PHYSICS (PHYS)

PHYS 1010 - Conceptual Physics
Credit(s): 3 Credits
Basic concepts of physics emphasizing the meaning of modern developments of the science. High school mathematics required. Fulfills three credit hours of the general science requirement. For non-science majors; does not apply toward the area of concentration with a major in physics.
Attributes: Natural Science Req (A&S)

PHYS 1050 - Intro to Physics of Human Body
Credit(s): 3 Credits
Discusses the physics of certain aspects of the working of the human body. Fulfills three credit hours of the general science requirement. Primarily for Occupational Therapy majors and, if there is room, for any other student to satisfy the science requirement.
Attributes: Natural Science Req (A&S)

PHYS 1110 - Introduction to Physics
Credit(s): 1 Credit
Broad survey of physics. Introduction to computational and laboratory methods. Enrollment limited to students majoring in physics.
Attributes: Natural Science Req (A&S)

PHYS 1130 - Introduction to Astronomy
Credit(s): 1 or 3 Credits
Modern concepts of the physical nature of the astronomical universe. Fulfills three credit hours of the general science requirement. For non-science majors; does not apply toward the area of concentration with a major in physics.
Prerequisite(s): (1 Course from MATH 1200-4999, Math Waiver per Advisor with a minimum score of 1200, or SLU Math Placement with a minimum score of 1400)
Attributes: Natural Science Req (A&S)

PHYS 1220 - General Physics I
Credit(s): 3 Credits
Lectures, demonstrations, and laboratory in mechanics and heat. (Offered every Fall)
Corequisite(s): PHYS 1235
Restrictions:
Enrollment limited to students in the Doisy College Health Sciences college.
Attributes: Natural Science Req (A&S)

PHYS 1235 - General Physics I Lab
Credit(s): 1 Credit
Should be taken concurrently with PHYS 1220. Laboratory topics on mechanics principles of motion, force, energy and waves.
Corequisite(s): PHYS 1220

PHYS 1240 - General Physics II
Credit(s): 3 Credits
Lectures, demonstrations and laboratory in electricity, magnetism, wave motion, sound, optics and modern physics. (Offered every Spring)
Prerequisite(s): PHYS 1220
Corequisite(s): PHYS 1255
Restrictions:
Enrollment limited to students in the Doisy College Health Sciences college.
Attributes: Natural Science Req (A&S)

PHYS 1255 - General Physics II Lab
Credit(s): 1 Credit
Should be taken concurrently with PHYS 1240. Laboratory on electricity and magnetism principles of fields, circuits and light.
Corequisite(s): PHYS 1240

PHYS 1310 - College Physics I
Credit(s): 3 Credits
Lectures and demonstrations in mechanics and heat. PHYS 1320 should be taken concurrently with PHYS 1310. (Offered every Fall)
Prerequisite(s): (MATH 1200, 1 Course from MATH 1410-4999, MATH 1400, or SLU Math Placement with a minimum score of 1400)
Corequisite(s): PHYS 1320
Restrictions:
Students cannot enroll who have a major in Exercise Science.
Attributes: Natural Science Req (A&S)

PHYS 1320 - College Physics I Laboratory
Credit(s): 1 Credit
Should be taken concurrently with PHYS 1310. Laboratory in mechanics and heat. (Offered every Fall)
Corequisite(s): PHYS 1310
Attributes: Natural Science Req (A&S)

PHYS 1330 - College Physics II
Credit(s): 3 Credits
Lectures and demonstrations in electricity, magnetism, wave motion, sound, optics and modern physics. (Offered every Spring)
Prerequisite(s): PHYS 1310
Corequisite(s): PHYS 1340
Attributes: Natural Science Req (A&S)

PHYS 1340 - College Physics II Laboratory
Credit(s): 1 Credit
Laboratory in electricity, magnetism, wave motion, sound, optics and modern physics. (Offered every Spring)
Corequisite(s): PHYS 1330
Attributes: Natural Science Req (A&S)

PHYS 1350 - Aviation Physics
Credit(s): 3 Credits
Units and measurement; vectors; force and motion; energy; momentum; gravitation; forces of drag and lift; rotational motion; equilibrium of forces during flight; harmonic motion; selected topics in fluid mechanics and thermodynamics; electricity; electrical energy; magnetism; electromagnetic induction; linear and wave optics; atmospheric optics; laboratory experiments relating to the topics above. Fall and Spring semesters. Prerequisite: Knowledge of high school algebra and trigonometry.
Corequisite(s): PHYS 1365
Attributes: Natural Science Req (A&S)

PHYS 1365 - Aviation Physics Lab
Credit(s): 1 Credit
Should be taken concurrently with PHYS 1350. Laboratory topics on mechanics principles of motion, force, energy and waves.
Corequisite(s): PHYS 1350
**PHYS 1610 - University Physics I**  
**Credit(s):** 3 Credits  
Calculus and vector approaches to study of kinematics, statics and dynamics; work and energy; impulse and momentum; circular motion and gravity; rotational motion and equilibrium; vibrations, waves and sound; heat; fluid mechanics; elasticity.  
**Prerequisite(s):** (MATH 1510 with a grade of C- or higher or MATH 1400 with a grade of B or higher)  
* Concurrent enrollment allowed.  
**Corequisite(s):** PHYS 1620

**PHYS 1620 - University Physics I Laboratory**  
**Credit(s):** 1 Credit  
Laboratory experiments to illustrate and supplement material in PHYS 1610. (Offered every Fall and Spring)  
**Corequisite(s):** PHYS 1610  
**Attributes:** Natural Science Req (A&S)

**PHYS 1630 - University Physics II**  
**Credit(s):** 3 Credits  
Calculus and vector approaches to study of electric charges, forces, fields and potentials; electric current; magnetic forces and fields; electromagnetic waves; light and geometrical optics; mirrors and lenses. (Offered every Fall and Spring)  
**Prerequisite(s):** (PHYS 1610, PHYS 1620, and PHYS 1640)

* Concurrent enrollment allowed.  
**Corequisite(s):** PHYS 1630  
**Attributes:** Natural Science Req (A&S)

**PHYS 1640 - University Physics II Laboratory**  
**Credit(s):** 1 Credit  
The fundamental experiments of modern optics are repeated in this course. Three hours per week.  
**Corequisite(s):** PHYS 1630  
**Attributes:** Natural Science Req (A&S)

**PHYS 1930 - Special Topics**  
**Credit(s):** 1 or 3 Credits  
(Repeatable for credit)  
**Attributes:** Natural Science Req (A&S)

**PHYS 1980 - Independent Study**  
**Credit(s):** 1-3 Credits  
(Repeatable for credit)  
**Attributes:** Natural Science Req (A&S)

**PHYS 2610 - Modern Physics**  
**Credit(s):** 3 Credits  
Lectures three hours per week. At the level of Beiser's Concepts of Modern Physics. (Offered every Spring)  
**Prerequisite(s):** PHYS 1630  
**Attributes:** Natural Science Req (A&S)

**PHYS 2620 - Modern Physics Lab**  
**Credit(s):** 1 Credit  
(Offered every Fall)  
**Prerequisite(s):** PHYS 2610* ; (Math Waiver per Advisor with a minimum score of 1520 or 1 Course from MATH 1520-4999)  
* Concurrent enrollment allowed.  
**Attributes:** Natural Science Req (A&S)
PHYS 3610 - Atomic, Molecular and Solid-State Physics  
Credit(s): 3 Credits  
This course will provide an upper level introduction to topics in Modern Physics including Atomic Physics, Statistical Physics, Molecular Physics, Solid State Physics, Nuclear Physics, Elementary particle Physics, Astrophysics, and Cosmology.  
Attributes: Natural Science Req (A&S)

PHYS 3860 - Physics Research I  
Credit(s): 0 Credits (Repeatable for credit)  
First of three course sequence required for B.S. degree in Physics.  
Attributes: Natural Science Req (A&S)

PHYS 3910 - Co-Op with Industry  
Credit(s): 1-6 Credits (Repeatable for credit)  
A full-time supervised work experience with an agency, firm or organization that employs persons in this degree field. This course is used for the second experiential learning session. (Offered every Fall, Spring and Summer)  
Prerequisite(s): PHYS 2910  
Attributes: Natural Science Req (A&S), UUC:Reflection-in-Action

PHYS 3915 - Internship with Industry  
Credit(s): 1-6 Credits (Repeatable for credit)  
A work experience with an agency, firm or organization that employs persons in this degree field. This experience may be full time or part-time as required by the industry sponsor. This course is used for the first experiential learning session. (Offered every semester)  
Restrictions:  
Enrollment limited to students with a classification of Junior or Senior.  
Attributes: Natural Science Req (A&S), UUC:Reflection-in-Action

PHYS 3930 - Special Topics  
Credit(s): 3 Credits (Repeatable for credit)

PHYS 3980 - Independent Study  
Credit(s): 1-3 Credits (Repeatable for credit)  
Attributes: Natural Science Req (A&S)

PHYS 4010 - Nanoscience Frontiers  
Credit(s): 0 or 3 Credits  
The Nanoscience Science and Nanotechnology applications have become increasingly important for industry and manufacturing. This interdisciplinary physics course is designed to introduce concepts and take a detailed look at how to study, understand and present interdisciplinary science that has significant experimental design components. This course will be devoted to several topics such as Nanoscience Physics, Nanomaterials Engineering, Nanofabrication and Nanolithography.  
Prerequisite(s): CHEM 1110 with a grade of C or higher; MATH 2530 with a grade of C or higher; PHYS 1630 with a grade of C or higher  
Attributes: Natural Science Req (A&S)

PHYS 4020 - Experimental Physics  
Credit(s): 3 Credits  
Experimental Physics teaches students basic techniques such as principles of ultra high vacuum, IV curve and resistance measurements, computer automation, microwave circuit design and measurements. We will also measure microwave resonators and quantum bits at 50 mK. All class work will consist of lab work in a studio classroom.  
Attributes: Natural Science Req (A&S)
PHYS 5010 - Nanoscience and Nanofabrication Frontiers
Credit(s): 0 or 3 Credits
Nanoscale Science and Nanotechnology applications have become increasingly important for industry and manufacturing. This course is designed to introduce concepts and take a detailed look at how to study, understand and present interdisciplinary science. The course will be devoted to several topics in Nanoscale physics, Nanochemistry, Nanomaterials, Nanofabrication and Nanolithography.

PHYS 5020 - Experimental Physics
Credit(s): 3 Credits
Experimental Physics teaches students basic techniques such as principles of ultra high vacuum, IV curve and resistance measurements, computer automation using LabVIEW, computer drafting of micro scale circuitry using L-Edit, and microwave simulations using Sonnet. All class work will consist of lab work in a studio classroom. Offered periodically in even years.

PHYS 5030 - Mathematical Methods in Physics
Credit(s): 3 Credits
This course introduces a variety of powerful mathematical techniques of great utility to physics. Topics covered include differential and integral equations, complex analysis, Green’s functions, and variational methods, including Lagrangian and Hamiltonian formalism of classical mechanics. Mathematical methods are illustrated with examples from electrodynamics, statistical, quantum, and classical mechanics.

PHYS 5310 - Optics for Educators
Credit(s): 3 Credits
This course will provide an upper level introduction to the concepts and techniques of modern optics, including: Review of ray optics and optical properties of lenses; Wave properties of light; Wave interference (including beats); Interference from two discrete sources of light; Interference from N discrete sources of light; Diffraction of light passing through apertures and past obstacles (plugs); Quantum nature of light (including photon counting); Laser physics. (Offered every Spring)

PHYS 5610 - Modern Physics for Educators
Credit(s): 3 Credits
This course will provide an upper level introduction to topics in Modern Physics including Atomic Physics, Statistical Physics, Molecular Physics, Solid State Physics, Nuclear Physics, Elementary particle Physics, Astrophysics, and Cosmology.

PHYS 5930 - Special Topics
Credit(s): 3 Credits (Repeatable for credit)

PHYS 5955 - Capstone Project 1
Credit(s): 3 Credits
A capstone project for the BS degree combined with the beginning of research toward the MS degree; process of design; proposal development; project planning and scheduling; prototyping; quality; testing; research ethics; design review; teamwork; oral and written reports. Restricted to students in the Accelerated BS-MS Program in Engineering/Engineering Physics.

PHYS 5960 - Masters Project
Credit(s): 1-3 Credits (Repeatable for credit)
Masters Project is for students in the MS Non-Thesis degree program who will conduct a small project under the supervision of their Faculty Advisor. No more than 3 hours will be devoted to the Project.

PHYS 5965 - Capstone Project 2
Credit(s): 3 Credits
Continuation of PHYS 5955. Restricted to students in the Accelerated BS-MS Program in Physics.

PHYS 5980 - Independent Study
Credit(s): 1 or 3 Credits (Repeatable for credit)

PHYS 5990 - Thesis Research
Credit(s): 0-6 Credits (Repeatable for credit)
