Credit(s): 3 Credits
Lectures, demonstrations, and laboratory in mechanics and heat. (Offered every Fall)
Corequisite(s): PHYS 1235

Restrictions:
Enrollment limited to students in the Doisy College Health Sciences college.

Attributes: Natural Science Req (A&S)

PHYS 1220 - General Physics II
Credit(s): 3 Credits
Lectures, demonstrations and laboratory in electricity, magnetism, wave motion, sound, optics and modern physics. (Offered every Spring)

Prerequisite(s): PHYS 1220
Corequisite(s): PHYS 1255

Restrictions:
Enrollment limited to students in the Doisy College Health Sciences college.

Attributes: Natural Science Req (A&S)

PHYS 1220

PHYS 1255 - General Physics II Lab
Credit(s): 1 Credit
Should be taken concurrently with PHYS 1240. Laboratory on electricity and magnetism principles of fields, circuits and light.

Corequisite(s): PHYS 1240

PHYS 1310 - College Physics I
Credit(s): 3 Credits
Lectures and demonstrations in mechanics and heat. PHYS 1320 should be taken concurrently with PHYS 1310. (Offered every Fall)
Prerequisite(s): (MATH 1200, 1 Course from MATH 1410-4999, MATH 1400, or SLU Math Placement with a minimum score of 1400)
Corequisite(s): PHYS 1320

Restrictions:
Students cannot enroll who have a major in Exercise Science.

Attributes: Natural Science Req (A&S)

PHYS 1310

PHYS 1320 - College Physics I Laboratory
Credit(s): 1 Credit
Should be taken concurrently with PHYS 1310. Laboratory in mechanics and heat. (Offered every Fall)

Corequisite(s): PHYS 1310

Attributes: Natural Science Req (A&S)

PHYS 1330 - College Physics II
Credit(s): 3 Credits
Lectures and demonstrations in electricity, magnetism, wave motion, sound, optics and modern physics. (Offered every Spring)

Prerequisite(s): PHYS 1310
Corequisite(s): PHYS 1340

Attributes: Natural Science Req (A&S)

PHYS 1330

PHYS 1340 - College Physics II Laboratory
Credit(s): 1 Credit
Laboratory in electricity, magnetism, wave motion, sound, optics and modern physics. (Offered every Spring)

Corequisite(s): PHYS 1330

Attributes: Natural Science Req (A&S)

PHYS 1350 - Aviation Physics
Credit(s): 3 Credits
Units and measurement; vectors; force and motion; energy; momentum; gravitation; forces of drag and lift; rotational motion; equilibrium of forces during flight; harmonic motion; selected topics in fluid mechanics and thermodynamics; electricity; electrical energy; magnetism; electromagnetic induction; linear and wave optics; atmospheric optics; laboratory experiments relating to the topics above. Fall and Spring semesters. Prerequisite: Knowledge of high school algebra and trigonometry.

Corequisite(s): PHYS 1365

Attributes: Natural Science Req (A&S)
PHYS 1365 - Aviation Physics Lab
Credit(s): 1 Credit
Should be taken concurrently with PHYS 1350. Laboratory topics on mechanics principles of motion, force, energy and waves.
Corequisite(s): PHYS 1350

PHYS 1610 - University Physics I
Credit(s): 3 Credits
Calculus and vector approaches to study of kinematics, statics and dynamics; work and energy; impulse and momentum; circular motion and gravity; rotational motion and equilibrium; vibrations, waves and sound; heat; fluid mechanics; elasticity.
Prerequisite(s): ((MATH 1510* with a grade of C- or higher or MATH 1400 with a grade of B or higher))

PHYS 1610 - University Physics I Laboratory
Credit(s): 1 Credit
Laboratory experiments to illustrate and supplement material in PHYS 1610. (Offered every Fall and Spring)
Corequisite(s): PHYS 1610
Attributes: Natural Science Req (A&S)

PHYS 1630 - University Physics II
Credit(s): 3 Credits
Calculus and vector approaches to study of electric charges, forces, fields and potentials; electric current; magnetic forces and fields; electromagnetic waves; light and geometrical optics; mirrors and lenses. (Offered every Fall and Spring)
Prerequisite(s): (PHYS 1610, PHYS 1620, and PHYS 1640*)

PHYS 1620 - University Physics I Laboratory
Credit(s): 1 Credit
Laboratory experiments to illustrate and supplement material in PHYS 1610. (Offered every Fall and Spring)
Corequisite(s): PHYS 1610
Attributes: Natural Science Req (A&S)

PHYS 1630 - University Physics II Laboratory
Credit(s): 1 Credit
The fundamental experiments of modern optics are repeated in this course. Three hours per week.
Corequisite(s): PHYS 3310
Attributes: Natural Science Req (A&S)

PHYS 1930 - Special Topics
Credit(s): 1 or 3 Credits (Repeatable for credit)
Attributes: Natural Science Req (A&S)

PHYS 1980 - Independent Study
Credit(s): 1-6 Credits (Repeatable for credit)
A full-time supervised work experience with an agency, firm or organization that employs persons in this degree field. This course is used for the first experiential learning session. Grading system is determined by department offering course. Offered every semester.
Attributes: Natural Science Req (A&S), UUC:Reflection-in-Action

PHYS 2620 - Modern Physics Lab
Credit(s): 1 Credit
(Offered every Fall)
Prerequisite(s): PHYS 2610*; (Math Waiver per Advisor with a minimum score of 1520 or 1 Course from MATH 1520-4999)

* Concurrent enrollment allowed.
Attributes: Natural Science Req (A&S)

PHYS 2910 - Co-Op with Industry
Credit(s): 1-6 Credits (Repeatable for credit)
The elementary theory of the statics, kinematics and dynamics of particles and rigid bodies. At the level of Symon's Mechanics.
Prerequisite(s): MATH 2530
Attributes: Natural Science Req (A&S)

PHYS 2930 - Special Topics
Credit(s): 1-4 Credits (Repeatable for credit)

PHYS 2980 - Independent Study
Credit(s): 1-3 Credits (Repeatable for credit)
Attributes: Natural Science Req (A&S)

PHYS 3310 - Optics
Credit(s): 3 Credits
Lectures and demonstrations three hours per week. Physical and geometrical optics.
Attributes: Natural Science Req (A&S)

PHYS 3320 - Optics Laboratory
Credit(s): 1 Credit
The fundamental experiments of modern optics are repeated in this course. Three hours per week.
Corequisite(s): PHYS 3310
Attributes: Natural Science Req (A&S)

PHYS 3410 - Thermodynamics and Statistical Mechanics
Credit(s): 3 Credits
At the level of Schroeder's Thermal Physics.
Prerequisite(s): MATH 3550* and PHYS 1630

* Concurrent enrollment allowed.
Attributes: Natural Science Req (A&S)

PHYS 3510 - Analog & Digital Electronics
Credit(s): 0 or 3 Credits
Lecture-laboratory six hours per week. Fundamentals of digital circuits with applications to computers. Operational amplifiers. Interfacing of computers with experimental equipment for data collection and control.
Prerequisite(s): PHYS 3511*

* Concurrent enrollment allowed.
Corequisite(s): PHYS 3511
Attributes: Natural Science Req (A&S)
PHYS 3511 - Analog & Digital Electronics Lab
Credit(s): 1 Credit
This is laboratory component of the Analog & Digital Electronics course. It is designed to give practical experience with building, debugging, and testing analog and digital circuits, including micro-controller-operated circuits, power regulation, operational amplifiers, etc.
Prerequisite(s): PHYS 3510

PHYS 3510

PHYS 3610 - Atomic, Molecular and Solid-State Physics
Credit(s): 3 Credits
This course will provide an upper level introduction to topics in Modern Physics including Atomic Physics, Statistical Physics, Molecular Physics, Solid State Physics, Nuclear Physics, Elementary particle Physics, Astrophysics, and Cosmology.
Attributes: Natural Science Req (A&S)

PHYS 3860 - Physics Research I
Credit(s): 0 Credits (Repeatable for credit)
First of three course sequence required for B.S. degree in Physics.
Attributes: Natural Science Req (A&S)

PHYS 3910 - Co-Op with Industry
Credit(s): 1-6 Credits (Repeatable for credit)
A full-time supervised work experience with an agency, firm or organization that employs persons in this degree field. This course is used for the second experiential learning session. (Offered every Fall, Spring and Summer)
Prerequisite(s): PHYS 2910
Attributes: Natural Science Req (A&S), UUC:Reflection-in-Action

PHYS 3915 - Internship with Industry
Credit(s): 1-6 Credits (Repeatable for credit)
A work experience with an agency, firm or organization that employs persons in this degree field. This experience may be full time or part-time as required by the industry sponsor. This course is used for the third experiential learning session. (Offered every Fall, Spring and Summer)
Prerequisite(s): PHYS 3910
Attributes: Natural Science Req (A&S), UUC:Reflection-in-Action

PHYS 3910

PHYS 3915

PHYS 3930 - Special Topics
Credit(s): 3 Credits (Repeatable for credit)
Attributes: Natural Science Req (A&S)

PHYS 3980 - Independent Study
Credit(s): 1-3 Credits (Repeatable for credit)
Attributes: Natural Science Req (A&S)

PHYS 4010 - Nanoscience Frontiers
Credit(s): 0 or 3 Credits
The Nanoscale Science and Nanotechnology applications have become increasingly important for industry and manufacturing. This interdisciplinary physics course is designed to introduce concepts and take a detailed look at how to study, understand and present interdisciplinary science that has significant experimental design components. This course will be devoted to several topics such as Nanoscale Physics, Nanomaterials Engineering, Nanofabrication and Nanolithography.
Prerequisite(s): CHEM 1110 with a grade of C or higher; MATH 2530 with a grade of C or higher; PHYS 1630 with a grade of C or higher
Attributes: Natural Science Req (A&S)

PHYS 4020 - Experimental Physics
Credit(s): 3 Credits
Experimental Physics teaches students basic techniques such as principles of ultra high vacuum, IV curve and resistance measurements, computer automation, microwave circuit design and measurements. We will also measure microwave resonators and quantum bits at 50 mK. All class work will consist of lab work in a studio classroom.
Attributes: Natural Science Req (A&S)

PHYS 4110 - Intro to Biophysics
Credit(s): 3 Credits
This course covers the basic concepts in biophysics at the fluid, cellular, macromolecular, and molecular levels, including diffusion processes, self-assembly, cooperative transitions, ion pumping, basic ideas of molecular machines, and passage of action potentials in neurons.
Prerequisite(s): PHYS 3410
Attributes: Natural Science Req (A&S)

PHYS 4210 - Electricity & Magnetism I
Credit(s): 3 Credits
Lecture three hours per week. At the level of Griffiths, Introduction to Electrodynamics. (Offered every Spring)
Prerequisite(s): PHYS 2610, PHYS 3110
Attributes: Natural Science Req (A&S)

PHYS 4840 - Senior Inquiry: Thesis
Credit(s): 0 Credits (Repeatable for credit)
Third of three course sequence required for B.S. degree in Physics. (Offered every Fall, Spring and Summer)
Prerequisite(s): PHYS 2610, PHYS 3110
Attributes: Natural Science Req (A&S)

PHYS 4870 - Physics Research II
Credit(s): 0 Credits (Repeatable for credit)
Second of three course sequence required for B.S. degree in Physics. (Offered every Fall, Spring and Summer)
Attributes: Natural Science Req (A&S)

PHYS 4880 - Senior Inquiry: Research Project
Credit(s): 3 Credits (Repeatable for credit)
Third of three course sequence required for B.S. degree in Physics (3 Cr), or satisfies senior inquiry requirement for B.A. degree in Physics (0-3 Cr).
Attributes: Natural Science Req (A&S)

PHYS 4890 - Senior Inquiry: Comprehensive Examination
Credit(s): 0 Credits
Attributes: Natural Science Req (A&S)

PHYS 4910 - Co-Op with Industry
Credit(s): 1-6 Credits (Repeatable for credit)
A full-time supervised work experience with an agency, firm or organization that employs persons in this degree field. This experience may be full time or part-time as required by the industry sponsor. (Offered every Fall, Spring and Summer)
Prerequisite(s): PHYS 3910
Attributes: Natural Science Req (A&S), UUC:Reflection-in-Action

PHYS 4915 - Internship with Industry
Credit(s): 1-6 Credits (Repeatable for credit)
A work experience with an agency, firm or organization that employs persons in this degree field. This experience may be full time or part-time as required by the industry sponsor. (Offered every Fall, Spring and Summer)
Prerequisite(s): PHYS 3915
Attributes: Natural Science Req (A&S), UUC:Reflection-in-Action
PHYS 4930 - Special Topics  
Credit(s): 3 Credits (Repeatable for credit)  
Attributes: Natural Science Req (A&S)  

PHYS 4980 - Advanced Independent Study  
Credit(s): 1-6 Credits (Repeatable for credit)  
Prior permission of sponsoring professor and chairperson required.  
Attributes: Natural Science Req (A&S)  

PHYS 5010 - Nanoscience and Nanofabrication Frontiers  
Credit(s): 0 or 3 Credits  
Nanoscale Science and Nanotechnology applications have become increasingly important for industry and manufacturing. This course is designed to introduce concepts and take a detailed look at how to study, understand and present interdisciplinary science. The course will be devoted to several topics in Nanoscale physics, Nanochemistry, Nanomaterials, Nanofabrication and Nanolithography.  

PHYS 5020 - Experimental Physics  
Credit(s): 3 Credits  
Experimental Physics teaches students basic techniques such as principles of ultra high vacuum, IV curve and resistance measurements, computer automation using LabVIEW, computer drafting of micro scale circuitry using L-Edit, and microwave simulations using Sonnet. All class work will consist of lab work in a studio classroom. Offered periodically in even years.  

PHYS 5030 - Mathematical Methods in Physics  
Credit(s): 3 Credits  
This course introduces a variety of powerful mathematical techniques of great utility to physics. Topics covered include differential and integral equations, complex analysis, Green’s functions, and variational methods, including Lagrangian and Hamiltonian formalism of classical mechanics. Mathematical methods are illustrated with examples from electrodynamics, statistical, quantum, and classical mechanics.  

PHYS 5310 - Optics for Educators  
Credit(s): 3 Credits  
This course will provide an upper level introduction to the concepts and techniques of modern optics, including: Review of ray optics and optical properties of lenses; Wave properties of light; Wave interference (including beats); Interference from two discrete sources of light; Interference from N discrete sources of light; Diffraction of light passing through apertures and past obstacles (plugs); Quantum nature of light (including photon counting); Laser physics. (Offered every Spring)  

PHYS 5610 - Modern Physics for Educators  
Credit(s): 3 Credits  
This course will provide an upper level introduction to topics in Modern Physics including Atomic Physics, Statistical Physics, Molecular Physics, Solid State Physics, Nuclear Physics, Elementary particle Physics, Astrophysics, and Cosmology.  

PHYS 5930 - Special Topics  
Credit(s): 3 Credits (Repeatable for credit)  

PHYS 5955 - Capstone Project 1  
Credit(s): 3 Credits  
A capstone project for the BS degree combined with the beginning of research toward the MS degree; process of design; proposal development; project planning and scheduling; prototyping; quality; testing; research ethics; design review; teamwork; oral and written reports. Restricted to students in the Accelerated BS-MS Program in Engineering/Engineering Physics.  

PHYS 5960 - Masters Project  
Credit(s): 1-3 Credits (Repeatable for credit)  
Masters Project is for students in the MS Non-Thesis degree program who will conduct a small project under the supervision of their Faculty Advisor. No more than 3 hours will be devoted to the Project.  

PHYS 5965 - Capstone Project 2  
Credit(s): 3 Credits  
Continuation of PHYS 5955. Restricted to students in the Accelerated BS-MS Program in Physics.  

PHYS 5980 - Independent Study  
Credit(s): 1 or 3 Credits (Repeatable for credit)  

PHYS 5990 - Thesis Research  
Credit(s): 0-6 Credits (Repeatable for credit)
