**SPEECH, LANGUAGE AND HEARING SCIENCES (SLHS)**

**SLHS 1000 - Introduction to Speech, Language & Hearing Sciences**
- Credit(s): 3 Credits
- A survey course designed to provide an introduction to the areas of study and the disciplines involved in communicative disorders, including an overview of communication processes and development as well as speech, language, and hearing disorders. (Offered every Fall and Spring)

**SLHS 1420 - Deaf Culture and Sign Language**
- Credit(s): 3 Credits
- Discussion of the various aspects of Deaf culture, including the description of deafness, Deaf people, the deaf community as defined by audiological and/or cultural means, services for and by Deaf people and culture as reflected in the arts and language of Deaf people. A look at the history of Deaf culture and an introduction to the manual alphabet and basic signs used in communicating with individuals who are deaf. Open to non-majors.

**Attributes:** Global Local Justice-Elective

**SLHS 2000 - Phonetics**
- Credit(s): 2 Credits
- A study of English phonemes with practice transcribing connected speech including dialectal variations, as well as disordered speech, using the international Phonetic Alphabet. (Offered every Fall)

**SLHS 2200 - Anatomy and Physiology of the Speech Mechanism**
- Credit(s): 3 Credits
- A study of the anatomical and physiological aspects of the speech mechanism. (offered every spring)

**SLHS 2400 - Foundations of Language**
- Credit(s): 3 Credits
- An introduction to linguistic theories focusing on the rule systems of language, language development, language difference, dialects and language change across time.

**SLHS 3000 - Cultural Linguistic Diversity**
- Credit(s): 3 Credits
- Course Purpose: Students will examine characteristics of linguistic and cultural diversity across the United States and beyond. Course content emphasizes issues of communication associated with race, ethnicity, gender, socio-economic status, age, physical and mental capacities, environment (e.g. rural vs. urban), religion, and sexual orientation. These issues are considered through rigorous linguistic inquiry, with an aim towards promoting harmonious interactions, health equity and social justice as relevant to the field of Communication Sciences and Disorders. Students will be guided through close examination and analysis of aspects of language and language use, in order to enlighten and enhance communication across diverse populations.

**Prerequisite(s):** SLHS 2000; SLHS 2400

* Concurrent enrollment allowed.

**Attributes:** Global Local Justice-Elective, Medical Humanities, Social Science Req (A&S), Urban Poverty - Health Care, Diversity in the US (A&S)

**SLHS 3200 - Speech & Hearing Science**
- Credit(s): 3 Credits
- A study of the physiological, acoustic, and perceptual aspects of speech. (Offered every fall)

**Restrictions:**
- Enrollment is limited to students with a program in Speech, Lang, Hearing Sci.

**SLHS 3700 - Speech and Language Development**
- Credit(s): 3 Credits
- A study of the typical development of speech and language across the lifespan. Issues related to linguistic and cultural diversity will be explored.

**Prerequisite(s):** SLHS 2000; SLHS 2400

* Concurrent enrollment allowed.

**SLHS 4050 - Research Seminar**
- Credit(s): 1 Credit
- Enroll in the second part of a two-semester senior research capstone. Students will be able to synthesize, integrate, and critically evaluate knowledge and skills from the discipline in the form of a capstone project that incorporates a values-oriented connection to service within the community. A variety of formal and informal writing assignments can be expected for students involving multiple stages of revisions. Students will be expected to analyze and synthesize material from a variety of sources appropriate to evidence based practice in the field of Speech-Language Pathology and Audiology.

**Restrictions:**
- Enrollment is limited to students with a program in Comm Sciences Disorders.

**Attributes:** UUC:Writing Intensive

**SLHS 4150 - Survey of Speech & Language Disorders**
- Credit(s): 3 Credits
- Speech and language disorders may arise from a variety of causes and may affect individuals of any age, from birth through geriatric age. This course will investigate etiologies, characteristics, developmental, and linguistic/cultural correlates of speech and language disorders across the lifespan.

**Prerequisite(s):** SLHS 3700

**Restrictions:**
- Enrollment is limited to students with a program in Speech, Lang, Hearing Sci.

**SLHS 4200 - Audiology: Basic Audiometry**
- Credit(s): 3 Credits
- An introduction to various causes of hearing loss and comprehensive audiological evaluation procedures across the life span. (offered every fall)

**Restrictions:**
- Enrollment is limited to students with a program in Speech, Lang, Hearing Sci.
SLHS 4300 - Clinical Methods
Credit(s): 3 Credits
An introduction to clinical service provision, including principles and procedures in diagnostics and intervention that essential in the field of Speech-Language Pathology and Audiology. Students will practice and improve varied professional writing (i.e. SOAP notes, Treatment Plans, Lesson Plans, Diagnostic Reports, etc.) to ensure success in their careers after graduation. Students are given information and tools to improve their applications, resumes and personal statements to increase their graduate school prospects and careers in this course.
Corequisite(s): SLHS 4350
Attributes: UUC:Self in the World

SLHS 4350 - Professional Writing & Documentation for the SLP and AuD
Credit(s): 1 Credit
This course provides students with an introduction to the clinical skills through supervised observation and related clinical practice, such as intervention techniques and professional documentation. Students apply their knowledge and are evaluated on professional writing in reflection papers, SOAP notes, and goal writing projects. Students will complete the department required 25 observation for graduation in this course.
(Offered in Fall)
Corequisite(s): SLHS 4300

SLHS 4400 - Aural Rehabilitation
Credit(s): 3 Credits
A study of hearing aids and other amplification systems, cochlear implants, speech reading, and auditory training. Habilitative and rehabilitative strategies for individuals with hearing impairment will be discussed.

SLHS 4500 - Neurological Basis of Communication
Credit(s): 3 Credits
A study of neurological development and function related to speech, language, and hearing.
Restrictions:
Enrollment is limited to students with a program in Speech, Lang, Hearing Sci.

SLHS 4600 - Advanced Audiology
Credit(s): 2 Credits
A study of pediatric audiology, electrophysiology measures, behavioral hearing assessment related to developmental level, immittance audiometry and testing for auditory processing disorders.
Restrictions:
Enrollment is limited to students with a program in Speech, Lang, Hearing Sci.

SLHS 4650 - Counseling
Credit(s): 2 Credits
This course will provide a framework of the counseling skills for speech-language pathologist and audiologists while considering the ethics of counseling and some factors that must be kept in mind when interacting with clients and family members. Psychological theories, interviewing skills, and the therapeutic process will be discussed as well as how to apply these to enhance client interactions. Students will collaborate effectively with others on team projects, such as evaluating and implementing counseling techniques in case study projects. Students will learn to understand conflict management with clients and refer to appropriate professionals as needed.
Attributes: UUC:Collaborative Inquiry

SLHS 4700 - Clinical Practicum
Credit(s): 1 Credit (Repeatable for credit)
This course will provide an introduction to clinical skills and an opportunity to learn about related clinical practice. Students enrolled in section-01 will participate in a weekly lecture and simulation case study activities while working with co-clinicians. The standardized patient simulation includes multiple components for cases, from case history to diagnostics to treatment recommendations and referrals. The students are able to use these cases in this course to develop lesson plans, write SOAP notes and self-reflect on their clinical skills. Students enrolled in section-02 may participate in supervised clinical practicum experiences including assessment and remediation of a hearing disorders.
Prerequisite(s): SLHS 4300
Restrictions:
Enrollment is limited to students with a program in Speech, Lang, Hearing Sci.
Attributes: UUC:Reflection-in-Action

SLHS 4750 - Neurobases of Communication
Credit(s): 3 Credits
A study of neurological development and function related to speech, language, and hearing.
Restrictions:
Enrollment limited to students with a classification of Senior.

SLHS 4800 - Senior Seminar
Credit(s): 2 Credits
This course provides the opportunity for students to complete and present a capstone project that synthesizes this Department's undergraduate learning outcomes. Students will evaluate and integrate theories, research methods, and applications of CSDI coursework by incorporating a values-oriented connection to community service into their culminating projects. These will be presented to the Department and invited members of the University in order for students to showcase their creative, analytical, and ethical reasoning capacities to effectively address urgent contemporary and future healthcare and social justice needs across the lifespan and across culturally and linguistically diverse communities.
Restrictions:
Enrollment limited to students with a classification of Senior.
Enrollment is limited to students with a program in Comm Sciences Disorders.
Attributes: UUC:Writing Intensive
SLHS 4900 - Speech Sound Disorders Assessment & Treatment Credit(s): 2 Credits
This course will discuss assessment and treatment of speech sound disorders covering current trends in assessment and clinical practice. Brief review of etiology, characteristics and impact of selected speech sound disorders in children and adults will be discussed. Students will engage in advanced analysis of vowels and consonants in various segments using phonetic transcription. Complex studies will allow for clinical application of assessment and treatment. Dialectal variation and its effect on speech sound disorders will also be discussed. The course will focus on children yet also cover issues with speech sound disorders across the life span.
Prerequisite(s): SLHS 2000; SLHS 4300
Restrictions:
Enrollment is limited to students with a program in Speech, Lang, Hearing Sci.

SLHS 5010 - Foundations of Contemporary Clinical Practice Credit(s): 1 Credit (Repeatable up to 5 credits)
This course is a component of the overall Clinical Practicum experience designed to address non-academic issues presented in a seminar format. Classes are designed to supplement direct client intervention relative to professional issues that impact provision of diagnostic and therapeutic services across the lifespan of individuals with communication disorders.
Restrictions:
Enrollment is limited to students with a program in Speech, Lang, Hearing Sci.

SLHS 5011 - Clinical Laboratory Credit(s): 1 Credit (Repeatable for credit)
This team-taught course addresses clinical learning and application of knowledge in evaluation and treatment in the context of varying practice areas. There is an emphasis on exposure to hands-on and practical learning experiences including but not limited to: use of various evaluation tools, specialized instrumentation, communication devices (high and low tech), use of simulation, case studies and group learning modules. Student may not be enrolled in any undergraduate coursework.

SLHS 5012 - Practicum - Campus Clinic Credit(s): 1 Credit (Repeatable for credit)
Clinical practicum CSDI-5012 is a hands-on experience which addresses screenings, diagnostics, treatment and counseling for children or adults presenting with a variety of speech-language disabilities or diagnoses in the areas of articulation, hearing, language and social aspects. The setting for the experience is the Saint Louis University Speech-Language-Hearing Clinic, which includes some school and Head Start opportunities. (Offered every Fall, Spring and Summer)
Prerequisite(s): SLHS 5010

SLHS 5015 - Practicum - Offsite Clinic Credit(s): 1-2 Credits (Repeatable for credit)
Clinical practicum CSDI 5015 is a direct clinical experience which addresses screenings, diagnostics, treatment and counseling for children and/or adults presenting with a variety of speech-language disabilities or diagnoses in the areas of speech, language, hearing, swallowing and social aspects. Students assigned to CSDI 5015 will be placed in off campus clinical settings with an ASHA-certified clinician serving as their clinical supervisor.
Restrictions:
Enrollment is limited to students with a major in Comm Sciences Disorders.

SLHS 5050 - Research for the Clinician Credit(s): 2 Credits
Statistics is recommended. This course is designed to assist graduate students in reading, understanding and critically evaluating research in speech-language pathology. Aids students in developing, designing and writing their own experimental and clinical research proposals.

SLHS 5100 - Counseling for Speech Language Pathology Credit(s): 2 Credits (Repeatable for credit)
An overview of counseling principles and procedures related to speech language pathology and audiology. This course provides the opportunity for students to apply counseling strategies and research methods to a variety of case studies.

SLHS 5450 - Speech Sound Disorders in Children Credit(s): 3 Credits (Repeatable for credit)
A study of theories of phonological development and disorders and current diagnostic and therapeutic techniques.

SLHS 5510 - Social Communication Development and Disorders Credit(s): 2 Credits (Repeatable up to 3 credits)
Social Skills are integrally intertwined with communication skills and are essential for academic and professional success. This course will include discussions of the neurological bases, environmental factors, early connections to language and literacy, and a discussion of the communication disorders that may demonstrate difficulties in social communication. Assessment and management strategies will be demonstrated and described.

SLHS 5520 - Pediatric Dysphagia Credit(s): 2 Credits
This course provides an overview of the nature, etiology, and physiology of normal and pathophysiological patterns of swallowing in pediatrics. Students will learn how to plan and implement a clinical swallow evaluation and instrumental swallowing evaluations will be thoroughly discussed and examined. Evidence-based treatment of feeding and swallowing disorders in infants and children within various clinical settings will be discussed. Clinical decision making related to the patient with dysphagia will be emphasized along with patient/family focused care and a multi-disciplinary approach. The course content will be presented via lecture, video review, case studies, online simulation, and discussion.

SLHS 5530 - Augmentative and Alternative Communication Credit(s): 2 Credits
An overview of augmentative and alternative communication modes, techniques and symbol systems, as well as assessment and intervention strategies.

SLHS 5550 - Early Childhood Language Disorders Credit(s): 3 Credits
A focus on theoretically-based functional practices in the assessment and intervention of language disorders in children from birth to eight years.

SLHS 5560 - School-Age Language Disorders Credit(s): 3 Credits
A focus on theoretically-based functional practices in the assessment and intervention of language-learning disorders in school-age children and youth.

SLHS 5580 - Language Based Literacy Disorders Credit(s): 2 Credits
This course will focus on the study of literacy development and disorders in school-age children with language impairment. Includes assessment and intervention practices for reading, spelling, and writing.
SLHS 5600 - Fluency Disorders
Credit(s): 3 Credits
An overview of normal fluency and exploration of fluency disorders. Specific focus on the nature, assessment, and treatment of stuttering.

SLHS 5630 - Dysphagia
Credit(s): 3 Credits
A study of the anatomy, physiology, evaluation and treatment of swallowing and associated disorders.

SLHS 5700 - Voice Disorders
Credit(s): 3 Credits
This course provides an in-depth anatomic, physiologic, and neurologic information for students to understand and identify the mechanisms underlying voice production. The pathophysiology, causes, assessment, and treatment of various voice disorders will be addressed. Upon successful completion of this course, students will have sufficient level of knowledge of voice disorders for entry level supervised practicum or clinical fellowships (CFY) and/or advanced study in the area of voice disorders.

SLHS 5710 - Cleft Palate and Craniofacial Anomalies
Credit(s): 2 Credits
A study of the nature, etiology, physiological and psychological aspects and ramifications of cleft palate.

SLHS 5720 - Neurogenic Communication Disorders in Adults
Credit(s): 3 Credits
A study of the nature, etiology, physiological and psychological aspects of aphasia and motor speech disorders.

SLHS 5760 - Motor Speech Disorders
Credit(s): 3 Credits
A study of the nature, etiology, physiological and psychological aspects of acquired motor speech disorders.

SLHS 5770 - Multilingual Communication Disorders
Credit(s): 2 Credits
Issues and methodologies in definition, diagnosis and treatment of communication disorders of persons from culturally and linguistically diverse backgrounds.

SLHS 5800 - Professional Issues in Speech-Language Pathology
Credit(s): 2 Credits (Repeatable for credit)
Taken in the last semester of study. This course focuses on the business, legal and ethical issues that impinge on clinical practice in speech-language pathology. Emphasis is placed on the administrative aspects of service delivery pertaining to private practice, clinics and hospital-based programs.

Restrictions:
Enrollment is limited to students with a major in Comm Sciences Disorders.

SLHS 5820 - Cognitive Communication Disorders
Credit(s): 3 Credits
A study of the etiology, diagnosis, and treatment of cognitive communication disorders due to traumatic brain injury and dementia.

SLHS 5880 - Advanced Audiology
Credit(s): 2 Credits
A study of pediatric audiology, electrophysiology measures, behavioral hearing assessment related to development level, immittance audiometry and testing for auditory processing disorders.
